Conventions

The following conventions are used in this manual:

| SCREEN MESSAGES | Denotes actual messages that appear on screen. |
|-----------------|--|
| NOTE | Gives bits and pieces of additional information related to the current topic. |
| WARNING | Alerts you to any damage that might result from doing or not doing specific actions. |
| CAUTION | Gives precautionary measures to avoid possible hardware or software problems. |
| IMPORTANT | Reminds you to do specific actions relevant to the accomplishment of procedures. |

Preface

Before using this information and the product it supports, please read the following general information.

- 1. This Service Guide provides you with all technical information relating to the BASIC CONFIGURATION decided for Acer's "global" product offering. To better fit local market requirements and enhance product competitiveness, your regional office MAY have decided to extend the functionality of a machine (e.g. add-on card, modem, or extra memory capability). These LOCALIZED FEATURES will NOT be covered in this generic service guide. In such cases, please contact your regional offices or the responsible personnel/channel to provide you with further technical details.
- 2. Please note WHEN ORDERING FRU PARTS, that you should check the most up-to-date information available on your regional web or channel. If, for whatever reason, a part number change is made, it will not be noted in the printed Service Guide. For ACER-AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code to those given in the FRU list of this printed Service Guide. You MUST use the list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

System Introduction

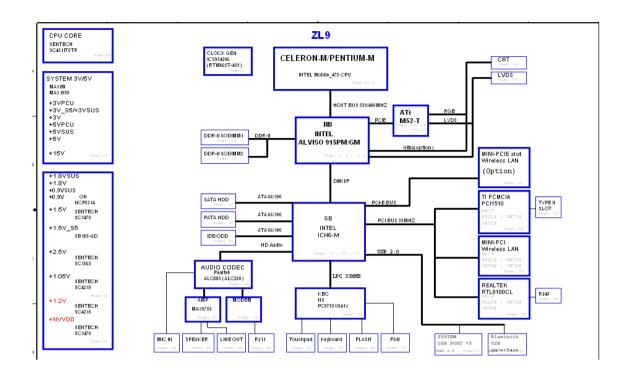

Features

This computer was designed with the user in mind. Here are just a few of its many features:

| Platform | 1 | |
|-----------|-------|--|
| | | $Intel^{\circledR}$ Centrino $^{\circledR}$ mobile technology, featuring: |
| | | ☐ Intel [®] Pentium [®] M 725A/735A/740/750/760/770/780 processor (2MB L2 cache, 1.60/1.70/ 1.73/1.86/2.0/2.13/2.26 GHz, 400/533 MHz FSB) |
| | | ☐ Intel [®] 915GM/915PM Express chipsets |
| | | □ Intel [®] PRO/Wireless 2200BG network connection (dual-mode 802.11b/g) Wi-Fi CERTIFIED TM solution, supporting Acer SignalUp TM wireless technology |
| | | $Intel^{\circledR}$ Celeron M processor 370/380/390 (1 MB L2 cache, 1.50/1.60/1.70 GHz, 400 MHz FSB) |
| Memory | | |
| | | 256 MB/512 MB of DDRII 533 memory, upgradeable to 2 GB using two soDIMM modules |
| Data sto | rage | |
| | | 40/60/80/100/120 GB ATA/100 hard disk |
| | | DVD-Dual double-layer drive |
| | | DVD/CD-RW combo drive |
| | | DVD Super Multi double-layer |
| Display a | and (| graphics |
| | | Color Thin-Film Transistor (TFT) LCD displaying at |
| | | 15" XGA (1024 X 768) |
| Acer | GridV | 15.4" WXGA (1280 X 800) supporting simultaneous multi-window viewing on dual displays via $^{\text{TM}}$ |
| | | Intel [®] 915GM integrated 3D graphics, featuring Intel [®] Graphics Media Accelerator 950 and up to 128 MB of shared memory, supporting Microsoft [®] DirectX [®] 9.0 and dual independent display |
| | | Intel [®] 915PM with ATI Mobility TM Radeon [®] X1300 HyperMemory TM 256/512MB, supporting ATI PowerPlay TM 5.0 Microsoft [®] DirectX [®] 9.0, DualView TM |
| | | MPEG-2/DVD hardware-assisted capability |
| | | Simultaneous LCD and CRT display with LCD panel resolution at 70 Hz |
| Commu | nicat | ion |
| | | Modem: 56K ITU V.92 modem with PTT approval; Wake-on-Ring ready |
| | | LAN: PCI/PCI Express $^{\circledR}$ gigabit Ethernet; Wake-on-LAN ready |
| | | Wireless LAN: integrated miniPCI Acer InviLink TM 802.11b/g Wi-Fi CERTIFIED TM solution; supporting Acer SignalUP TM wireless technology |
| | | Wireless PAN: integrated Bluetooth® |

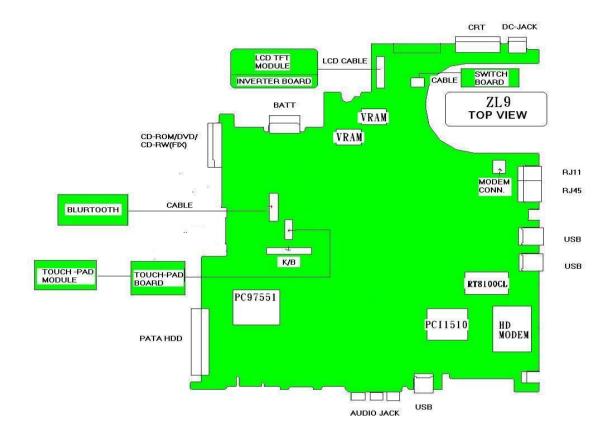

| Audio | | |
|----------|-------|--|
| | | Audio system with two built-in speakers |
| | | Intel $^{\circledR}$ High-Definition audio support |
| | | Sound Blaster Pro [™] and MS-Sound compatible |
| | | S/PDIF2 (Sony/Philips Digital Interface) support for digital speakers |
| | | Built-in microphone |
| nput de | vices | 3 |
| • | | 88-/89-key Acer FineTouch™ keyboard |
| | | Touchpad with 4-way integrated scroll button |
| | | Four easy-launch buttons |
| | | Two front-panel buttons: wireless LED-button and Bluetooth $^{\circledR}$ LED-button |
| I/O inte | rface | |
| | | Three USB 2.0 ports |
| | | PC Card slot (one Type II) |
| | | External display (VGA) port |
| | | Microphone-in jack |
| | | Headphone/speaker/line-out jack |
| | | Ethernet (RJ-45) port |
| | | Modem (RJ-11) port |
| | | DC-in jack for AC adaptor |
| Environ | ment | |
| | | Temperature: |
| | | Operating: 5° C to 35° C; Non-operating: -20° C to 65° C |
| | | Humidity (non-condension): |
| | П | Operating: 20% to 80%: Non-operating: 20% to 80% |

Panel

This is a brief introduction to the I/O ports, the features and the indicators.

Front view

| # | ltem | Description |
|---|--|---|
| 1 | Display screen | Also called LCD (Liquid Crystal Display), displays computer output. |
| 2 | Microphone | Internal microphone for sound recording. |
| 3 | Keyboard | For entering data into you computer. |
| 4 | Palmrest | Comfortable support area for your hands when you use the computer. |
| 5 | Click buttons (Left, center and right) | The left and right buttons function like the left and right mouse buttons; the center button serves as a 4-way scroll button. |
| 6 | Touchpad | Touch-sensitive pointing device which functions like a computer mouse. |
| 7 | Status indicators | LEDs (Light Emitting Diodes) that turn on and off to show the status of the computer and its functions and components. |
| 8 | Easy-Launch buttons | Buttons for launching frequently used programs. |
| 9 | Power button | Turns the computer on and off. |

Closed front view

| # | lcon | Item/ Port | Description |
|---|----------------------------|--|---|
| 1 | | Speakers | Left and right speakers deliver stereo audio output. |
| 2 | Ÿ | Power indicator | Lights up when the computer is on. |
| 3 | ₫ | Battery indicator | Lights up when the battery is being charged. |
| 4 | * | Bluetooth communication button/indicator | Press to enable/disable the Bluetooth function. Indicates the status of Bluetooth communication (optional). |
| 5 | S | Wireless communication button/ indicator | Press to enable/disable the wireless function. Indicates the status of wireless LAN communication (optional). |
| 6 | ((∗)) | Line-in jack | Accepts audio line-in devices (e.g., audio CD player, stereo walkman). |
| 7 | ∕ •ø ₃) | Microphone jack | Accepts inputs from external microphones. |
| 8 | ಣ | Speaker/Line-Out/Headphone jack | Connects to audio line-out devices (e.g., speakers, headphones). |
| 9 | •< | USB 2.0 port | Connects to Universal Serial Bus (USB) 2.0 devices (e.g., USB mouse, UsB camera). |

