Disclaimer

The information in this guide is subject to change without notice.

Acer Incorporated makes no representations or warranties, either expressed or implied, with respect to the contents hereof and specifically disclaims any warranties of merchantability or fitness for any particular purpose. Any Acer Incorporated software described in this manual is sold or licensed "as is". Should the programs prove defective following their purchase, the buyer (and not Acer Incorporated, its distributor, or its dealer) assumes the entire cost of all necessary servicing, repair, and any incidental or consequential damages resulting from any defect in the software.

Acer is a registered trademark of Acer Corporation.

Intel is a registered trademark of Intel Corporation.

Pentium and Pentium II/III are trademarks of Intel Corporation.

Other brand and product names are trademarks and/or registered trademarks of their respective holders.

Conventions

The following conventions are used in this manual:

| SCREEN MESSAGES | Denotes actual messages that appear on screen. |
|-----------------|--|
| NOTE | Gives bits and pieces of additional information related to the current topic. |
| WARNING | Alerts you to any damage that might result from doing or not doing specific actions. |
| CAUTION | Gives precautionary measures to avoid possible hardware or software problems. |
| IMPORTANT | Reminds you to do specific actions relevant to the accomplishment of procedures. |

Preface

Before using this information and the product it supports, please read the following general information.

- 1. This Service Guide provides you with all technical information relating to the BASIC CONFIGURATION decided for Acer's "global" product offering. To better fit local market requirements and enhance product competitiveness, your regional office MAY have decided to extend the functionality of a machine (e.g. add-on card, modem, or extra memory capability). These LOCALIZED FEATURES will NOT be covered in this generic service guide. In such cases, please contact your regional offices or the responsible personnel/channel to provide you with further technical details.
- 2. Please note WHEN ORDERING FRU PARTS, that you should check the most up-to-date information available on your regional web or channel. If, for whatever reason, a part number change is made, it will not be noted in the printed Service Guide. For ACER-AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code to those given in the FRU list of this printed Service Guide. You MUST use the list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

Jumper Settings/Clear BIOS Password Procedures

1. Remove the DIMM cover and the lower DDR2 memory module, then find out the G70 position on the main board. Please just the lower DDR2 memory module, you will need the upper DDR2 memory module to boot up the system.

2. Use a tweezers or a screwdriver to short the G70 pad and remain the short status.

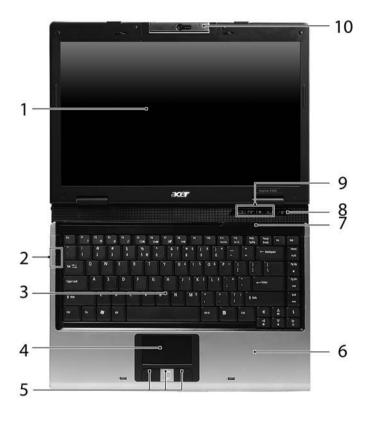

3. Power on the system until POST is completed. Then you can release the tweezers or screwdriver. The BIOS password should be cleared after these steps.

Your Acer Notebook tour

After knowing your computer features, let us show you around your new TravelMate computer.

Aspire 3640 front View

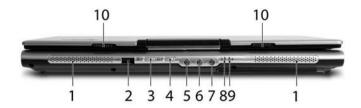

TravelMate 2440 front view

| # | Icon | Item | Description |
|----|------|--|---|
| 1 | | Display screen | Also called LCD (liquid-crystal display), displays computer output. |
| 2 | | Status indicators | Light-Emitting Diodes (LEDs) that light up to show the status of the computer's functions and components. |
| 3 | | Keyboard | For entering data into your computer. |
| 4 | | Touchpad | Touch-sensitive pointing device which functions like a computer mouse. |
| 5 | | Click buttons (left, center and right) | The left and right buttons function like the left and right mouse buttons; the center button serves as a 4-way scroll button. |
| 6 | | Palmrest | Comfortable support area for our hands when you use the computer. |
| 7 | | Microphone | Internal microphone for sound recording. |
| 8 | | Power button | Turns the computer on and off. |
| 9 | | Easy-launch Buttons | Buttons for launching frequently used programs. |
| 10 | | Built-in camera | 310,000 pixel web camera for video communication. |

Closed Front View

| lcon | Item | Description |
|------------------|--|---|
| | Speakers | Left and right speakers deliver stereo audio output. |

|---|------|--------------------------------|--|
| 1 | == | DC-in jack | Connects to an AC adapter. |
| | | External display (VGA) port | Connects to a display device(e.g., external monitor, LCD projector). |
| | | Battery | Powers the computer |

Bottom Panel

| # | Item | Description |
|---|--------------|---|
| 1 | Battery lock | Locks the battery in position. |
| 2 | Cooling fan | Helps keep the computer cool. Note: Do not cover or obstruct the opening of the fan. |

| 3 | Hard disk bay | Houses the computer's hard disk (secured with screws) |
|---|-----------------------|---|
| 4 | Memory compartment | Houses the computer's main memory. |
| 5 | Battery release latch | Release the battery for removal. |
| 6 | Battery bay | Houses the computer's battery pack. |

Indicators

The computer has four easy-to-read status indicators on the upper-right above the keyboard, and four on the front panel.

Aspire 3640:

TravelMate 2420:

The power, battery and wireless communication status indicators are visible even when the LCD display is closed.

| Icon | Function | Description |
|----------|--------------|--|
| A | Cap lock | Lights when Cap Lock is activated |
| 1 | Num lock | Lights when Num Lock is activated. |
| * | HDD | Indicates when the hard disc or optical drive is active. |
| 8 | Bluetooth | Indicates the status of Bluetooth communication. |
| Ö | Wireless LAN | Indicates the status of wireless LAN communication. |
| Ð | Battery | Lights up when the battery is being charged. |
| Ÿ | Power | Lights up when the computer is on. |

NOTE: 1. **Charging:** The light shows amber when the battery is charging. 2. **Fully charged:** The light shows green when in AC mode.

Easy-Launch Buttons

Located above the keyboard are four buttons. These buttons are called easy-launch buttons. They are: mail Web browser, Empowering Key " ${\cal C}$ "and one user-programmable button.

Press "C" to run the Acer Empowering Technology. The mail and Web browser buttons are pre-set to email and Internet programs, but can be reset by users. To set the Web browser, mail and programmable buttons, run the Acer Launch Manager.

Aspire 3640:

TravelMate 2440:

| Launch key | Default application |
|-------------|--|
| Р | User-programmable |
| e | Acer Empowering Technology (user-programmable) |
| Web browser | Internet browser (user-programmable) |
| Mail | Email application (user-programmable) |

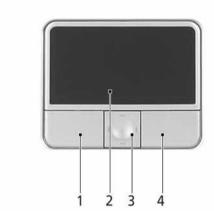

Touchpad Basics

The following teaches you how to use the touchpad:

Aspire 3640:

TravelMate 2440:

- ☐ Move your finger across the touchpad (2) to move the cursor.
- Press the left (1) and right (4) buttons located beneath the touchpad to perform selection and execution functions. These two buttons are similar to the left and right buttons on a mouse. Tapping on the touchpad is the same as clicking the left button.
- ☐ Use the 4-way scroll (3) button to scroll up or down and move left or right a page. This button mimics your cursor pressing on the right scroll bar of Windows applications.

| Function | Left Button (1) | Right Button (4) | Main touchpad (2) | Center button (3) |
|----------|------------------------|---------------------|--|-------------------|
| Execute | Click twice quickly | | Tap twice (at the same speed as double- clicking the mouse button) | |
| Select | Click once | | Tap once | |

| Function | Left Button (1) | Right Button (4) | Main touchpad (2) | Center button (3) |
|---------------------|--|---------------------|--|--|
| Drag | Click and hold, then use finger to drag the cursor on the touchpad | | Tap twice (at the same speed as double-clicking a mouse button) then hold finger to the touchpad on the second tap to drag the cursor. | |
| Access context menu | | Click once | | |
| Scroll | | | | Click and hold to move up/down/left/right. |

NOTE: Keep your fingers dry and clean when using the touchpad. Also keep the touchpad dry and clean. The touchpad is sensitive to finger movements. Hence, the lighter the touch, the better the response. Tapping too hard will not increase the touchpad's responsiveness.

Using the Keyboard

The keyboard has full-sized keys and an embedded keypad, separate cursor keys, two Windows keys and twelve function keys.

Lock Keys and embedded numeric keypad

The keyboard has three lock keys which you can toggle on and off.

Aspire 3640:

TravelMate 2440:

| Lock Key | Description |
|--------------------------------------|--|
| Caps Lock | When Caps Lock is on, all alphabetic characters typed are in uppercase. |
| Num lock <fn>+<f11></f11></fn> | When Num Lock is on, the embedded keypad is in numeric mode. The keys function as a calculator (complete with the arithmetic operators +, -, *, and /). Use this mode when you need to do a lot of numeric data entry. A better solution would be to connect an external keypad. |
| Scroll lock <fn>+<f12></f12></fn> | When Scroll Lock is on, the screen moves one line up or down when you press the up or down arrow keys respectively. Scroll Lock does not work with some applications. |

The embedded numeric keypad functions like a desktop numeric keypad. It is indicated by small characters located on the upper right corner of the keycaps. To simplify the keyboard legend, cursor-control key symbols are not printed on the keys.

| Desired Access | Num Lock On | Num Lock Off |
|---|---|---|
| Number keys on embedded keypad | Type numbers in a normal manner. | |
| Cursor-control keys on embedded keypad | Hold <shift> while using cursor-control keys.</shift> | Hold <fn> while using cursor-control keys.</fn> |

| Desired Access | Num Lock On | Num Lock Off |
|----------------|-------------|--------------------------------------|
| | | Type the letters in a normal manner. |

Windows Keys

The keyboard has two keys that perform Windows-specific functions.

| Key | Icon | Description | |
|------------------|------|--|--|
| Windows key | | Pressed alone, this key has the same effect as clicking on the Windows Start button; it launches the Start menu. It can also be used with other keys to provide a variety of function: | |
| | | + <tab> Activates next taskbar button.</tab> | |
| | | + <e> Opens the My Computer window</e> | |
| | | + <f1> Opens Help and Support.</f1> | |
| | | + <f> Opens the Find: All Files dialog box.</f> | |
| | | + <r> Opens the Run dialog box.</r> | |
| | | + M Minimizes all windows. | |
| | | <shift>+ # + <m> Undoes the minimize all windows action.</m></shift> | |
| Applicati on key | | This key has the same effect as clicking the right mouse button; it opens the application's context menu. | |

Hot Keys

The computer employs hotkeys or key combinations to access most of the computer's controls like sreen brightness, volume output and the BIOS utility.