Left view

| # | Icon | Item/ Port | Description |
|---|------|----------------------------|--|
| 1 | | Optical drive | Internal optical drive; accepts CDs or DVDs depending on the optical drive type. |
| 2 | | LED indicator | Lights up when the optical drive is active. |
| 3 | | Optical drive eject button | Ejects the optical drive tray from the drive. |
| 4 | | Emergency eject hole | Ejects the optical drive tray when the computer is turned off. |

Right view

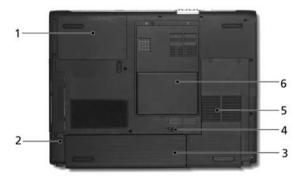

| # | lcon | Item/ Port | Description |
|---|------|---------------------------|---|
| 1 | | PC Card slot eject button | Ejects the PC Card from the slot |
| 2 | | PC card slot | Accepts one Type II CardBus PC Card. |
| | | | |
| 3 | • | Two USB 2.0 ports | Connects to Universal Serial Bus (USB) 2.0 devices (e.g., USB mouse, USB camera). |
| 4 | 器 | Network jack | Connects to an Ethernet 10/100 based network. |
| 5 | O | Modem jack | Connects to a phone line. |
| 6 | | Ventilation slots | Enable the computer to stay cool, even after prolonged use. |

Rear view

| # | Icon | Port | Description |
|---|------|-----------------------|---|
| 1 | == | Power jack | Connects to an AC adaptor. |
| 2 | | External display port | Connects to a display device (e.g., external monitor, LCD projector). |
| 3 | ĸ | Security keylock | Connects to a Kensington-compatible computer security lock. |

Bottom view

| # | Item | Description |
|---|-----------------------|--|
| 1 | Hard disc bay | Houses the computer's hard disc (secured by a screw). |
| 2 | Battery release latch | Unlatches the battery to remove the battery pack. |
| 3 | Battery bay | Houses the computer's battery pack. |
| 4 | Battery lock | Locks the battery in place. |
| 5 | Cooling fan | Helps keep the computer cool. |
| | | Note: Do not cover or obstruct the opening of the fan. |
| 6 | Memory comparment | House the computer's main memory. |

Indicators

The computer has three easy-to-read status icons on the upper-right above the keyboard, and four on the front panel.

| Icon | Function | Description |
|------------|----------------|--|
| A | Caps Lock | Lights when Caps Lock is activated. |
| 1 | Num Lock | Lights when Numeric Lock is activated. |
| 3 | Media activity | Indicates when the hard disk or optical drive is active. |
| ; <u>†</u> | Power | Lights when the computer is on. |
| Ē | Battery | Lights when the battery is being charged. |
| * | Bluetooth | Indicates the status of Bluetooth communication. |
| Ö | Wireless LAN | Indicates the status of Bluetooth communication. |

NOTE: 1. Charging: the light shows amber when the battery is charging.

NOTE: 2. Fully charged: light shows green when in AC mode.

Easy-Launch Buttons

Located at the upper-right, above the keyboard are four buttons. These buttons are called launch keys. They are mail, Web browser, Acer Empowering key " $\mathcal C$ ", and one user-programmable button.

Press " earrow " to run the Acer eManager. The mail and Web buttons are pre-set of email and internet programs, but can be reset by users. To set the Web browser, mail and programmable keys, run the Acer Launch Manager.

| Launch key | Default application |
|-------------|---------------------------------------|
| Р | User-programmable |
| | Acer eManager (user-programmable) |
| e | |
| Web browser | Internet browser (user-programmable) |
| Mail | Email application (user-programmable) |

Using the keyboard

The keyboard has full-sized keys and an embedded keypad, separate cursor keys, two Windows keys and twelve function keys.

Lock keys and embedded numeric keypad

The keyboard has three lock keys which you can toggle on and off.

| Lock key | Description |
|-----------------------------------|---|
| Caps Lock | When tis on, all alphabetic characters typed are in uppercase. |
| CAPS | |
| Num Lock <fn>+<f11></f11></fn> | When is on, the embedded keypad is in numeric mode. The keys function |
| NUM | as a calculator (complete with the arithmetic operators), -, *, and /). Use this mode when you need to do a lot of numeric data entry. A better solution would be to connect an external keypad. |
| Scroll Lock <fn>+<f12></f12></fn> | When is on, the screen moves one line up or down when you press the up |
| SCROLL LOCK | or down arrow keys respectively. does not work with some applications. |

The embedded numeric keypad functions like a desktop numeric keypad. It is indicated by small characters located on the upper right corner of the keycaps. To simplify the keyboard legend, cursor-control key symbols are not printed on the keys.

| Desired access | Num lock on | Num lock off |
|--|---|---|
| Number keys on embedded keypad | Type numbers in a normal manner. | |
| Cursor-control keys on embedded keypad | Hold <shift> while using cursor-control keys.</shift> | Hold <fn> while using cursor-control keys.</fn> |
| Main keyboard keys | Hold <fn> while typing letters on embedded keypad.</fn> | Type the letters in a normal manner. |

Windows keys

The keyboard has two keys that perform Windows-specific functions.

| Keys | Description |
|------------------|---|
| Windows logo key | Start button. Combinations with this key perform shortcut functions. Below are a few examples: |
| <i>25</i> | + <tab> (Activates the next Taskbar button)</tab> |
| | + <e> (Opens the My Computer window)</e> |
| | + <f1> (Opens Help and Support)</f1> |
| | + <f> (Opens the Find: All Files dialog box)</f> |
| | + <r> (Opens the Run dialog box)</r> |
| | + <m> (Minimizes all windows)</m> |
| | <shift>+ # +< M> (Undoes the minimize all windows)</shift> |
| Application key | This key has the same effect as clicking the right mouse button; it opens the application's context menu. |
| | |

Hot Keys

The computer employs hot keys or key combinations to access most of the computer's controls like screen contrast and brightness, volume output and the BIOS Utility.

To activate hot keys, press and hold the **<Fn>** key before pressing the other key in the hot key combination.

| Hot Key | Icon | Function | Description |
|---------|----------|---------------|---|
| Fn-Fi | ? | Hotkey help | Displays a list of the hotkeys and their functions. |
| Fn-F2 | © | Acer eSetting | Launches Acer eSetting in the eManager set by the Acer Empowering key |

| Hot Key | Icon | Function | Description |
|---------------|----------------|------------------|---|
| Fn-F3 | ♦ | Power Management | Launches Power options. |
| Fn-F4 | Z ^z | Sleep | Puts the computer in Sleep mode. |
| Fn-F5 | | Display toggle | Switches display output between the display screen, external monitor (if connected) and both the display screen and external monitor. |
| Fn-Fe | * | Screen blank | Turns the display screen backlight off to save power. Press any key to return. |
| Fn-F7 | | Touchpad Toggle | Turns the internal touchpad on and off. |
| Fn-F8 | 4/√ » | Speaker toggle | Turns the speakers on and off. |
| Fn-ſ∱ | (1) | Volume up | Increases the sound volume. |
| Fn-₩ | () | Volume down | Decreases the sound volume. |
| Fn-→ | ÷. | Brightness up | Increases the screen brightness. |
| Fn-" ← | : | Brightness down | Decreases the screen brightness. |

Special keys

You can locate the Euro symbol at the upper-center (for European keyboard) and/or bottom-right (Chinese keyboard) of your keyboard. To type:

The Euro symbol

- 1. Open a text editor or word processor.
- 2. Either directly press the <Euro> key at the bottom-right of the keyboard (for Chinese keyboard), or hold <Alt Gr> and then press the <5> key at the upper-center of the keyboard.symbol at the upper-center of the keyboard (for European keyboard, you can use both method).

NOTE: Some fonts and software do not support the Euro symbol. Please refer to www.microsoft.com/typography/fag/fag12.htm for more information.