To activate hot keys, press and hold the **<Fn>** key before pressing the other key in the hotkey combination.

Aspire 3640:

TravelMate 2440:

| Hot Key | Icon | Function | Description |
|---------|-----------------------|--------------------------|---|
| Fn-F1 | | Hot key help | Displays help on hot keys. |
| | ? | | |
| Fn-F2 | | Acer eSetting | Launches the Acer eSettings in Acer eManager. |
| | © | | |
| Fn-F3 | ♦ | Acer ePowerManagement | Launches the Acer ePowerManagement in Acer eManager. |
| Fn-F4 | Z ^z | Sleep | Puts the computer in Sleep mode. |
| Fn-F5 | | Display toggle | Switches display output between the display screen, external monitor (if connected) and both. |
| Fn-F6 | * ■ | Screen blank | Turns the display screen backlight off to save power. Press any key to return. |
| Fn-F7 | | Touchpad toggle | Turns the internal touchpad on and off. |
| Fn-F8 | ದ / ⊲ » | Speaker toggle | Turns the speakers on and off. |
| Fn-↑ | (1) | Volume up | Increases the speaker volume. |
| Fn-↓ | () | Volume down | Decreases the speaker volume. |
| Fn-→ | Ö | Brightness up | Increases the screen brightness. |

| Hot Key | Icon | Function | Description |
|---------------|-------------|-----------------|---------------------------------|
| Fn- <u></u> ∈ | | Brightness down | Decreases the screen brightness |
| | : ₩- | | |

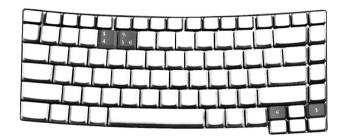

Special Key

You can locate the Euro symbol and US dollar sign at the upper-center and/or bottom-right of your keyboard. To type:

Aspire 3640:

TravelMate 2440:

The Euro symbol

- 1. Open a text editor or word processor.
- 2. Either directly press the **<Euro>** symbol at the bottom-right of the keyboard, or hold **<Alt Gr>** and then press the **<5>** symbol at the upper-center of the keyboard.

The US dollar sign

- 1. Open a text editor or word processor.
- Either directly press the <Dollar> key at the bottom-right of the keyboard, or hold <Shift> and then press the <4> key at the upper-center of the keyboard.

NOTE: This function varies by the operating system version.

NOTE: Some fonts and software do not support the Euro symbol. Please refer to www.microsoft.com/typography/fag/fag12.htm for more information.

Acer Empowering Technology

Acer's innovative Empowering Technology makes it easy for you to access frequently used functions and manage your new Acer notebook. It features the following handy utilities:

| Acer ePower Management extends battery power via versatile usage profiles. |
|--|
| Acer ePresentation Management connects to a projector and adjusts display settings conveniently. |
| Asset all self Management limits assess to external storage modic |

Acer eLock Management limits access to external storage media.

Acer eRecovery Management backs up and recovers data flexibly, reliably and completely.

Acer eSettings Management accesses system information and adjusts settings easily.

Acer ePerformance Management improves system performance by optimizing disk space, memory and registry settings.

For more information, press the < < < < key to launch the Empowering Technology menu, then click on the appropriate utility and select the Help or Tutorial function.

Empowering Technology password

Before using Acer eLock Management and Acer eRecovery Management, you must initalize the Empowering Technology password. Right-click on the Empowering Technology toolbard and select "Password Setup" to do so. If you do not initialize the Empowering Technology password, you will be prompted to do so when running Acer eLock Management or Acer eRecovery Management for the first time.

Acer ePower Management

Acer ePower Management features a straightforward user interface. To launch it, select Acer ePower Management from the Empowering Technology interface.

AC Mode (Adapter mode)

The default setting is "Maximum Performance." You can adjust CPU speed, LCD brightness and other settings, or click on buttons to turn the following functions on/off: Wireless LAN, Bluetooth, CardBus, FireWire (1394), Wired LAN and Optical Device if supported.

DC Mode (Battery mode)

There are four pre-defined profiles - Entertainment, Presentation, Word Processing, and Battery Life. You can also define up to three of your own.

To create new power profile

- Change power settings as desired.
- 2. Click "Save as..." to save to a new power profile.
- 3. Name the newly created profile.
- 4. Select whether this profile is for Adapter or Battery mode, then click OK.
- 5. The new profile will appear in the profile list.

Battery status

For real-time battery life estimates based on current usage, referto the panel on the lower left-hand side of the window.

For additional options, click "Settings" to:

- Set alarms.
- Re-load factory defaults.
- Select what actions will be taken when the cover is closed or the power button is pressed.
- View information about Acer ePower Management.

Acer ePresentation Management

Acer ePresentation Management lets you project your computer's display to an external device or project using the hot key: Fn + F5. If auto-detection hardware is implemented in the system, your system display will be automatically switched out when an external display is connected to the system.

Acer eLock Management

Acer eLock Management is a security utility that allows you to lock your removable data, optical and floppy drives to ensure that data can't be stolen while your notebook is unattended.

- Removable data devices includes USB disk drives, USB pen drives, USB flash drives, USB MP3 drives, USB memory card readers, IEEE 1394 disk drives and any other removable disk drives that can be mounted as a file system when plugged into the system.
- Optical drive deivces includes any kind of CD-ROM or DVD-ROM drives.
- ☐ Floppy disk drives 3.5-inch disks only.
- ☐ Interfaces includes serial ports, parallel port, infrared (IR), and Bletooth.

To activate Acer eLock Management, a password must be set first. Once set, you can apply locks to any of the devices. Lock(s) will immediately be set without any reboot necessary, and will remain locked after rebooting, until unlocked.

NOTE: If you lose your password, there is no method to reset it except by reformatting your notebook or taking your notebook to anAcer Customer Serivce Center. Be sure to remember or write down your password.

Acer eRecovery Management

Acer eRecovery Management is a powerful utility that does away with the need for recovery disks provided by the manufacturer. The Acer eRecovery Management utility occupies space in a hidden partition on your system's HDD. User-created backups are stored on D:\ drive. Acer eRecovery Management provides you with:

- Password protection.
- Recovery of applications and drivers.
- Image/data backup:
 - Back up to HDD (set recovery point).
 - Back up to CD/DVD.
- Image/data recovery tools:
 - Recover from a hidden partition (factory defaults).
 - Recover from the HDD (most recent user-defined recovery point).
 - □ Recover from CD/DVD.

For more information, please refer to "Acer eRecovery Management"

NOTE: If your computer did not come with a Recovery CD or System CD, please use Acer eRecovery Management's "System backup to optical disk" feature to burn a backup image to CD or DVD. To ensure the best results when recovering your system using a CD or Acer eRecovery Management, detach all peripherals (except the external Acer ODD, if your computer has one), including your Acer ezDock.

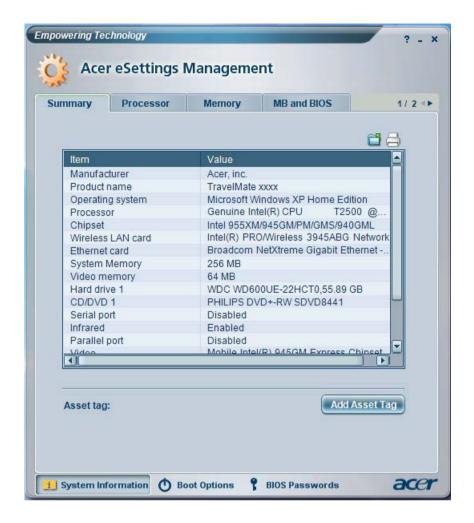

Acer eSettings Management

Acer eSettings Management allows you to inspect hardware specifications and to monitor the system health status. Furthermore, Acer eSettings Management enables you to optimize your Windows operating system, so your computer runs faster, smoother and better.

Acer eSettings Management also:

- Provides a simple graphical user interface for navigating.
- Displays general system status and advanced monitoring for power users.

Acer ePerformance Management

Acer ePerformance Management is a system optimization tool that boosts the performance of your Acer notebook. It provides and express optimization method to release unused memory and disk space quickly. The user can also enable advanced options for full control over the following option:

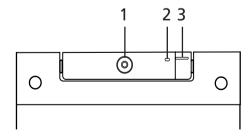

- ☐ Memory optimization releases unused memory and check usage.
- □ Disk optimization removes unneeded items and files.
- Speed optimization improves the usability and performance of your Windows XP system.

Acer OrbiCam

The Acer OrbiCam is a 1.3 megapixel CMOS camera appropriately mounted on the top of the LCD panel. The camera's 225-degree ergonomic rotation allows you to capture high-resolution photos or videos up front or at the back of the LCD panel. The Acer OrbiCam fully supports the Acer Video Conference technology so that you can transmit the best video quality over an instant Messenger service.

Getting to know your Acer OrbiCam

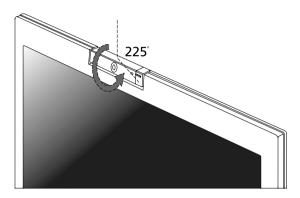

| No. | Item | |
|-----|-----------------|--|
| 1 | Lens | |
| 2 | Power indicator | |

| No. | Item |
|-----|------------------------------------|
| 3 | Rubber grip (selected models only) |

Rotating the Acer Orbicam

The Acer OrbiCam rotates 225 degrees counterclockwise to achieve the desired angle. Refer to the illustrations below:

For your convenience, the camera snaps 45 degrees to match the position of your face in front or at the back of the LCD panel.

NOTE: Do not rotate the camera clockwise to prevent damage to the device.