The US dollar sign

- 1. Open a text editor or word processor.
- 2. Either directly press the <Euro> key at the bottom-right of the keyboard (for Chinese keyboard), or hold <Shift> and then press the <4> key at the upper-center of the keyboard.symbol at the upper-center of the keyboard (for European keyboard, you can use both method).

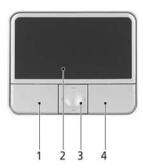

NOTE: This function varies according to the language settings.

Touchpad

The built-in touchpad is a pointing device that senses movement on its surface. This means the cursor responds as you move your finger on the surface of the touchpad. The central location on the palmrest provides optimum comfort and suuport.

Touchpad basics

The following items teach you how to use the touchpad:

^{*} Move your finger across the touchpad (2) to move the cursor.

^{*} Use the 4-way scroll (3) button to scroll up or down and move left or right a page. This button mimics your cursor pressing on the right scroll bar of Windows applications.

| Function | Left button (1) | Right button (4) | Touchpad (2) | Center button (3) |
|---------------------|--|------------------|---|--|
| Execute | Click twice quickly. | | Tap twice (at the same speed as double-clicking a mouse button). | |
| Select | Click once. | | Tap once. | |
| Drag | Click and hold, then use finger to drag the cursor on the touchpad. | | Tap twice (at the same speed as double-clicking a mouse button); hold finger to the touchpad on the second tap and drag the cursor. | |
| Access context menu | | Click once. | | |
| Scroll | | | | Click and hold to move up/down/left/right. |

NOTE: Keep your fingers dry and clean when using the touchpad. Also keep the touchpad dry and clean. The touchpad is sensitive to finger movement, hence, the lighter the touch, the better the response. Taping harder will not increase the touchpad's responsiveness.

^{*} Press the left (1) and right (4) buttons located on the edge of the touchpad to do selection and execution functions. These two buttons are similar to the left and right buttons on a mouse. Tapping on the touchapd is the same as clicking the left button.

Acer Empowering Technology

Acer's innovative Empowering Technology makes it easy for you to access frequently used functions and manage your new Acer notebook. It features the following handy utilities:

- Acer eDataSecurity Management protects data with passwords and advanced encryption algorithms.
 Acer eLock Management limits access to external storage media.
 Acer ePerformance Management improves system performance by optimizing disk space, memory and registry settings.
 Acer eRecovery Management backs up/recovers data flexibly, reliably and completely.
 Acer eSettings Management accesses system information and adjusts settings easily.
 Acer eNet Management hooks up to location-based networks intelligently.
- Acer ePresentation Management connects to a projector and adjusts display settings conveniently.

Acer ePower Management extends battery power via versatile usage profiles.

For more information, press the < < < < key to launch the Empowering Technology menu, then click on the appropriate utility and select the Help function.

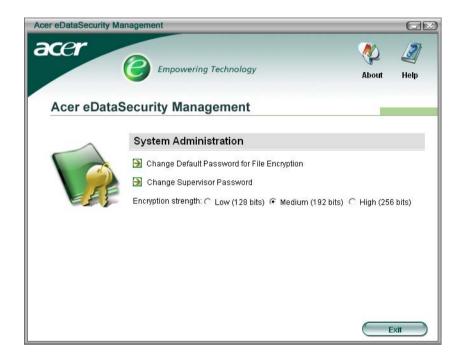

Acer eDataSecurity Management

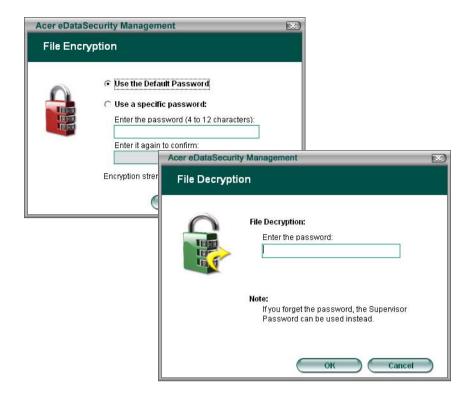

Acer eDataSecurity Management is handy file encryption utility that protexts your files from being accessed by unauthorized persons. It is conveniently integrated with Windows explorer as a shell extension for quick and

easy data encryption/decryption and also supports on-the-fly file encryption for MSN Messager and Microsoft Outlook.

There are two passwords that can be used to encrypt/decrypt a file; the supervisor passowrd and the file-specific password. The supervisor passwork is a "master" password that cna decrypt any file on your system; the file-specific password will be used to encrypt files by default, or you cna choose to enter your own file-specific password when encrypting a file.

NOTE: The password used encrypt a file is the unique key that the system needs to decrypt it. If you lose the password, the supervisor password is the only other key capable of decrypting the file. If you lose both passwords, there will be no way to decrypt your encryped file! **Be sure to safeguard all related passwords!**

Acer eLock Management

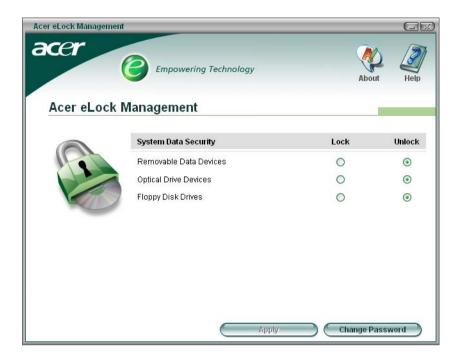

Acer eLock Management is a security utility that allows you to lock up your removable data, optical and floppy drives to ensure that data can't be stolen while your notebook is unattended.

- Removable data devices includes USB disk drives, USB pen drives, USB flash drives, USB MP3 drives, USB memory card readers, IEEE 1394 disk drives and any other removable disk drives that can be mounted as a file system when plugged into the system.
- Optical drive deivces includes any kind of CD-ROM or DVD-ROM drives.
- ☐ Floppy disk drives 3.5-inch disks only.

To activate Acer eLock Management, a password must be set first. Once set, you may apply lock to any of the three kinds of devices. Lock(s) will immediately be set without any reboot necessary, and will remain locked after rebooting, until unlocked.

If you do not set a password, Acer eLock Management will reset back to the initial status with all locks removed.

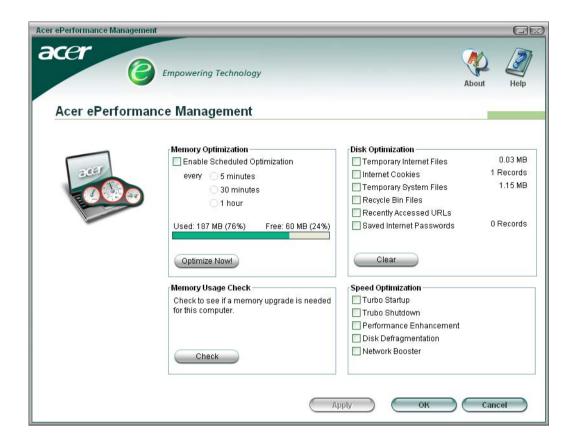

NOTE: If you lose your password, there is no method to reset it except by reformatting your notebook or taking your notebook to anAcer Customer Serivce Center. Be sure to remember or write down your password.

Acer ePerformance Management

Acer ePerformance Management is a system optimization tool that boosts the performance of your Acer notebook. It provides you with the following options to enhance overall system performance:

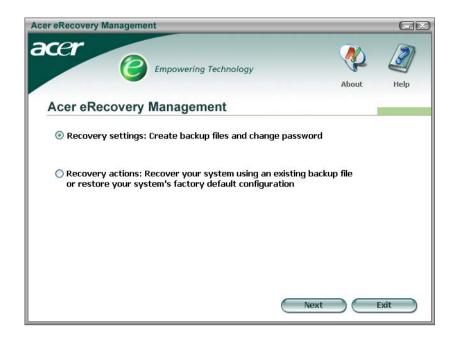

- ☐ Memory optimization releases unused memory and check usage.
- Disk optimization removes unneeded items and files.
- ☐ Speed optimization improves the usability and performance of your Windows XP system.

Acer eRecovery Management

Acer eRecovery Management is a powerful utility that does away with the need for recovery disks provided by the manufacturer. The Acer eRecovery Management utility occupies space in a hidden partition on your system's HDD. User-created backups are stored on D:\ drive. Acer eRecovery Management provides you with:

- Password protection.
- Recovery of applications and drivers.
- Image/data backup:
 - ☐ Back up to HDD (set recovery point).
 - Back up to CD/DVD.
- ☐ Image/data recovery tools:
 - Recover from a hidden partition (factory defaults).
 - Recover from the HDD (most recent user-defined recovery point).
 - □ Recover from CD/DVD.