Launching the Acer OrbiCam

To launch the Acer OrbiCam, double click on the Acer OrbiCam icon on the screen.

OR

Click Start > All programs > Acer > Acer OrbiCam. The Acer OrbiCam capture windows window appears.

Changing the Acer OrbiCam settings

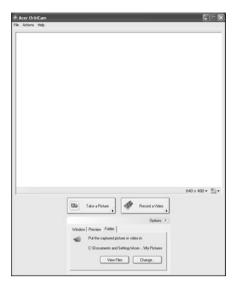

Resolution

To change the capture resolution, click the displayed resolution at the bottom right corner of the capture window, then select the desired resolution.

Options

Chapter 1 29

Click Options to display the Window, Preview, and Folder tabs. Use the options to change the capture window size, preview settings, and the folder for captured photos or videos.

Camera Settings

Basic settings: Click the Camera Settings icon on the bottom right corner of the capture display, then select Camera Settings from the pop-up menu. You can adjust the Video, Audio, and Zoom/ Face tracking options from this window.

☐ Capture settings: From the Camera Settings window, click the Driver Settings button. The Properties window will appear.

| Device Settings allows you to change the camera brightness, contrast, hue, saturation, sharpness etc. |
|--|
| Advanced Settings allows you to achieve gain control, implement image mirror, select image enhancements and anti-flicker settings, and turn on/off the camera indicator. |
| Zoom/Face Track Settings allows you to adjust the zoom level and turn the face tracking feature on or off. |

Capturing photos or videos

To capture a photo or a video clip, rotate the Acer OrbiCam to get the desired angle, then click the Take a Picture or Record a Video button. The Windows Picture and Fax Viewer or the Windows Media Player automatically launches to display or play a preview of the photo/video clip.

NOTE: By default, all photos and videos are saved in the My Pictures and My Videos folder.

Using the Acer OrbiCam as webcam

The Acer OrbiCam is automatically selected as the capture device of any instant messenger (IM) application. To use the Acer OrbiCam as a webcam, open the IM service, then select the video/webcam feature. You can now broadcast from your location to an IM partner anywhere in the world.

Chapter 1 31

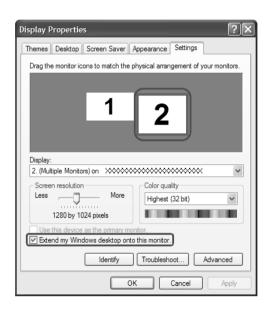

Using the System Utilities

NOTE: The system utilities work under Microsoft Windows XP only.

Acer GridVista (dual-display compatible)

NOTE: This feature is only available on certain models.

To enable the dual monitor feature of the notebook, first ensure that the second monitor is connected, then select **Start**, **Control Panel**, **Display** and click on **Settings**. Select the secondary monitor (2) icon in the display box and then click the check box **Extend my windows desktop onto this monitor**. Finally, click **Apply** to confirm the new settings and click **OK** to complete the process.

Acer GridVista is a handy utility that offers four pre-defined display settings so you can view multiple windows on the same screen. To access this function, please go to **Start>All Programs** and click on **Acer GridVista**. You may choose any one of the four display settings indicated below:

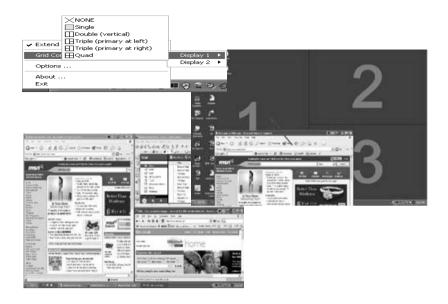

Double (verticle), Triple (primary at left), Triple (primary at right), or Quad Acer Gridvista is dual-display compatible, allowing two displays to be partitioned indepently.

Acer Gridvista is dual-display compatible, allowing two displays to be partitioned independently.

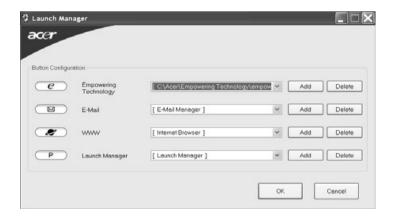

AcerGridVista is imple to set up:

- 1. Run Acer GridVista and select your preferred screen configuration for each display from the task bar.
- 2. Drag and drop each window into the appropriate grid.
- 3. Enjoy the convenience of a well-organized desktop.

NOTE: Please ensure that the resolution setting of the second monitor is set to the manufacturer's recommended value.

Launch Manager

Launch Manager allows you to set the four easy-launch buttons located above the keyboard. You can access the Launch Manager by clicking on Start > All Programs > Launch Manager to start the application.

Chapter 1 33

Hardware Specifications and Configurations

Processor

| Item | Specification |
|------------------|---|
| CPU type | Intel® Celeron® M Processor 410/420/430 (1MB L2 cache, 1.46/1.60/1.73 GHz, 533 MHz FSB) or higher |
| Core logic | ATI RC410ME+ATI SB460 |
| CPU package | Intel socketable 478pin Micro-BGA |
| CPU core voltage | 0.944~1.3V |

CPU Fan True Value Table

| Stage | DTS(degree C) | Local | Fan Speed (rpm) | Acoustic Level (dBA) |
|---------|---------------|-------|-----------------|----------------------|
| Stage 1 | 50 | 56 | 2910 | 29 |
| Stage 2 | 60 | 60 | 3320 | 32 |
| Stage 3 | 70 | 65 | 3720 | 35 |
| Stage 4 | 82 | 70 | 4170 | 38 |
| Stage 5 | 93 | 77 | 4430 | 40 |

NOTE: Stage 1-4 is normal situation. Stage 5 is protection while the CPU is at extremely high temperature or at critical situation. DTS refers to the CPU's temperature; and Local means the temperature of the IC on the main board.

BIOS

| Item | Specification |
|-----------------------|---|
| BIOS vendor | Phneoix |
| BIOS Version | 1.00 (MP version) |
| BIOS ROM type | Flash ROM |
| BIOS ROM size | 512KB Flash BIOS |
| BIOS package | 32-pin PLCC |
| Supported protocols | ACPI 2.0/3.0 compliance, PC Card 95, SM BIOS 2.3, IEEE1284-ECP/EPP, PCI 2.2, PnP 1.0a, DMI 2.0, PS/2 keyboard and mouse, USB 2.0, VGA BIOS, CD-ROM bootable, IEEE 1394, WFM 2.0 |
| BIOS password control | Set by setup manual |

Second Level Cache

| Item | Specification |
|-------------------------|---------------------|
| Cache controller | Built-in CPU |
| Cache size | 1MB |
| 1st level cache control | Always enabled |
| 2st level cache control | Always enabled |
| Cache scheme control | Fixed in write-back |

System Memory

| Item | Specification |
|---------------------------------|------------------------------------|
| Memory controller | Built-in ATI RC410ME |
| Memory size | 0MB (no on-board memory) |
| DIMM socket number | 2 sockets |
| Supports memory size per socket | 1024MB |
| Supports maximum memory size | 2GB (by two 1024MB SO-DIMM module) |

System Memory

| Item | Specification |
|----------------------------|--|
| Supports DIMM type | DDR 2 Synchronous DRAM |
| Supports DIMM Speed | 533/677 MHz |
| Supports DIMM voltage | 1.8V and 0.9V |
| Supports DIMM package | 200-pin soDIMM |
| Memory module combinations | You can install memory modules in any combinations as long as they match the above specifications. |

Memory Combinations

| Slot 1 | Slot 2 | Total Memory |
|--------|--------|--------------|
| OMB | 128MB | 128MB |
| 0MB | 256MB | 256MB |
| 0MB | 512MB | 512MB |
| 0MB | 1024MB | 1024MB |
| 128MB | 128MB | 256MB |
| 128MB | 256MB | 384MB |
| 128MB | 512MB | 640MB |
| 128MB | 1024MB | 1152MB |
| 256MB | 128MB | 384MB |
| 256MB | 256MB | 512MB |
| 256MB | 512MB | 768MB |
| 256MB | 1024MB | 1280MB |
| 512MB | 128MB | 640MB |
| 512MB | 256MB | 768MB |
| 512MB | 512MB | 1024MB |
| 512MB | 1024MB | 1536MB |
| 1024MB | ОМВ | 1024MB |
| 1024MB | 128MB | 1152MB |
| 1024MB | 256MB | 1280MB |
| 1024MB | 512MB | 1536MB |
| 1024MB | 1024MB | 2048MB |

NOTE: Above table lists some system memory configurations. You may combine DIMMs with various capacities to form other combinations. On above table, the configuration of slot 1 and slot 2 could be reversed.

LAN Interface

| Item | Specification |
|------------------------|---|
| Chipset | Realtek 8110CL |
| Supports LAN protocol | 10/100Mbps |
| LAN connector type | RJ45 |
| LAN connector location | Right side |
| Features | Integrated 10/100 BASE-T transceiver Wake on LAN support compliant with ACPI 2.0 PCI v2.2 |

Chapter 1 35

Modem Interface

| Item | Specification |
|---------------------------------|---------------|
| Data modem data baud rate (bps) | 56K |
| Supports modem protocol | V.92 |
| Modem connector type | RJ11 |
| Modem connector location | Right side |

Bluetooth Interface (There is NO Bluetooth interface for this model)

| Item | Specification |
|-----------------|--|
| Chipset | There is NO Bluetooth interface for this model |
| Data throughput | 723 bps (full speed data rate) |
| Protocol | Bluetooth 1.1 (Upgradeable to Bluetooth 1.2 when SIG specification is ratified). |
| Interface | USB 1.1 |
| Connector type | Mini-USB |

Wireless Module 802.11b/g (optional device)

| Item | Specification |
|-----------------|--------------------|
| Chipset | Built-in ATI SB460 |
| Data throughput | 11~54 Mbps |
| Protocol | 802.11b+g |
| Interface | PCI bus |

Hard Disk Drive Interface

| Item | | | |
|---|---------------------------------|---------------------------------|--|
| Vendor & Model Name | WD WD400UE-22HCT0 | WD WD600UE-22HCT0 | SEAGATE ST98823A Samsung MP0804H WD WD800UE-22HCT0 |

Chapter 1 41

System Utilities

BIOS Setup Utility

The BIOS Setup Utility is a hardware configuration program built into your computer's BIOS (Basic Input/Output System).

Your computer is already properly configured and optimized, and you do not need to run this utility. However, if you encounter configuration problems, you may need to run Setup. Please also refer to Chapter 4 Troubleshooting when problem arises.

To activate the BIOS Utility, press 2 during POST (when "Press <F2> to enter Setup" message is prompted on the bottom of screen).

Press 🔁 to enter setup. The default parameter of F12 Boot Menu is set to "disabled". If you want to change boot device without entering BIOS Setup Utility, please set the parameter to "enabled".

Press <F12> during POST to enter multi-boot menu. In this menu, user can change boot device without entering BIOS SETUP Utility.

Chapter 2 43

Navigating the BIOS Utility

There are six menu options: Info., Main, System Devices, Security, Boot, and Exit.

Follow these instructions:

| To choose a menu, use the cursor left/right keys (☐ ☐). |
|--|
| To choose a parameter, use the cursor up/down keys (1). |
| To change the value of a parameter, press sor s. |
| A plus sign (+) indicates the item has sub-items. Press [ENTE] to expand this item. |
| Press so while you are in any of the menu options to go to the Exit menu. |
| In any menu, you can load default settings by pressing . You can also press to save any changes made and exit the BIOS Setup Utility |

NOTE: You can change the value of a parameter if it is enclosed in square brackets. Navigation keys for a particular menu are shown on the bottom of the screen. Help for parameters are found in the Item Specific Help part of the screen. Read this carefully when making changes to parameter values. **Please note that system information is subject to different models**.

| Asset Tag Number | This field displays the asset tag number of the system. | |
| Product Name | This field shows product name of the system. | |
| Manufacturer Name | This field displays the manufacturer of this system. | |
| UUID Number | This will be visible only when an internal LAN device is presenting. UUID=32bytes | |

Chapter 2 45

Main

The Main screen displays a summary of your computer hardware information, and also includes basic setup parameters. It allows the user to specify standard IBM PC AT system parameters.

| PhoenixBIOS Setup Utility | | | | |
|---|--|-----------|---------------|--|
| Information Main | Se | curity | Boot | Exit |
| | | | | |
| | | | | Item Specific Help |
| System Time: | [19:03:49] | | | |
| System Date: | [05/11/2006] | | | <tab>, <shift-tab>, or</shift-tab></tab> |
| System Memory: | 640 KB | Shows sys | stem base me | <enter> selects field. mφry size</enter> |
| Extended Memory: | 510 MB | - | ended memor | |
| Video Memory | [64/128MB] | VGA mem | ory size | |
| Quiet Boot: Power on display: Network boot F12 Boot Menu D2D Recovery | [Enabled] [Auto] [Enabled] [Disabled] [Enabled] | | | |
| F1 Help ↑↓ Sele | ect Item | F5/F6 C | Change Values | F9 Setup Defaults |
| Esc Exit ←→ Sele | ect Menu | Enter S | | |

NOTE: The screen above is for your reference only. Actual values may differ.

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

| Parameter | Description | Format/Option |
|------------------|--|---|
| System Time | Sets the system time. The hours are displayed with 24-hour format. | Format: HH:MM:SS (hour:minute:second) System Time |
| System Date | Sets the system date. | Format MM/DD/YYYY (month/day/ year) System Date |
| System Memory | This field reports the memory size of the system. Memory size is fixed to 640MB | |
| Extended Memory | This field reports the memory size of the extended memory in the system. Extended Memory size=Total memory size-1MB | |
| VGA Memory | Shows the VGA memory size. VGA Memory size=64/128MB | |
| Quiet Boot | Determines if Customer Logo will be displayed or not; shows Summary Screen is disabled or enabled. Enabled: Customer Logo is displayed, and Summary Screen is disabled. Disabled: Customer Logo is not displayed, and Summary Screen is enabled. | Option: Enabled or Disabled |
| Power on display | Auto: During power process, the system will detect if any display device is connected on external video port. If any external display device is connected, the power on display will be in CRT (or projector) only mode. Otherwise it will be in LCD only mode. Both: Simultaneously enable both the integrated LCD screen and the system's external video port (for an external CRT or projector). | Option: Auto or Both |
| Network Boot | Enables, disables the system boot from LAN (remote server). | Option: Enabled or Disabled |
| F12 Boot Menu | Enables, disables Boot Menu during POST. | Option: Disabled or Enabled |
| D2D Recovery | Enables, disables D2D Recovery function. The function allows the user to create a hidden partition on hard disc drive to store operation system and restore the system to factory defaults. | Option: Enabled or Disabled |

NOTE: The sub-items under each device will not be shown if the device control is set to disable or auto. This is because the user is not allowed to control the settings in these cases.

Chapter 2 47

Security

The Security screen contains parameters that help safeguard and protect your computer from unauthorized use.

| PhoenixBIOS Setup Utility | | | |
|---|-----------------------------|------------|---|
| Information Main | Security | Boot | Exit |
| User Password is : | Clear | | Item Specific Help |
| Supervisor Password is : Set User Password Set Supervisor Password | Clear [Enter] [Enter] | | Supervisor Password controls accesses of the whole setup utility. |
| Primary HardDisk Security | [Disabled] | | It can be used to boot up when Password on boot is enabled. |
| Password on Boot | [Disabled] | | |
| F1 Help ↑ ↓ Select Item | | Change Va | |
| Esc Exit ←→ Select Menu | u Enter | Select > S | Sub-Menu F10 Save and Exit |

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

| Parameter | Description | Option |
|---------------------------|--|----------------------------|
| User Password is | Shows the setting of the user password. | Clear or Set |
| Supervisor Password is | Shows the setting of the Supervisor password | Clear or Set |
| Set User Password | Press Enter to set the user password. When user password is set, this password protects the BIOS Setup Utility from unauthorized access. The user can enter Setup menu only and does not have right to change the value of parameters. | |
| Set Supervisor Password | Press Enter to set the supervisor password. When set, this password protects the BIOS Setup Utility from unauthorized access. The user can not either enter the Setup menu nor change the value of parameters. | |
| Primary HardDisk Security | Enables or disables primary hard disk security function. | |
| Password on Boot | Defines whether a password is required or not while the events defined in this group happened. The following sub-options are all requires the Supervisor password for changes and should be grayed out if the user password was used to enter setup. | Disabled or Enabled |

NOTE: When you are prompted to enter a password, you have three tries before the system halts. Don't forget your password. If you forget your password, you may have to return your notebook computer to your dealer to reset it.

Setting a Password

Follow these steps as you set the user or the supervisor password:

1. Use the 1 and 1 keys to highlight the Set Supervisor Password parameter and press the key. The Set Supervisor Password box appears:

| Set Supervisor Pas | sword | ÿ. |
|----------------------|-------|----|
| Enter New Password |] |] |
| Confirm New Password | [|] |

2. Type a password in the "Enter New Password" field. The password length can not exceeds 8 alphanumeric characters (A-Z, a-z, 0-9, not case sensitive). Retype the password in the "Confirm New Password" field.

IMPORTANT:Be very careful when typing your password because the characters do not appear on the screen.

- 3. Press ENTER .
 - After setting the password, the computer sets the User Password parameter to "Set".
- 4. If desired, you can opt to enable the Password on boot parameter.

Chapter 2 49

Removing a Password

Follow these steps:

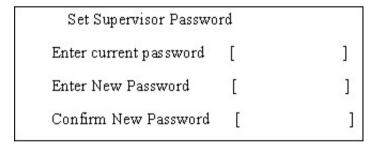

1. Use the 1 and 1 keys to highlight the Set Supervisor Password parameter and press the key. The Set Password box appears:

| Set Supervisor Password | | |
|-------------------------|---|---|
| Enter current password | [|] |
| Enter New Password |] |] |
| Confirm New Password | [|] |

- 2. Type the current password in the Enter Current Password field and press 🔤 .
- 3. Press twice without typing anything in the Enter New Password and Confirm New Password fields. The computer then sets the Supervisor Password parameter to "Clear".
- 4. When you have changed the settings, press of to save the changes and exit the BIOS Setup Utility.

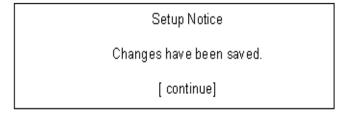

Changing a Password

1. Use the 1 and 1 keys to highlight the Set Supervisor Password parameter and press the key. The Set Password box appears:

- 2. Type the current password in the Enter Current Password field and press [street].
- 3. Type a password in the Enter New Password field. Retype the password in the Confirm New Password field.
- 4. Press [size]. After setting the password, the computer sets the User Password parameter to "Set".
- 5. If desired, you can enable the Password on boot parameter.
- 6. When you are done, press of to save the changes and exit the BIOS Setup Utility.

If the verification is OK, the screen will display as following.

The password setting is complete after the user presses .

If the current password entered does not match the actual current password, the screen will show you the Setup Warning.

Setup Warning Invalid password Re-enter Password [continue]

If the new password and confirm new password strings do not match, the screen will display the following message.