NOTE: If your computer did not come with a Recovery CD or System CD, please use Acer eRecovery Management's "System backup to optical disk" feature to burn a backup image to CD or DVD. To ensure the best results when recovering your system using a CD or Acer eRecovery Management, detach all peripherals (except the external Acer ODD, if your computer has one), including your Acer ezDock.

Acer eSettings Management

Acer eSettings Management allows you to inspect hardware specifications and to monitor the system health status. Furthermore, Acer eSettings Management enables you to optimize your Windows operating system, so your computer runs faster, smoother and better.

Acer eSettings Management also:

- Provides a simple graphical user interface for navigating through the program effortlessly.
- Displays general system status and advanced monitoring for power users.
- Logs when a hardware component has been removed or replaced.
- Permits you to migrate personal settings.
- ☐ Keeps a history log of all alerts that were previously issued.

Acer eNet Management

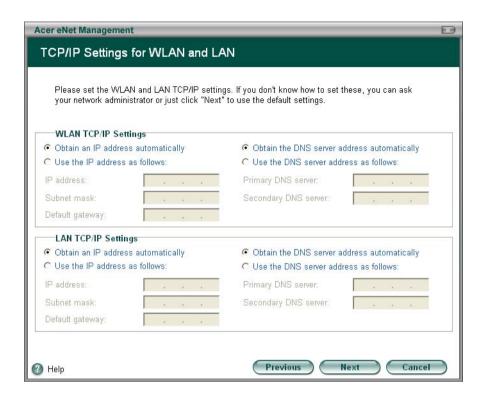

Acer eNet Management helps you to quickly and easily connect to both wired and wireless networks in a variety of locations. To access this utility, either click on the "Acer eNet Management" icon on your netebook, or start the program from the Start menu. You also have the option to set Acer eNet Management to start automatically when you boot up your PC.

Acer eNet Management automatically detects the best settings for a new location, while offering you the freedom to manually adjust the settings to match your needs, simply by right-clicking on the icon in the taskbar.

Acer eNet Management can save network settings for a location to a profile, and automatically apply the appropriate profile when you move from location to another. Settings stored include network connection settings (IP and DNS settings, wireless AP details, etc.), as well as default printer settings.

Security and safety concerns mean that Acer eNet Management does not store username and password information.

Acer ePower Management

Acer ePower Management features a straightforward user interface. To launch it, select Acer ePower Management from the Empowering Technology interface, or double-click the Acer ePower Management icon in the task tray.

Acer Mode

The default setting is "Maximum Performance." You can adjust CPU speed, LCD brightness and other settings, or click on buttons to turn the following functions on/off: Wireless LAN, Bluetooth, CardBus, Memory Card, Audio, and Wired LAN.

DC Mode

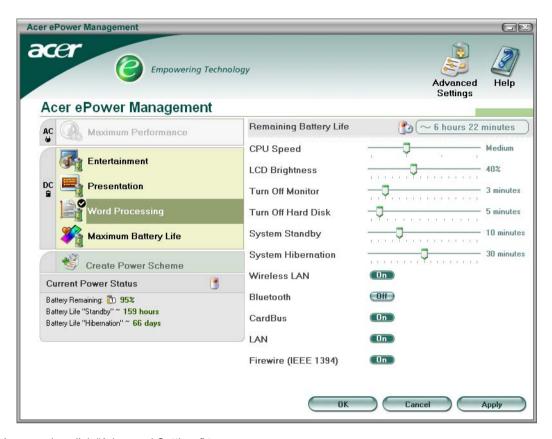

To suit your usage, there are four pre-defined profiles - Entertainment, Presentation, Word Processing, and Maximum Battery. Or, you can define up to three of your own profiles.

Create new power scheme

- 1. Assign a name for the new scheme.
- 2. Choose existing scheme to use as a template.
- 3. Select whether used for mains (AC) or batery mode.
- 4. Choose which power options best fit your needs, then click OK.
- 5. The new profile will appear on the main screen.

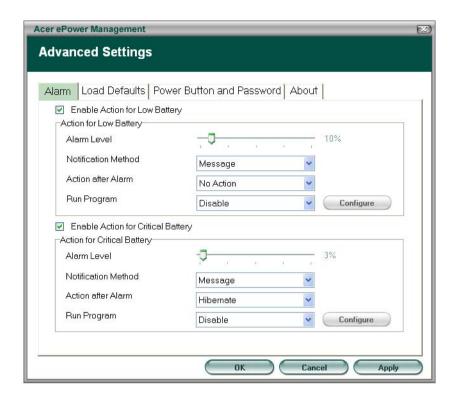

Battery status

For real-time battery life estimates based on current usage, referto the panel on the lower left-hand side of the window.

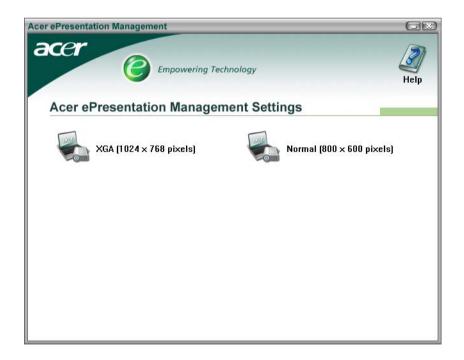

You can also click "Advanced Settings" to:

- Set alarms.
- Re-load factory defaults.
- Select what actions will be taken when the cover is closed, and set passwords for accessing the system after Hibernation or Standby.
- □ View information about Acer ePower Management.

Acer ePresentation Management

Acer ePresentation Management lets you select from two of the most common projector resolutions: XGA and SVGA.

Hardware Specifications and Configurations

System Board Major Chip

| Item | Controller |
|--------------------------------|--|
| System core logic | Intel® 915GM/915PM Express chipsets+ICH6-M |
| Memory controller | Integrated in Intel [®] 915GM |
| Audio controller | RealTek ALC833(ALC260) HD audio interface |
| | (Audio amplifer: Maxiam MAX9755) |
| PCMCIA controller for socket | TI PCI1510A |
| Video controller | Integrated in Intel [®] 915GM for UMA models |
| | ATI X1300 RADEON [®] for discrete models |
| Power and Keyboard controller | KBC NS97551/541V |
| Wireless controller (mini PCI) | Intel (The controller is on the Wireless LAN card. Please look at the wireless LAN card for controller details). |

Processor

| BIOS ROM type | Flash ROM, SST39VF040 |
| BIOS ROM size | 512Kbyte |
| BIOS package | 32 Pin PLCC-lead |
| Supported protocols | ACPI 2.0 (if available, at least 1.0b), SMBIOS 2.3, PCI 2.2, Boot Block, PXE 2.0, Mobile PC2001, Hard Disk Password, INT 13h Extensions, PCI Bus Power Management interface Specification, EI Torito-Bootable CD-ROM Format Specification V1.0, Simple Boot Flag 1.0 |

Second Level Cache

| Item | Specification |
|-------------------------|--|
| Cache controller | Built-in CPU |
| Cache size | 2MB for Intel [®] Pentium [®] M processor 1MB for Intel [®] Celeron [®] M processor |
| 1st level cache control | Always Enabled |

Second Level Cache

| Item | Specification |
|-------------------------|---------------------|
| 2nd level cache control | Always Enabled |
| Cache scheme control | Fixed-in write back |

System Memory

| Item | Specification | |
|---------------------------------|---|--|
| Memory controller | built-in CPU | |
| Onboard memory size | 0MB | |
| DIMM socket number | 2 Sockets | |
| Supports memory size per socket | 256MB(min)/1024MB(max) | |
| Supports maximum memory size | 2GB with 2 SODIMM support | |
| Supports DIMM type | DDRII | |
| Supports DIMM Speed | 533MHz | |
| Supports DIMM voltage | 1.8 V/0.9V | |
| Supports DIMM package | 200-pin so-DIMM | |
| Memory module combinations | You can install memory modules in any combinations as long as they match the above specifications . | |

Memory Combinations

| Slot 1 | Slot 2 | Total Memory |
|--------|--------|--------------|
| 0MB | 256MB | 256MB |
| 0MB | 512MB | 512MB |
| ОМВ | 1024MB | 1024MB |
| 256MB | 0MB | 256MB |
| 256MB | 256MB | 512MB |
| 256MB | 512MB | 768MB |
| 256MB | 1024MB | 1280MB |
| 512MB | 0MB | 512MB |
| 512MB | 256MB | 768MB |
| 512MB | 512MB | 1024MB |
| 512MB | 1024MB | 1536MB |
| 1024MB | 0MB | 1024MB |
| 1024MB | 256MB | 1280MB |
| 1024MB | 512MB | 1536MB |
| 1024MB | 1024MB | 2048MB (2G) |

Above table lists some system memory configurations. You may combine DIMMs with various capacities to form other combinations.