Setup Warning

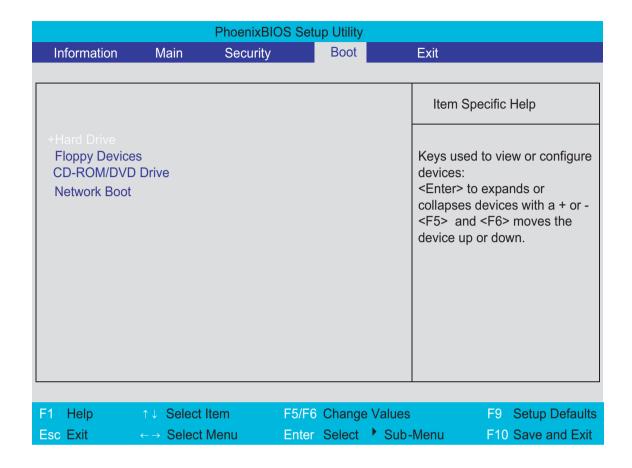

Password do not match

Re-enter Password

Chapter 2 51

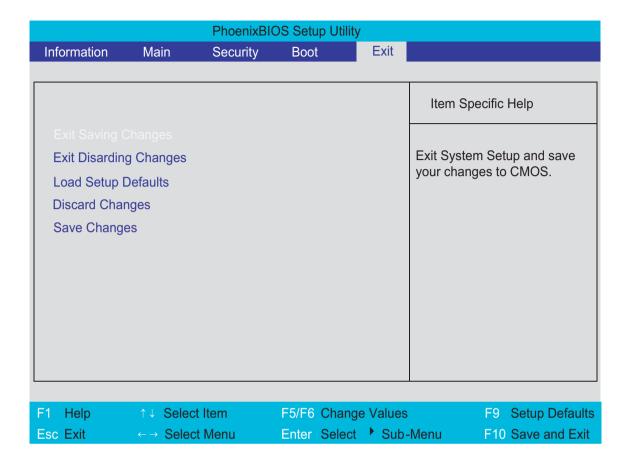

Boot

This menu allows the user to decide the order of boot devices to load the operating system. Bootable devices includes the distette drive in module bay, the onboard hard disk drive and the CD-ROM in module bay.

Exit

The Exit screen contains parameters that help safeguard and protect your computer from unauthorized use.

The table below describes the parameters in this screen.

| Parameter | Description |
|-------------------------|---|
| Exit Saving Changes | Exit System Setup and save your changes to CMOS. |
| Exit Discarding Changes | Exit utility without saving setup data to CMOS. |
| Load Setup Default | Load default values for all SETUP item. |
| Discard Changes | Load previous values from CMOS for all SETUP items. |
| Save Changes | Save Setup Data to CMOS. |

Chapter 2 53

BIOS Flash Utility

The BIOS flash memory update is required for the following conditions:

- New versions of system programs
- New features or options
- Restore a BIOS when it becomes corrupted.

Use the Phlash utility to update the system BIOS flash ROM.

NOTE: If you do not have a crisis recovery diskette at hand, then you should create a Crisis Recovery

Diskette before you use the Phlash utility.

NOTE: Do not install memory-related drivers (XMS, EMS, DPMI) when you use the Phlash.

NOTE: Please use the AC adaptor power supply when you run the Phlash utility. If the battery pack does not contain enough power to finish BIOS flash, you may not boot the system because the BIOS is not completely loaded.

Fellow the steps below to run the Phlash.

- 1. Prepare a bootable diskette.
- 2. Copy the flash utilities to the bootable diskette.
- 3. Then boot the system from the bootable diskette. The flash utility has auto-execution function.

Machine Disassembly and Replacement

This chapter contains step-by-step procedures on how to disassemble the notebook computer for maintenance and troubleshooting.

To disassemble the computer, you need the following tools:

| Wrist grounding strap and conductive mat for preventing electrostatic discharge |
|---|
| Small Philips screw driver |
| Philips screwdriver |
| Plastic flat head screw driver |
| Tweezers |

NOTE: The screws for the different components vary in size. During the disassembly process, group the screws with the corresponding components to avoid mismatch when putting back the components. When you remove the stripe cover, please be careful not to scrape the cover.

Chapter 3 55

General Information

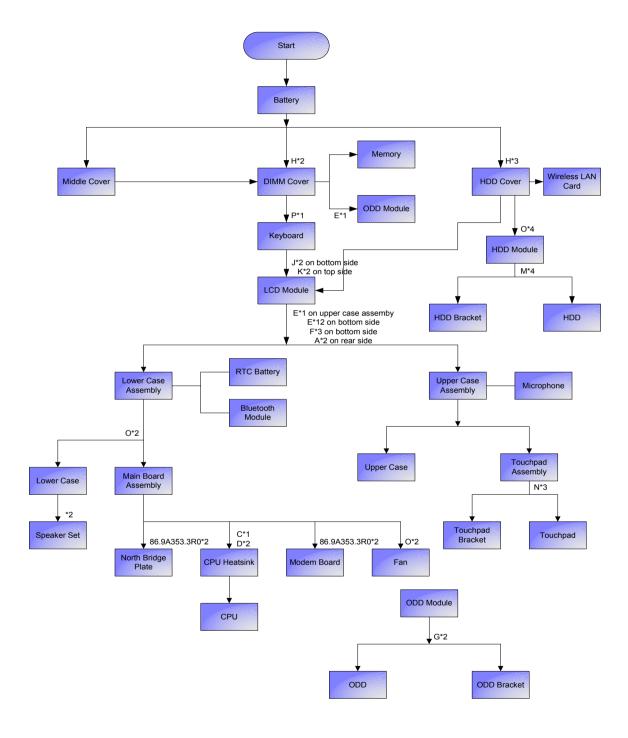

Before You Begin

Before proceeding with the disassembly procedure, make sure that you do the following:

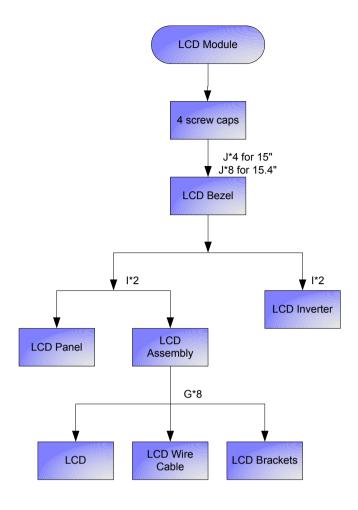

- 1. Turn off the power to the system and all peripherals.
- 2. Unplug the AC adapter and all power and signal cables from the system.
- 3. Remove the battery pack.

Disassembly Procedure Flowchart

The flowchart on the succeeding page gives you a graphic representation on the entire disassembly sequence and instructs you on the components that need to be removed during servicing. For example, if you want to remove the system board, you must first remove the keyboard, then disassemble the inside assembly frame in that order.

Chapter 3 57

Screw List

| Item | Description | Part Number |
|------|--------------------------------|--------------------------------|
| Α | SCW HEX NYL I#R-40/O#4-40 L5.5 | 34.00015.081 |
| В | SCREW MACH WAFER M2*L4 NI | 86.00059.220 (PC Card slot x4) |
| С | CPU SCREW M2.5*4.3L (2.3 KG) | 86.00D01.230 |
| D | CPU SCREW M2.5*4.3L (1.55 KG) | 86.00D02.230 |
| Е | SCREW M2.5-6 | 86.9A323.6R0 |
| F | SCRW M2.5*L8(NON NYLOK) | 86.9A323.8R0 |
| G | SCREW M2*3 NYLON 1JMCPC-420325 | 86.9A352.3R0 |
| Н | SCREW | 86.9A352.4R0 |
| I | SCREW M2.5*4L(NYLOCK)BLACK ZN | 86.9A353.4R0 |
| J | SCREW M2.5X6 | 86.9A353.6R0 |
| K | SRW M2.5*8L B/ZN NYLOK 700 | 86.9A353.8R0 |
| L | SCRW M2.5*L3(NON NYLOK) | 86.9A523.3R0 |
| М | SCREW M3x4(86.9A524.4R0) | 86.9A524.4R0 |
| N | SCREW WAFER NYLOK NI 2ML3 | 86.9A552.3R0 |
| 0 | SCRW M2*4 WAFER NI | 86.9A552.4R0 |
| Р | SCRW M2.5*3 WAFER NI | 86.9A553.3R0 |

Removing the Battery Pack

- 1. Unlock the battery lock.
- 2. Slide the battery latch then remove the battery.

Chapter 3 59

Removing the Wireless LAN Card/the HDD Module/the Memory/the ODD Module and the LCD Module

Removing the Memory and the HDD Module

- 1. Remove the five screws fastening the DIMM cover.
- 2. Detach the DIMM cover carefully.

- 3. Pop out the memory carefully.
- 4. Disconnect wireless main and auxiliary antenna from the wireless LAN card.
- 5. Pop out the wireless LAN card and remove it.

- 6. Remove the three screwss fastening the HDD cover.
- 7. Detach the HDD cover from the main unit.

- 8. Remove the four screws fastening the HDD module.
- 9. Then detach the HDD module carefully.

Removing the ODD Module

- 1. First, remove the screw fastening the ODD module as shown.
- 2. Push the ODD module outwards then remove it.

Removing the LCD Module

- 1. Detach the middle cover from the main uiit carefully.
- 2. Disconnect the launch board FFC from the launch board.

- 3. Remove the middle cover (with launch board and microphone) from the main unit.
- **4.** Disconnect the microphone cable from the launch board.

Chapter 3 61

- **5.** Take out the microphone from the middle cover.
- 6. Remove the two screws fastening the launch board.
- 7. Then remove the launch board from the middle cover.

- 8. Remove the screw holding the keyboard.
- **9.** Turn over the keyboard as shown.
- 10. Disconnect the keyboard cable.

- 11. Remove the keyboard from the main unit.
- **12.** Tear off the tapes fastening the wireless antenna cable.

- 13. Pull the antenna set from the main unit.
- 14. Disconnect the LCD cable.
- **15.** Turn over the notebook then remove two screws fastening the LCD module.

- **16.** Remove two screws fastening the LCD hinges.
- 17. Then detach the LCD module from the main unit.

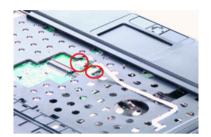

Chapter 3 63

Disassembling the Main Unit

Separate the Main Unit Into the Upper and the Lower Case Assembly

- 1. Disconnect the touchpad cable and the LED FFC from the main board.
- 2. Remove the 15 screws on the bottom as shown.
- 3. Detach the upper case assembly from the lower case assembly carefully.

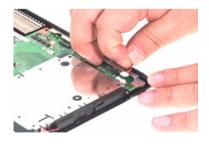

Disassembling the Lower Case Assembly

- 4. Turn over the lower case assembly to the bottom side, then disconnect the fan cable.
- 5. Turn over the lower case assemlby to the fron side, then detach the bluetooth module.

- 6. Disconnect the Bluetooth cable from the main board.
- 7. Disconnect the Bluetooth cable from the Bluetooth module as shown.

- 8. Disconnect the speaker set cable from the main board.
- 9. Remove the four screws fastening the main board to the lower case.
- 10. Detach the main board from the lower case carefully.

- 11. Remove the two screws holding the speaker set.
- **12.** Take out the speaker set from the lower case.

- **13.** Remove the three screws fastening the system fan.
- **14.** Detach the fan from the lower case.

- 15. Disconnect the RTC battery cable then detach the RTC battery.
- **16.** Disconnect the launch board FFC from the main board.

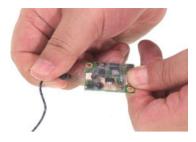

- 17. Disconnect the modem cable from the main board.
- **18.** Disconnect the modem board from the main board.
- 19. Disconnect the modem cable from the modem board as shown.

Chapter 3 65

- 20. Remove the five screws fastening the heatsink.
- 21. Remove the heatsink from the main board.

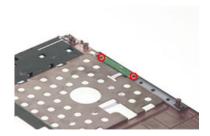

- 22. Use a flat-headed screwdriver to release the CPU socket lock.
- 23. Remove the CPU from the CPU socket carefully.

Disassembling the Upper Case Assembly

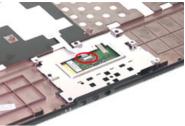

- 1. Remove the two screws fastening the LED board.
- 2. The remove the LED board from the upper case assembly carefully.

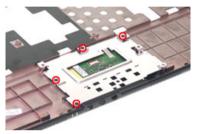

- 3. Disconnect the LED board FFC from the LED board.
- 4. Disconnect the touchpad FFC then remove it.

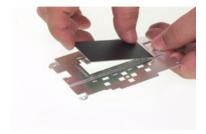

- **5.** Remove the four screws fastening the touchpad bracket.
- **6.** Remove the touchpad bracket (with touchpad).
- 7. Detach the touchpad from the touchpad bracke.t

Chapter 3 67

Disassembling the LCD Module (with video camera)

- 1. Remove the four screw caps as shown.
- 2. Remove the four screws holding the LCD bezel.
- 3. Then detach the LCD bezel from the LCD module.

- 4. Remove the two screws fastening the LCD inverter.
- 5. Take out the LCD inverter from the LCD cover, then disconnect the LCD cable from the inverter.
- **6.** Remove the two screws holding the digital camera to the LCD panel.

- 7. Detach the CCD panel from the CCD bezel assembly.
- 8. Disconnect digital camera to LCD cable as shown.
- 9. Remove the two screws fastening the CCD.

- 10. Take out the CCD from the CCD bezel.
- 11. Then remove the CCD hinge from the CCD bezel.
- **12.** Slide the CCD latch to the right to remove the CCD latch.

NOTE: The edges of the CCD latch is very fragile, please practice this step very carefully.

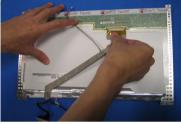

- 13. Take out the LCD assembly from the LCD panel.
- 14. Disconnect the LCD cable from the LCD.
- **15.** Tear off the tape fastening the LCD cable and detach the LCD cable from the LCD.

- 16. Remove the two screws holding the wireless antenna set to the LCD panel.
- 17. Take out the wireless antenna set from the LCD panel.
- 18. Remove the two screws holding the LCD hinges then remove the hinges.

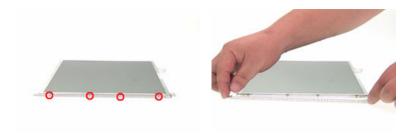

- 19. Remove the four screws fastening the LCD right bracket.
- 20. Remove the right bracket from the LCD.

- 21. Remove the four screws fastening the LCD left bracket.
- 22. Remove the left bracket from the LCD.

Chapter 3 69

Disassembling the External Modules

Disassembling the HDD Module

- 1. Remove the four screws fastening the HDD bracket.
- 2. Remove the HDD bracket.

Disassembling the ODD Module

- 1. Remove the two screws holding the ODD fix holder bracket.
- 2. Then remove the ODD fix holder bracket.
- 3. Reove the two screws fastening the ODD rail bracket then remove the rail bracket.

Chapter 3 71

Troubleshooting

Use the following procedure as a guide for computer problems.

NOTE: The diagnostic tests are intended to test only Acer products. Non-Acer products, prototype cards, or modified options can give false errors and invalid system responses.

- 1. Obtain the failing symptoms in as much detail as possible.
- 2. Verify the symptoms by attempting to re-create the failure by running the diagnostic test or by repeating the same operation.
- 3. Use the following table with the verified symptom to determine which page to go to.

| Symptoms (Verified) | Go To |
|---|---|
| Power failure. (The power indicator does not go on or stay on.) | "Power System Check" on page 73. |
| POST does not complete. No beep or error codes are indicated. | "Power-On Self-Test (POST) Error Message" on page 76 "Undetermined Problems" on page 88 |
| POST detects an error and displayed messages on screen. | "Error Message List" on page 77 |
| Other symptoms (i.e. LCD display problems or others). | "Power-On Self-Test (POST) Error Message" on page 76 |
| Symptoms cannot be re-created (intermittent problems). | Use the customer-reported symptoms and go to "Power-On Self-Test (POST) Error Message" on page 76 "Intermittent Problems" on page 87 "Undetermined Problems" on page 88 |

System Check Procedures

External Diskette Drive Check

Do the following to isolate the problem to a controller, driver, or diskette. A write-enabled, diagnostic diskette is required.

NOTE: Make sure that the diskette does not have more than one label attached to it. Multiple labels can cause damage to the drive or cause the drive to fail.

Do the following to select the test device.

- 1. Boot from the diagnostics diskette and start the diagnostics program.
- See if FDD Test is passed as the program runs to FDD Test.
- 3. Follow the instructions in the message window.

If an error occurs with the internal diskette drive, reconnect the diskette connector on the system board.

If the error still remains:

- 1. Reconnect the external diskette drive/DVD-ROM module.
- 2. Replace the external diskette drive/CD-ROM module.
- 3. Replace the main board.

External CD-ROM Drive Check

Do the following to isolate the problem to a controller, drive, or CD-ROM. Make sure that the CD-ROM does not have any label attached to it. The label can cause damage to the drive or can cause the drive to fail.

Do the following to select the test device:

- Boot from the diagnostics diskette and start the diagnostics program.
- 2. See if CD-ROM Test is passed when the program runs to CD-ROM Test.
- 3. Follow the instructions in the message window.

If an error occurs, reconnect the connector on the System board. If the error still remains:

- 1. Reconnect the external diskette drive/CD-ROM module.
- 2. Replace the external diskette drive/CD-ROM module.
- 3. Replace the main board.

Keyboard or Auxiliary Input Device Check

Remove the external keyboard if the internal keyboard is to be tested.

If the internal keyboard does not work or an unexpected character appears, make sure that the flexible cable extending from the keyboard is correctly seated in the connector on the system board.

If the keyboard cable connection is correct, run the Keyboard Test.

If the tests detect a keyboard problem, do the following one at a time to correct the problem. Do not replace a non-defective FRU:

- 1. Reconnect the keyboard cables.
- 2. Replace the keyboard.
- Replace the main board.

The following auxiliary input devices are supported by this computer:

| Num | | |
|-----|--|--|
| | | |
| | | |

External keyboard

If any of these devices do not work, reconnect the cable connector and repeat the failing operation.

Memory check

Memory errors might stop system operations, show error messages on the screen, or hang the system.

- 1. Boot from the diagnostics diskette and start the doagmpstotics program (please refer to main board.
- 2. Go to the diagnostic memory in the test items.
- 3. Press F2 in the test items.
- 4. Follow the instructions in the message window.

NOTE: Make sure that the DIMM is fully installed into the connector. A loose connection can cause an error.

Power System Check

To verify the symptom of the problem, power on the computer using each of the following power sources:

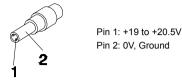

- 1. Remove the battery pack.
- 2. Connect the power adapter and check that power is supplied.
- 3. Disconnect the power adapter and install the charged battery pack; then check that power is supplied by the battery pack.

If you suspect a power problem, see the appropriate power supply check in the following list:

- □ "Check the Power Adapter" on page 74
- ☐ "Check the Battery Pack" on page 75

Check the Power Adapter

Unplug the power adapter cable from the computer and measure the output voltage at the plug of the power adapter cable. See the following figure

- 1. If the voltage is not correct, replace the power adapter.
- **2.** If the voltage is within the range, do the following:
 - Replace the System board.
 - ☐ If the problem is not corrected, see "Undetermined Problems" on page 88.
 - ☐ If the voltage is not correct, go to the next step.

NOTE: An audible noise from the power adapter does not always indicate a defect.

- **3.** If the power-on indicator does not light up, check the power cord of the power adapter for correct continuity and installation.
- 4. If the operational charge does not work, see "Check the Battery Pack" on page 75.

Check the Battery Pack

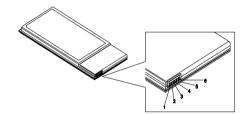

To check the battery pack, do the following:

From Software:

- 1. Check out the Power Management in control Panel
- In Power Meter, confirm that if the parameters shown in the screen for Current Power Source and Total Battery Power Remaining are correct.
- 3. Repeat the steps 1 and 2, for both battery and adapter.
- 4. This helps you identify first the problem is on recharging or discharging.

From Hardware:

- 1. Power off the computer.
- Remove the battery pack and measure the voltage between battery terminals 1(+) and 6(ground). See the following figure

3. If the voltage is still less than 7.5 Vdc after recharging, replace the battery.

To check the battery charge operation, use a discharged battery pack or a battery pack that has less than 50% of the total power remaining when installed in the computer.

If the battery status indicator does not light up, remove the battery pack and let it return to room temperature. Re-install the battery pack.

If the charge indicator still does not light up, replace the battery pack. If the charge indicator still does not light up, replace the DC/DC charger board.

Touchpad Check

If the touchpad doesn't work, do the following actions one at a time to correct the problem. Do not replace a non-defective FRU:

- 1. Reconnect the touchpad cables.
- 2. Replace the touchpad.
- 3. Replace the system board.

After you use the touchpad, the pointer drifts on the screen for a short time. This self-acting pointer movement can occur when a slight, steady pressure is applied to the touchpad pointer. This symptom is not a hardware problem. No service actions are necessary if the pointer movement stops in a short period of time.