LAN Interface

| Item | Specification |
|------------------------|----------------|
| Chipset | RealTek 8100CL |
| Supports LAN protocol | 10/100 |
| LAN connector type | RJ45 |
| LAN connector location | Right side |

Modem Interface

| Item | Specification | |
|---------------------------------|--|--|
| Chipset | CS1037 Internal Agere Scorpio chipset (Scorpio+CSP1037B) | |
| Fax modem data baud rate (bps) | 14.4K | |
| Data modem data baud rate (bps) | 56K | |
| Supports modem protocol | V.92MDC | |
| Modem connector type | RJ11 | |
| Modem connector location | Right side | |

Wireless Module 802.11b/g (optional device)

| Item | Specification |
|-----------------|------------------|
| Chipset | |
| Data throughput | 11M~54M bps |
| Protocol | 802.11 b+g |
| Interface | Mini-PCI type II |

Floppy Disk Drive Interface

| Item | | Specification | | |
|--------------------------------|----------------------------|---|--------------|--|
| Vendor & model name | There is no FDD me | There is no FDD module for this product | | |
| Floppy Disk Specifications | Floppy Disk Specifications | | | |
| Media recognition | 2DD (720KB) | 2HD (1.2 MB, 3 mode) | 2HD (1.44MB) | |
| Sectors/track | 9 | 15 | 18 | |
| Tracks | 80 | 80 | 80 | |
| Data transfer rate (Kbit/s) | 1 MB | 1.6 MB | 2 MB | |
| Rotational speed (RPM) | 300 | 360 | 300 | |
| Read/write heads | 2 | 2 | | |
| Encoding method | MFM | MFM | | |

| Pixel Arrangement | RGB vertical stripe | RGB vertical stripe |
| Display Mode | Normally white | Normally white |
| Surface Treatment | Not show | glossy, hardness 2H |
| Typical White Luminance (cd/m²) also called Brightness | 180 | 160 |
| Luminance Uniformity | not show | 1.4(max) |
| Contrast Ratio | 400 | 400 |
| Response Time (Optical Rise Time/Fall Time)msec | 16 | 25(5ms for rise+20 ms for decay) |
| Nominal Input Voltage VDD | not show | not show |
| Typical Power Consumption (watt) | 6.5 (max) | 4.38 (for lamp) |
| Weight | 585 | 585 |
| Physical Size(mm) | 344(W)x222(H)x6.5(D) | 344(W)x222(H)x6.5(D) |
| Support Color | Native 262K colours | 262K colours |
| Viewing Angle (degree) Horizontal: Right/Left Vertial: Upper/Lower | 40/40 10/30 | 45/45 15/35 |
| Temperature Range(°C) Operating Storage (shipping) | 0 to 50 -20 to 60 | 0 to 50 -20 to 60 |

AC Adapter

| Item | Specification | |
|--------------------------------|--|--|
| Vendor & model name | LITE-ON PA-1650-02QR | |
| | LI SHIN SLS0335A19A57LF | |
| | DELTA SADP-65KB | |
| Input Requirements | | |
| Maximum input AC current | 3.42A | |
| Inrush currenct | 50A @ 115Vac | |
| | 100A @ 230Vac | |
| Nominal frequency (Hz) | 50-60 | |
| Frequency variation range (Hz) | 47-63 | |
| Input voltage range (Vrms) | 90V AC-264V AC | |
| Inrush current | The maximum inrush current will be less than 50A and 100A when the adapter is connected to 115Vac and 230Vac respectively. | |

Chapter 1 35

AC Adapter

| Item | Specification | |
|--------------------------------|---|--|
| Efficiency | It should provide an efficiency of 83% minimum, when measured at maximum load under 115Vac. | |
| Output Ratings (CV mode) | | |
| DC output voltage | 19V | |
| Noise + Ripple | 300mVp-pmax (20 MHz bandwidth) | |
| Load | 0(min) 3.16A(max) | |
| Output Ratings (CC mode) | | |
| DC output voltage | 19V +/-1.0V for CV mode | |
| Constant current mode | 3.6 +/- 0.3A | |
| Dynamic Output Characteristics | | |
| Turn-on delay time | 3 sec (@ 115Vac) | |
| Hold up time | 5ms (@115Vac, Full load) | |
| Over Voltage Protection (OVP) | 24V | |
| Short circuit protection | 3.9A max can be protected and output can be shorted without damage | |
| Electrostatic discharge (ESD) | 15KV (at air discharge) | |
| | 8KV (at contact discharge) | |
| Dielectric Withstand Voltage | | |
| Primary to secondary | 3000Vac | |
| Leakage current | 0.25 mA max. (@ 254Vac, 60Hz) | |
| Regulatory Requirements | Safety Requirements: | |
| | 1.The subject product rated 100-120V 60Hz must be listed under UL 1950 and certified with SCA Standard C22.2 No.950. | |
| | 2.The subject product rated 200-240V 50Hz must comply with low voltage directive 73/23EEC. | |
| | EMI Requirements: | |
| | 1.The subject product rated 100-120V 60Hz must meet the EMI requirements of FCC part 15, Subpart B for Class B Digital Device and get FCC Certification before marketing into USA and Canada. | |
| | 2.The subject product rated 200-240V 50Hz must meet the EMC Directive 89/ 336/EEC. | |
| | 3.The subject product rated 100-120V must meet the VCCI-2 EMI requirements. | |

Power Management

| ACPI Mode | Power Management | |
|-------------------|--|--|
| Mech. Off (G3) | All devices in the system are turned off completely. | |
| Soft Off (G2/S5) | OS initiated shutdown. All devices int he sytem are turned off completely. | |
| Working (G0/S0) | Individual devices such as the CPU and hard disk may be power managed in this state. | |
| S3 Sleeping State | CPU set power down | |
| | VGA suspend | |
| | PCMCIA suspend | |
| | Audio Power Down | |
| | Hard Disk Power Down | |
| | CD-ROM Power Down | |
| | Super I/O Low Power mode | |
| S4 Sleeping State | Also called Hibernate stats. System saves all system state and data onto disk prior to power off the whole system. | |

Chapter 1 37

System Utilities

BIOS Setup Utility

The BIOS Setup Utility is a hardware configuration program built into your computer's BIOS (Basic Input/Output System).

Your computer is already properly configured and optimized, and you do not need to run this utility. However, if you encounter configuration problems, you may need to run Setup. Please also refer to Chapter 4 Troubleshooting when problem arises.

To activate the BIOS Utility, press [72] during POST (when "Press <F2> to enter Setup" message is prompted on the bottom of screen).

Press 🔁 to enter setup. The default parameter of F12 Boot Menu is set to "disabled". If you want to change boot device without entering BIOS Setup Utility, please set the parameter to "enabled".

Press <F12> during POST to enter multi-boot menu. In this menu, user can change boot device without entering BIOS SETUP Utility.

| PhoenixBIOS Setup Utility | | | | | | |

Chapter 2 38

Navigating the BIOS Utility

There are six menu options: Info., Main, System Devices, Security, Boot, and Exit.

Follow these instructions:

| To choose a menu, use the cursor left/right keys (☐ ☐). |
|--|
| To choose a parameter, use the cursor up/down keys (♠↓). |
| To change the value of a parameter, press sor s. |
| A plus sign (+) indicates the item has sub-items. Press es to expand this item. |
| Press so while you are in any of the menu options to go to the Exit menu. |
| In any menu, you can load default settings by pressing . You can also press to save any changes made and exit the BIOS Setup Utility. |

NOTE: You can change the value of a parameter if it is enclosed in square brackets. Navigation keys for a particular menu are shown on the bottom of the screen. Help for parameters are found in the Item Specific Help part of the screen. Read this carefully when making changes to parameter values. Please note that system information vary in models.

Information

PhoenixBIOS Setup Utility
Info. Main Security Boot Exit

CPU Type: Intel (R) Pentium (R) processor 1.73GHz

CPU Speed: 1733MHz

HDD Model Name: TOSHIBA MK1031GAS

HDD Serial Number: 751U0320S

ATAPI Device: HL-DT-ST DVD-RW GWA-4082N

System BIOS Version: 2A02

VGA BIOS Version: Alviso 1219

KBC Version: 1A16

Serial Number : LXT123456705290116EF00

Asset Tag Number: N/A

Manufacturer Name: Acer

F1 Help $\uparrow \downarrow$ Select Item F5/F6 Change Values F9 Setup Defaults Esc Exit $\leftarrow \rightarrow$ Select Menu Enter Select \blacktriangleright Sub-Menu F10 Save and Exit

NOTE: The system information is subject to different models.

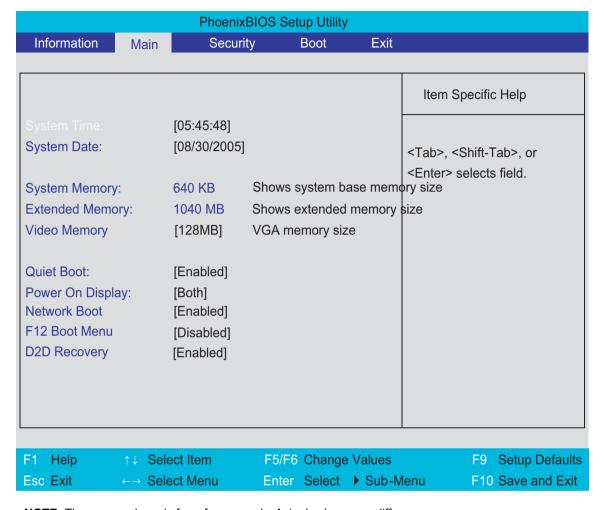

| Parameter | Description | |
|---------------------|---|--|
| HDD Model Name | This field shows the model name of HDD installed on primary IDE master. | |
| HDD Serial Number | This field displays the serial number of HDD installed on primary IDE master. | |
| ATAPI Device | This field displays the mofel name of devices installed on secondary IDE master. The hard disk drive or optical drive model name is automatically detected by the system. | |
| System BIOS Version | This field displays the BIOS version of the system. | |
| VGA BIOS Version | This field displays the VGA BIOS version of this system. | |
| KBC Version | This filed displays the KBC version of this system. | |
| ATAPI Serial Number | This field shows the serial number of devices installed on secondary IDE master. | |
| Serial Number | This field displays the serial number of this unit. | |
| Asset Tag Number | An Asset Tag with 32 bytes will be stored in EEPROM. Default value is set as "000000000000000" (in binary code). | |

Chapter 2 40

| Parameter | Description | |
|-------------|---|--|
| UUID Number | This will be visible only when there is an internal LAN device present. UUID means Universally Unique ID, a method for computing object identifiers (OIDs). It uses the serial number in the local Ethernet card combined with the date and time to generate a 128 bit (16bytes) number. For Acer product, this field displays UUID number. A UUID string will be stored in the secured data area which is an alphanumeric string of maxium 16 bytes in length. | |

Main

The Main screen displays a summary of your computer hardware information, and also includes basic setup parameters. It allows the user to specify standard IBM PC AT system parameters.

NOTE: The screen above is for reference only. Actual values may differ.

Chapter 2 42

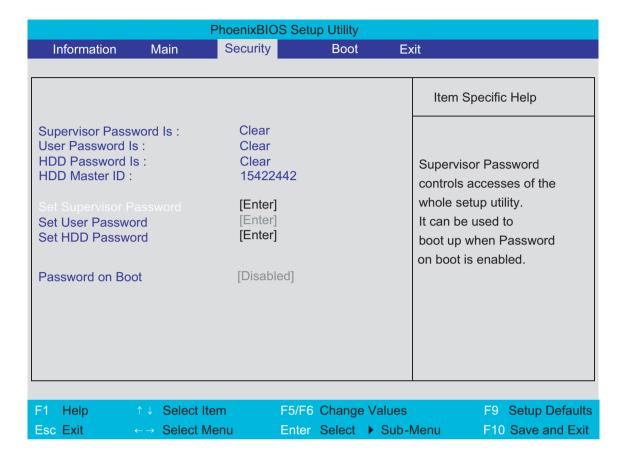

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

| Parameter | Description | Format/Option | |
|------------------|--|--|--|
| System Time | Sets the system time. The hours are displayed with 24-hour format. | Format: HH:MM:SS (hour:minute:second) System Time | |
| System Date | Sets the system date. Format MM/DD/YYYY (month/dayear) System Date | | |
| System Memory | This field reports the memory size of the system. Memory size is fixed to 640MB | | |
| Extended Memory | This field reports the memory size of the extended memory in the system. Extended Memory size=Total memory size-1MB | | |
| VGA Memory | Shows the VGA memory size. VGA Memory size=64/128MB | | |
| Quiet Boot | Determines if Customer Logo will be displayed or not; shows Summary Screen is disabled or enabled. Enabled: Customer Logo is displayed, and Summary Screen is disabled. Disabled: Customer Logo is not displayed, and Summary Screen is enabled. | Option: Enabled or Disabled | |
| Power on display | Auto: During power process, the system will detect if any display device is connected on external video port. If any external display device is connected, the power on display will be in CRT (or projector) only mode. Otherwise it will be in LCD only mode. Both: Simultaneously enable both the integrated LCD screen and the system's external video port | Option: Both or Auto | |
| Network Boot | (for an external CRT or projector). Enables, disables the system boot from LAN (remote server). | Option: Enabled or Disabled | |
| F12 Boot Menu | Enables, disables Boot Menu during POST. | Option: Disabled or Enabled | |
| D2D Recovery | Enables, disables D2D Recovery function. The function allows the user to create a hidden partition on hard disc drive to store operation system and restore the system to factory defaults. | Option: Enabled or Disabled | |

NOTE: The sub-items under each device will not be shown if the device control is set to disable or auto. This is because the user is not allowed to control the settings in these cases.

Security

The Security screen contains parameters that help safeguard and protect your computer from unauthorized

Chapter 2 44

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

| Parameter | Description | Option |
|---------------------------|--|----------------------------|
| User Password Is | Shows the setting of the user password. | Clear or Set |
| Supervisor Password Is | Shows the setting of the Supervisor password. Please note that Supervisor Password controls access to the entire Setup. The Supervisor Password can be used to boot up when Password on boot is set to enabled. | Clear or Set |
| HDD Password Is | Shows the setting of the HDD password. | Clear or Set |
| Set User Password | Press Enter to set the user password. When user password is set, this password protects the BIOS Setup Utility from unauthorized access. The user can enter Setup menu only and does not have right to change the value of parameters. | |
| Set Supervisor Password | Press Enter to set the supervisor password. When set, this password protects the BIOS Setup Utility from unauthorized access. The user can not either enter the Setup menu nor change the value of parameters. | |
| Set HDD Password | Press Enter to set the HDD password. | |
| Primary Harddisk Security | This feature is available to user when Supervisor password is set. Password can be written on HDD only when Supervisor password or user password is set and password on HDD is set to enabled. Supervisor Password is written to HDD only when Supervisor password is being set. User password is written to HDD when both passwords are set. When both Supervisor and user password are present, both passwords can unlock the HDD. | Disabled or Enabled |
| Password on Boot | Defines whether a password is required or not while the events defined in this group happened. The following sub-options are all requires the Supervisor password for changes and should be grayed out if the user password was used to enter setup. | Disabled or Enabled |

NOTE: When you are prompted to enter a password, you have three tries before the system halts. Don't forget your password. If you forget your password, you may have to return your notebook computer to your dealer to reset it.

NOTE: The User Password can chagne the following items in BIOS: System Date, System Time and Power on Display on Main menu, System Devices menu and Set User Password function on Security menu. Meanwhile, the Supervisor Password can change ALL settings in BIOS.

Setting a Password

Follow these steps as you set the user or the supervisor password:

1. Use the 1 and 1 keys to highlight the Set Supervisor Password parameter and press the key. The Set Supervisor Password box appears:

| Set Supervisor Pas | sword | |
|----------------------|-------|---|
| Enter New Password |] |] |
| Confirm New Password | [|] |

2. Type a password in the "Enter New Password" field. The password length can not exceeds 8 alphanumeric characters (A-Z, a-z, 0-9, not case sensitive). Retype the password in the "Confirm New Password" field.