Power-On Self-Test (POST) Error Message

The POST error message index lists the error message and their possible causes. The most likely cause is listed first.

NOTE: Perform the FRU replacement or actions in the sequence shown in FRU/Action column, if the FRU replacement does not solve the problem, put the original part back in the computer. Do not replace a non-defective FRU.

This index can also help you determine the next possible FRU to be replaced when servicing a computer.

If the symptom is not listed, see "Undetermined Problems" on page 88.

The following lists the error messages that the BIOS displays on the screen and the error symptoms classified by function.

NOTE: Most of the error messages occur during POST. Some of them display information about a hardware device, e.g., the amount of memory installed. Others may indicate a problem with a device, such as the way it has been configured.

NOTE: If the system fails after you make changes in the BIOS Setup Utility menus, reset the computer, enter Setup and install Setup defaults or correct the error.

Index of Error Messages

Error Code List

| Error Codes | Error Messages | |
|----------------------------|--|--|
| 006 | Equipment Configuration Error | |
| | Causes: | |
| | CPU BIOS Update Code Mismatch | |
| | 2. IDE Primary Channel Master Drive Error | |
| | (THe causes will be shown before "Equipment Configuration Error") | |
| 010 | Memory Error at xxxx:xxxx:xxxxh (R:xxxxh, W:xxxxh) | |
| 070 | Real Time Clock Error | |
| 071 | CMOS Battery Bad | |
| 072 | CMOS Checksum Error | |
| 110 | System disabled. | |
| | Incorrect password is specified. | |
| <no code="" error=""></no> | Battery critical LOW | |
| | In this situation BIOS will issue 4 short beeps then shut down system, no message will show. | |
| <no code="" error=""></no> | Thermal critical High | |
| | In this situation BIOS will shut down system, not show message. | |

Error Message List

| Error Messages | FRU/Action in Sequence |
|--|--|
| Failure Fixed Disk | Reconnect hard disk drive connector. |
| | "Load Default Settings" in BIOS Setup Utility. |
| | Hard disk drive |
| | System board |
| Stuck Key | see "Keyboard or Auxiliary Input Device Check" on page 72. |
| Keyboard error | see "Keyboard or Auxiliary Input Device Check" on page 72. |
| Keyboard Controller Failed | see "Keyboard or Auxiliary Input Device Check" on page 72. |
| Keyboard locked - Unlock key switch | Unlock external keyboard |
| Monitor type does not match CMOS - Run Setup | Run "Load Default Settings" in BIOS Setup Utility. |
| Shadow RAM Failed at offset: nnnn | BIOS ROM |
| | System board |
| System RAM Failed at offset: nnnn | DIMM |
| | System board |
| Extended RAM Failed at offset: nnnn | DIMM |
| | System board |
| System battery is dead - Replace and run Setup | Replace RTC battery and Run BIOS Setup Utility to reconfigure system time, then reboot system. |
| System CMOS checksum bad - Default | RTC battery |
| configuration used | Run BIOS Setup Utility to reconfigure system time, then reboot system. |
| System timer error | RTC battery |
| | Run BIOS Setup Utility to reconfigure system time, then reboot system. |
| | System board |

Error Message List

| Error Messages | FRU/Action in Sequence |
|---|---|
| Real time clock error | RTC battery |
| | Run BIOS Setup Utility to reconfigure system time, then reboot |
| | system. |
| | System board |
| Previous boot incomplete - Default configuration used | Run "Load Default Settings" in BIOS Setup Utility. |
| used | RTC battery |
| Manager at the POOT different form | System board |
| Memory size found by POST differed from CMOS | Run "Load Default Settings" in BIOS Setup Utility. DIMM |
| | System board |
| Diskette drive A error | Check the drive is defined with the proper diskette type in BIOS |
| Diskette drive A error | Setup Utility |
| | See "External Diskette Drive Check" on page 72. |
| Incorrect Drive A type - run SETUP | Check the drive is defined with the proper diskette type in BIOS |
| | Setup Utility |
| System cache error - Cache disabled | System board |
| CPU ID: | System board |
| DMA Test Failed | DIMM |
| | System board |
| Software NMI Failed | DIMM |
| | System board |
| Fail-Safe Timer NMI Failed | DIMM |
| | System board |
| Device Address Conflict | Run "Load Default Settings" in BIOS Setup Utility. |
| | RTC battery |
| | System board |
| Allocation Error for device | Run "Load Default Settings" in BIOS Setup Utility. |
| | RTC battery |
| | System board |
| Failing Bits: nnnn | DIMM |
| | BIOS ROM |
| 5 5 | System board |
| Fixed Disk n | None |
| Invalid System Configuration Data | BIOS ROM |
| 110 1 1 170 171 | System board |
| I/O device IRQ conflict | Run "Load Default Settings" in BIOS Setup Utility. |
| | RTC battery |
| Operating eveters not formal | System board |

Error Message List

| No beep Error Messages | FRU/Action in Sequence |
|---|--|
| No beep, power-on indicator turns off and LCD is blank. | Power source (battery pack and power adapter). See "Power System Check" on page 73 |
| | Ensure every connector is connected tightly and correctly. |
| | Reconnect the DIMM. |
| | LED board. |
| | System board. |
| No beep, power-on indicator turns on and LCD is blank. | Power source (battery pack and power adapter). See "Power System Check" on page 73 |
| | Reconnect the LCD connector |
| | Hard disk drive |
| | LCD inverter ID |
| | LCD cable |
| | LCD Inverter |
| | LCD |
| | System board |
| No beep, power-on indicator turns on and LCD is | Reconnect the LCD connectors. |
| blank. But you can see POST on an external | LCD inverter ID |
| CRT. | LCD cable |
| | LCD inverter |
| | LCD |
| | System board |
| No beep, power-on indicator turns on and a | Ensure every connector is connected tightly and correctly. |
| blinking cursor shown on LCD during POST. | System board |
| No beep during POST but system runs correctly. | Speaker |
| | System board |

Phoenix BIOS Beep Codes

| Code | Beeps | POST Routine Description |
|------|---------|--|
| 02h | | Verify Real Mode |
| 03h | | Disable Non-Maskable Interrupt (NMI) |
| 04h | | Get CPU type |
| 06h | | Initialize system hardware |
| 08h | | Initialize chipset with initial POST values |
| 09h | | Set IN POST flag |
| 0Ah | | Initialize CPU registers |
| 0Bh | | Enable CPU cache |
| 0Ch | | Initialize caches to initial POST values |
| 0Eh | | Initialize I/O component |
| 0Fh | | Initialize the local bus IDE |
| 10h | | Initialize Power Management |
| 11h | | Load alternate registers with initial POST values |
| 12h | | Restore CPU control word during warm boot |
| 13h | | Initialize PCI Bus Mastering devices |
| 14h | | Initialize keyboard controller |
| 16h | 1-2-2-3 | BIOS ROM checksum |
| 17h | | Initialize cache before memory autosize |
| 18h | | 8254 timer initialization |
| 1Ah | | 8237 DMA controller initialization |
| 1Ch | | Reset Programmable Interrupt Controller |
| 20h | 1-3-1-1 | Test DRAM refresh |
| 22h | 1-3-1-3 | Test 8742 Keyboard Controller |
| 24h | | Set ES segment register to 4 GB |
| 26h | | Enable A20 line |
| 28h | | Autosize DRAM |
| 29h | | Initialize POST Memory Manager |
| 2Ah | | Clear 215 KB base RAM |
| 2Ch | 1-3-4-1 | RAM failure on address line xxxx |
| 2Eh | 1-3-4-3 | RAM failure on data bits xxxx of low byte of memory bus |
| 2Fh | | Enable cache before system BIOS shadow |
| 30h | 1-4-1-1 | RAM failure on data bits xxxx of high byte of memory bus |
| 32h | | Test CPU bus-clock frequency |
| 33h | | Initialize Phoenix Dispatch Manager |
| 36h | | Warm start shut down |
| 38h | | Shadow system BIOS ROM |
| 3Ah | | Autosize cache |
| 3Ch | | Advanced configuration of chipset registers |
| 3Dh | | Load alternate registers with CMOS values |
| 42h | | Initialize interrupt vectors |
| 45h | | POST device initialization |

| 46h 2-1-2-3 Check ROM copyright notice 48h Check video configuration against CMOS 49h Initialize PCI bus and devices | |
|--|------|
| , , , | |
| 49h Initialize PCI bus and devices | |
| | |
| 4Ah Initialize all video adapters in system | |
| 4Bh QuietBoot start (optional) | |
| 4Ch Shadow video BIOS ROM | |
| 4Eh Display BIOS copyright notice | |
| 50h Display CPU type and speed | |
| 51h Initialize EISA board | |
| 52h Test keyboard | |
| 54h Set key click if enabled | |
| 58h 2-2-3-1 Test for unexpected interrupts | |
| 59h Initialize POST display service | |
| 5Ah Display prompt "Press F2 to enter SETUP | " |
| 5Bh Disable CPU cache | |
| 5Ch Test RAM between 512 and 640 KB | |
| 60h Test extended memory | |
| 62h Test extended memory address lines | |
| 64h Jump to User Patch1 | |
| 66h Configure advanced cache registers | |
| 67h Initialize Multi Processor APIC | |
| 68h Enable external and CPU caches | |
| 69h Setup System Management Mode (SMM) | area |
| 6Ah Display external L2 cache size | |
| 6Bh Load custom defaults (optional) | |
| 6Ch Display shadow-area message | |
| 6Eh Display possible high address for UMB | |
| recovery | |
| 70h Display error messages | |
| 72h Check for configuration errors | |
| 76h Check for keyboard errors | |
| 7Ch Set up hardware interrupt vectors | |
| 7Eh Initialize coprocessor if present | |
| 80h Disable onboard Super I/O ports and IRQ: | 6 |
| 81h Late POST device initialization | |
| 82h Detect and install external RS232 ports | |
| 83h Configure non-MCD IDE controllers | |
| 84h Detect and install external parallel ports | |
| 85h Initialize PC-compatible PnP ISA devices | |
| 86h Re-initialize onboard I/O ports | |
| 87h Configure Motherboard Configurable Devi (optional) | ces |
| 88h Initialize BIOS Area | |
| 89h Enable Non-Maskable Interrupts (NMIs) | |
| 8Ah Initialize Extended BIOS Data Area | |
| 8Bh Test and initialize PS/2 mouse | |