IMPORTANT:Be very careful when typing your password because the characters do not appear on the screen.

- 4. If desired, you can opt to enable the Password on boot parameter.
- **5.** When you are done, press of to save the changes and exit the BIOS Setup Utility.

Removing a Password

Follow these steps:

1. Use the 1 and 1 keys to highlight the Set Supervisor Password parameter and press the key. The Set Password box appears:

| Set Supervisor Passwo | ord | 10 |
|------------------------|-----|----|
| Enter current password | [|] |
| Enter New Password |] |] |
| Confirm New Password | [|] |

- 2. Type the current password in the Enter Current Password field and press [ENTER].
- **3.** Press twice **without** typing anything in the Enter New Password and Confirm New Password fields. The computer then sets the Supervisor Password parameter to "Clear".
- 4. When you have changed the settings, press of to save the changes and exit the BIOS Setup Utility.

Changing a Password

1. Use the 1 and 1 keys to highlight the Set Supervisor Password parameter and press the key. The Set Password box appears:

| Set Supervisor Passwo | rd | |
|------------------------|----|---|
| Enter current password | [|] |
| Enter New Password |] |] |
| Confirm New Password | [|] |

2. Type the current password in the Enter Current Password field and press [see].

Chapter 2 46

- 3. Type a password in the Enter New Password field. Retype the password in the Confirm New Password field.
- 4. Press [NITS]. After setting the password, the computer sets the User Password parameter to "Set".
- 5. If desired, you can enable the Password on boot parameter.

If the verification is OK, the screen will display as following.

Setup Notice Changes have been saved. [continue]

The password setting is complete after the user presses .

If the current password entered does not match the actual current password, the screen will show you the Setup Warning.

Setup Warning Invalid password Re-enter Password [continue]

If the new password and confirm new password strings do not match, the screen will display the following message.

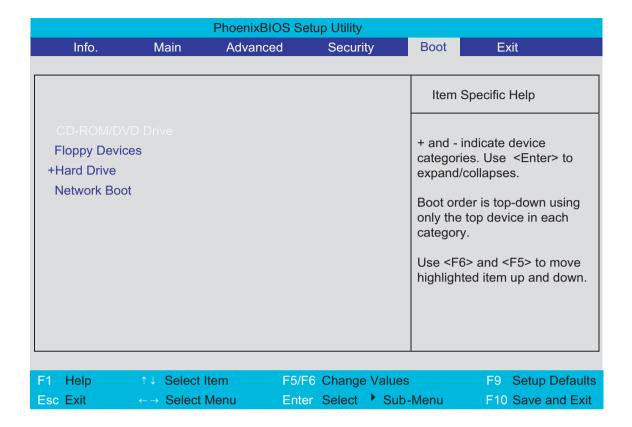

Setup Warning

Password do not match

Re-enter Password

Boot

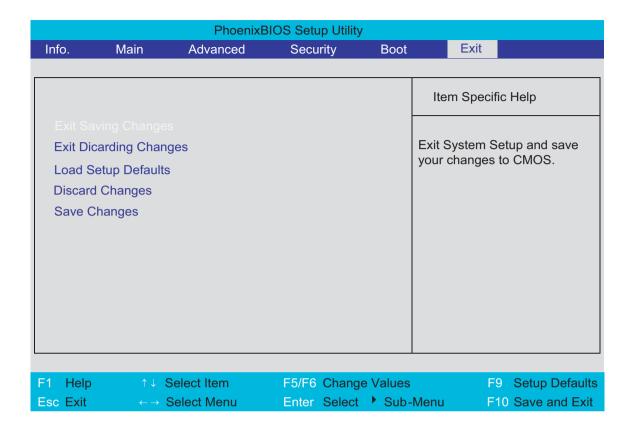

This menu allows the user to decide the order of boot devices to load the operating system. Bootable devices includes the distette drive in module bay, the onboard hard disk drive and the CD-ROM in module bay.

Chapter 2 48

Exit

The Exit screen contains parameters that help safeguard and protect your computer from unauthorized use.

The table below describes the parameters in this screen.

| Parameter | Description |
|-------------------------|---|
| Exit Saving Changes | Exit System Setup and save your changes to CMOS. |
| Exit Discarding Changes | Exit utility without saving setup data to CMOS. |
| Load Setup Default | Load default values for all SETUP item. |
| Discard Changes | Load previous values from CMOS for all SETUP items. |
| Save Changes | Save Setup Data to CMOS. |

BIOS Flash Utility

The BIOS flash memory update is required for the following conditions:

- New versions of system programs
- New features or options
- Restore a BIOS when it becomes corrupted.

Use the Phlash utility to update the system BIOS flash ROM.

NOTE: If you do not have a crisis recovery diskette at hand, then you should create a Crisis Recovery Diskette before you use the Phlash utility.

NOTE: Do not install memory-related drivers (XMS, EMS, DPMI) when you use the Phlash.

NOTE: Please use the AC adaptor power supply when you run the Phlash utility. If the battery pack does not contain enough power to finish BIOS flash, you may not boot the system because the BIOS is not completely loaded.

Create Crisis Recovery Diskette

- 1. Rename BIOS file of this product to BIOS.wph
- 2. Copy BIOS.wph file to crisis folder and overwrite the original BIOS.wph file.
- 3. Insert a blank floppy diskette to floppy drive.
- **4.** Run cs.bat and follow its instructions to create crisis recovery diskette.

Recover BIOS from Crisis Recovery Diskette

- 1. Insert the crisis recovery diskette to the floppy drive.
- 2. Use AC adaptor power supply.
- 3. Press Fn and ESC key together for more than two seconds when you power on the system.
- 4. The system will read the files inside the floppy diskette without backlight.
- **5.** After one to three minutes, the system will automatically reboot. Please do not shut down the system or remove the power supply.
- **6.** After step 1 to 5, you sould be able to recover BIOS already. Then you can see the LCD screen with the backlight is on.

Chapter 2 50

Machine Disassembly and Replacement

This chapter contains step-by-step procedures on how to disassemble the notebook computer for maintenance and troubleshooting.

To disassemble the computer, you need the following tools:

| Wrist grounding strap and conductive mat for preventing electrostatic discharge |
|---|
| Flat-bladed screw driver |
| Phillips screw driver |
| Tweezers |
| Plastic Flat-bladed screw driver |
| Hexed Screw Driver |

NOTE: The screws for the different components vary in size. During the disassembly process, group the screws with the corresponding components to avoid mismatch when putting back the components.

General Information

Before You Begin

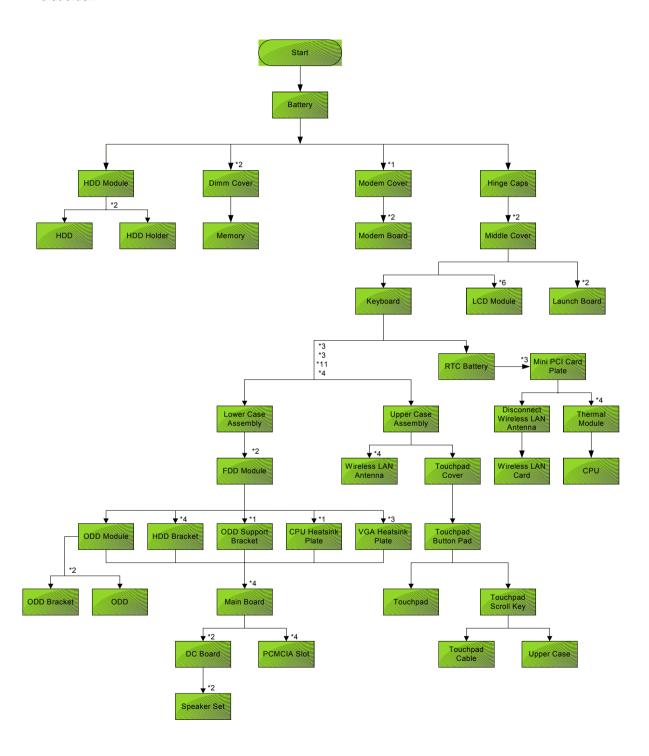

Before proceeding with the disassembly procedure, make sure that you do the following:

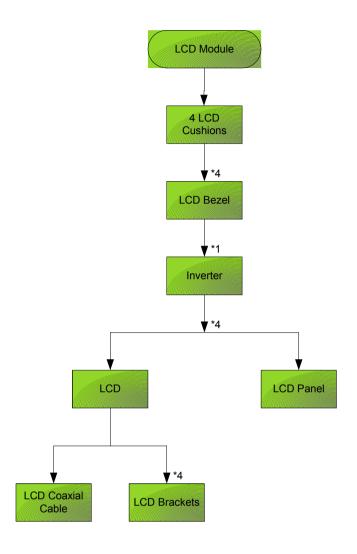

- 1. Turn off the power to the system and all peripherals.
- 2. Unplug the AC adapter and all power and signal cables from the system

NOTE: Aspire 9100 series product uses mylar or tape to fasten the FFC/FPC/connectors/cable, you may need to tear the tape or mylar before you disconnect different FFC/FPC/connectors.