Index of Symptom-to-FRU Error Message

LCD-Related Symptoms

| Symptom / Error | Action in Sequence |
|--|---|
| LCD backlight doesn't work | Enter BIOS Utility to execute "Load Setup Default Settings", then |
| LCD is too dark | reboot system. |
| LCD brightness cannot be adjusted | Reconnect the LCD connectors. |
| LCD contrast cannot be adjusted | Keyboard (if contrast and brightness function key doesn't work). |
| - | LCD inverter ID |
| | LCD cable |
| | LCD inverter |
| | LCD |
| | System board |
| Unreadable LCD screen | Reconnect the LCD connector |
| Missing pels in characters | LCD inverter ID |
| Abnormal screen | LCD cable |
| Wrong color displayed | LCD inverter |
| | LCD |
| | System board |
| LCD has extra horizontal or vertical lines | LCD inverter ID |
| displayed. | LCD inverter |
| | LCD cable |
| | LCD |
| | System board |

Indicator-Related Symptoms

| Symptom / Error | Action in Sequence |
|---|------------------------------|
| Indicator incorrectly remains off or on, but system | Reconnect the inverter board |
| runs correctly | Inverter board |
| | System board |

Power-Related Symptoms

| Symptom / Error | Action in Sequence |
|-------------------------------|---|
| 5 . | Power source (battery pack and power adapter). See "Power |
| | System Check" on page 73. |
| | Battery pack |
| | Power adapter |
| | Hard drive & battery connection board |
| | System board |
| The system doesn't power-on. | Power source (battery pack and power adapter). See "Power |
| | System Check" on page 73. |

| | Power adapter |
| | Hard drive & battery connection board |
| | System board |
| The system doesn't power-off. | Power source (battery pack and power adapter). See "Power |
| | System Check" on page 73. |
| | Hold and press the power switch for more than 4 seconds. |
| | System board |

Power-Related Symptoms

| Symptom / Error | Action in Sequence |
|--------------------------|--|
| Battery can't be charged | See "Check the Battery Pack" on page 75. |
| | Battery pack |
| | System board |

PCMCIA-Related Symptoms

| Symptom / Error | Action in Sequence |
|---|----------------------|
| System cannot detect the PC Card (PCMCIA) | PCMCIA slot assembly |
| | System board |
| PCMCIA slot pin is damaged. | PCMCIA slot assembly |

Memory-Related Symptoms

| Symptom / Error | Action in Sequence |
|-----------------|---|
| , , , , , | Enter BIOS Setup Utility to execute "Load Default Settings, then reboot system. |
| actual Size. | DIMM |
| | System board |

Speaker-Related Symptoms

| Symptom / Error | Action in Sequence |
|--|--------------------|
| In Windows, multimedia programs, no sound | Audio driver |
| comes from the computer. | Speaker |
| | System board |
| Internal speakers make noise or emit no sound. | Speaker |
| | System board |

Power Management-Related Symptoms

| Symptom / Error | Action in Sequence |
|--|--|
| The system will not enter hibernation | See "Save to Disk (S4)" on page 41. |
| | Keyboard (if control is from the keyboard) |
| | Hard disk drive |
| | System board |
| The system doesn't enter hibernation mode and four short beeps every minute. | Press Fn+ 🔼 and see if the computer enters hibernation mode. |
| lour short beeps every minute. | Touchpad |
| | Keyboard |
| | Hard disk connection board |
| | Hard disk drive |
| | System board |
| The system doesn't enter standby mode after | See "Save to Disk (S4)" on page 41. |
| closing the LCD | LCD cover switch |
| | System board |
| The system doesn't resume from hibernation | See "Save to Disk (S4)" on page 41. |
| mode. | Hard disk connection board |
| | Hard disk drive |
| | System board |
| The system doesn't resume from standby mode after opening the LCD. | See "Save to Disk (S4)" on page 41. |
| | LCD cover switch |
| | System board |

Power Management-Related Symptoms

| Symptom / Error | Action in Sequence |
|---|---|
| Battery fuel gauge in Windows doesn't go higher than 90%. | Remove battery pack and let it cool for 2 hours. Refresh battery (continue use battery until power off, then charge battery). Battery pack System board |
| System hangs intermittently. | Reconnect hard disk/CD-ROM drives. Hard disk connection board System board |

Peripheral-Related Symptoms

| Symptom / Error | Action in Sequence |
|---|--|
| | Enter BIOS Setup Utility to execute "Load Default Settings", then reboot system. |
| | Reconnect hard disk/CD-ROM/diskette drives. |
| External display does not work correctly. | Press Fn+F5, LCD/CRT/Both display switching |
| | System board |
| USB does not work correctly | System board |
| Print problems. | Ensure the "Parallel Port" in the "Onboard Devices Configuration" of BIOS Setup Utility is set to Enabled. |
| | Onboard Devices Configuration |
| | Run printer self-test. |
| | Printer driver |
| | Printer cable |
| | Printer |
| | System Board |
| Serial or parallel port device problems. | Ensure the "Serial Port" in the Devices Configuration" of BIOS Setup Utility is set to Enabled. |
| | Device driver |
| | Device cable |
| | Device |
| | System board |

Keyboard/Touchpad-Related Symptoms

| Symptom / Error | Action in Sequence |
|--|-------------------------------|
| Keyboard (one or more keys) does not work. | Reconnect the keyboard cable. |
| | Keyboard |
| | System board |
| Touchpad does not work. | Reconnect touchpad cable. |
| | Touchpad board |
| | System board |

Modem-Related Symptoms

| Symptom / Error | Action in Sequence |
|---|--------------------|
| Internal modem does not work correctly. | Modem phone port |
| | modem combo board |
| | System board |

NOTE: If you cannot find a symptom or an error in this list and the problem remains, see "Undetermined Problems" on page 88.

Intermittent Problems

Intermittent system hang problems can be caused by a variety of reasons that have nothing to do with a hardware defect, such as: cosmic radiation, electrostatic discharge, or software errors. FRU replacement should be considered only when a recurring problem exists.

When analyzing an intermittent problem, do the following:

- 1. Run the advanced diagnostic test for the system board in loop mode at least 10 times.
- 2. If no error is detected, do not replace any FRU.
- 3. If any error is detected, replace the FRU. Rerun the test to verify that there are no more errors.

Undetermined Problems

The diagnostic problems does not identify which adapter or device failed, which installed devices are incorrect, whether a short circuit is suspected, or whether the system is inoperative.

Follow these procedures to isolate the failing FRU (do not isolate non-defective FRU).

NOTE: Verify that all attached devices are supported by the computer.

NOTE: Verify that the power supply being used at the time of the failure is operating correctly. (See "Power System Check" on page 73.):

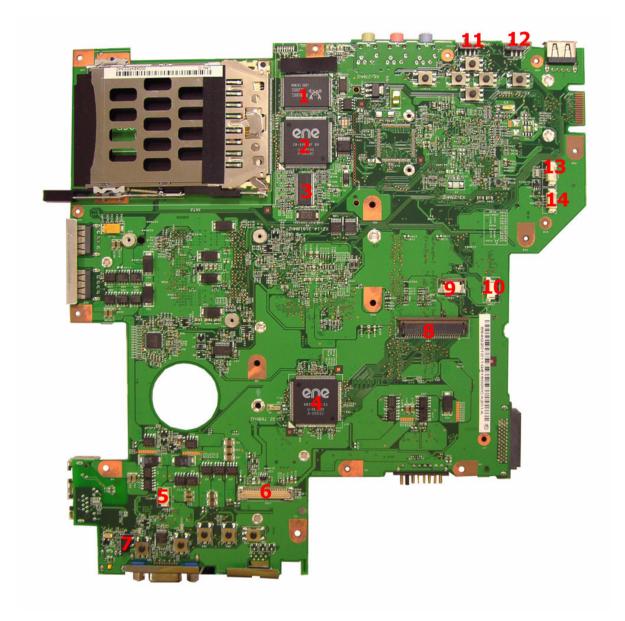

- 1. Power-off the computer.
- 2. Visually check them for damage. If any problems are found, replace the FRU.
- 3. Remove or disconnect all of the following devices:

| Non-Acer devices |
|--|
| Printer, mouse, and other external devices |
| Battery pack |
| Hard disk drive |
| DIMM |
| CD-ROM/Diskette drive Module |
| PC Cards |

- 4. Power-on the computer.
- 5. Determine if the problem has changed.
- 6. If the problem does not recur, reconnect the removed devices one at a time until you find the failing FRU.
- 7. If the problem remains, replace the following FRU one at a time. Do not replace a non-defective FRU:
 - System board
 - LCD assembly

| 12 | CDROM1 | ODD connector | 23 | BAT1 | System battery module connector |

Jumper Settings/Clear BIOS Password Procedures

1. Remove the DIMM cover and the lower DDR2 memory module, then find out the G70 position on the main board. Please just the lower DDR2 memory module, you will need the upper DDR2 memory module to boot up the system.

2. Use a tweezers or a screwdriver to short the G70 pad and remain the short status.

3. Power on the system until POST is completed. Then you can release the tweezers or screwdriver. The BIOS password should be cleared after these steps.

Chapter 5 91

FRU (Field Replaceable Unit) List

This chapter gives you the FRU (Field Replaceable Unit) listing in global configurations of Aspire 3640/TravelMate 2440. Refer to this chapter whenever ordering for parts to repair or for RMA (Return Merchandise Authorization).

Please note that WHEN ORDERING FRU PARTS, you should check the most up-to-date information available on your regional web or channel. For whatever reasons a part number change is made, it will not be noted on the printed Service Guide. For ACER AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code from those given in the FRU list of this printed Service Guide. You MUST use the local FRU list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

NOTE: To scrap or to return the defective parts, you should follow the local government ordinance or regulations on how to dispose it properly, or follow the rules set by your regional Acer office on how to return it.