Disassembly Procedure Flowchart

The flowchart on the succeeding page gives you a graphic representation on the entire disassembly sequence and instructs you on the components that need to be removed during servicing. For example, if you want to remove the main board, you must first remove the keyboard, then disassemble the inside assembly frame in that order.

Screw List

| Item | Description |
|------|-----------------------------------|
| Α | SCREW F040 9 5.0X5.0 9.5X(IO) R00 |
| В | SCREW M2.0X0.4P+3FP ZK(NL) |
| С | SCREW M2.5 K 5/2 X0.85 4 ZK(NL) |
| D | SCREW M2.5X0.45+10K NIL |
| E | SCREW M2.5X0.45+8K ZBL |
| F | SCREW M2.5X0.45P+3F NI |
| G | SCREW M3.0X0.8P+3K NL |

Removing the Battery

1. Unlatch the battery latch then remove the battery.

Removing the Hard Disc Drive Module

- 1. See "Removing the Battery" on page 56.
- 2. Remove the screw securing the hard disk drive (HDD) cover.
- 3. Then remove the HDD cover.

- 4. Pull the HDD module backwards as shown.
- 5. Remove the HDD module.

Disassembling the Hard Disc Drive Module

- 1. Remove two screw securing the HDD bracket.
- 2. Remove the other two screw on the other side.
- 3. Take out the HDD from the HDD bracket.

Removing the Optical Disc Drive Module

- 1. See "Removing the Battery" on page 56.
- 2. See "Removing the Hard Disc Drive Module" on page 57.
- 3. Remove the screw securing the optical disc drove (ODD) module.
- 4. Push the ODD module outwards with a flat headed screw driver.
- 5. Then remove the ODD module.

Disassembling the Optical Disc Drive Module

- 1. Remove two screws securing the ODD bracket.
- 2. Then remove the ODD bracket.

Removing the Memory

- 1. See "Removing the Battery" on page 56.
- 2. Remove the two screws securing the DIMM cover then remove the DIMM cover.
- **3.** Pop out the memory.
- **4.** Then remove the memory from the DIMM socket.

Removing the LCD Module

Removing the Middle Cover

- 1. See "Removing the Battery" on page 56.
- 2. Open the notebook as image shows.
- 3. Detach the middle cover carefully then remove it.

Removing the Keyboard

- 1. See "Removing the Battery" on page 56.
- 2. See "Removing the Middle Cover" on page 60.
- 3. Remove the four screws securing the keyboard.
- 4. Turn the keyboard over as shown.
- **5.** Disconnect the keyboard cable then remove the keyboard.

Removing the Fan, the CPU Thermal Module and the CPU

- 1. See "Removing the Battery" on page 56.
- 2. See "Removing the Middle Cover" on page 60.
- 3. See "Removing the Keyboard" on page 60.
- 4. Remove the three screws securing the system fan.
- 5. Disconnect the fan cable.
- 6. Then detach the fan from the main unit.

- 7. Remove the four screws securing the CPU thermal module.
- 8. Then remove the CPU thermal module.

NOTE: Please remove the screws in the order that the image indicates. Start from 4, 3, 2 then 1. When you reassemble the CPU thermal module, secure the screws as the order: 1, 2, 3 then 4. This can help you average the force to each screw, therefore the CPU module can be secured well.

- 9. Release the CPU lock with a flat headed screw driver.
- 10. Then detch the CPU from the socket carefully.

Removing the Wireless LAN Card

- **1.** See "Removing the Battery" on page 56.
- 2. See "Removing the Middle Cover" on page 60.
- 3. Pop out the wireless LAN card.
- 4. Disconnect the main and the auxiliary antennae.
- 5. Then remove the wireless LAN card from the main unit.

Removing the LCD Module

- 1. See "Removing the Battery" on page 56.
- 2. See "Removing the Middle Cover" on page 60.
- 3. See "Removing the Keyboard" on page 60.
- 4. Disconnect the inverter cable with a flat headed screw driver.
- 5. Take out the LVDS cable then disconnect the LVDS cable.

6. Tear off the tape securing the wireless LAN antennae then release the antennae.

- 7. Remove the two screws securing the LCD module on the rear side.
- 8. Remove the two screws securing the LCD module on the bottom.
- 9. Then detach the LCD module carefully.

Disassembling the LCD Module

Removing the LCD Bezel

- 1. See "Removing the Battery" on page 56.
- 2. See "Removing the Middle Cover" on page 60.
- 3. See "Removing the Keyboard" on page 60.
- 4. See "Removing the Fan, the CPU Thermal Module and the CPU" on page 60.
- 5. See "Removing the Wireless LAN Card" on page 61.
- 6. See "Removing the LCD Module" on page 61.
- 7. Detach the two rubber pads and the two screw pads.
- 8. Remove the four screws securing the LCD bezel.
- Detach the LCD bezel carefully.

- 10. Remove the nine screws securing the LCD to the LCD panel.
- 11. Take out the LCD assembly from the LCD panel.
- 12. Disconnect the LCD inverter cable.

- 13. Discnnect the LCD inverter board.
- 14. Turn over the LCD.
- 15. Disconnect the LCD cable.

- 16. Remove the four screws securing the right LCD bracket, then remove the right bracket.
- 17. Remove the four screws securing the left LCD bracket, then remove the left bracket.

Disassembling the Main Unit

Removing the Upper Case Assembly

- 1. See "Removing the Battery" on page 56...
- 2. See "Removing the Hard Disc Drive Module" on page 57.
- 3. See "Removing the Optical Disc Drive Module" on page 58.
- 4. See "Removing the Memory" on page 59.
- 5. See "Removing the LCD Module" on page 60.
- Remove the fifteen screws securing the lower case assembly and the upper case assembly on the bottom.
- 7. Remove the three screws securing the upper case assembly.

- 8. Disconnect the touchpad cable.
- 9. Disconnect the power board cable.
- 10. Then detach the upper case assembly.

Removing the Power Board

- 1. See "Removing the Battery" on page 56.
- 2. See "Removing the Hard Disc Drive Module" on page 57.
- 3. See "Removing the Optical Disc Drive Module" on page 58.
- 4. See "Removing the Memory" on page 59.
- 5. See "Removing the LCD Module" on page 60.
- 6. Remove the two screws securing the power board.
- 7. Tear off the tape holding the power board cable then remove the power board.

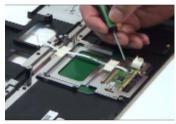

Removing the Touchpad Bracket, the Touchpad Board and the Touchpad

- 1. See "Removing the Battery" on page 56.
- 2. See "Removing the Middle Cover" on page 60.
- 3. See "Removing the Keyboard" on page 60.
- 4. See "Removing the Power Board" on page 65.
- 5. See "Removing the Upper Case Assembly" on page 65.
- **6.** Pull back the tape covering the touchpad FFC.
- 7. Disconnect the touchpad FFC the remove it.

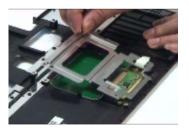

- 8. Remove the four screws securing the touchpad bracket.
- 9. Slide the touchpad bracket back as shown.
- 10. Then remove the touchpad bracket.

- **11.** Use a flat headed screw driver to detach the touchpad board.
- 12. Then detach the touchpad carefully.

Removing the Speaker Set

- 1. See "Removing the Battery" on page 56.
- 2. See "Removing the Middle Cover" on page 60.
- 3. See "Removing the Keyboard" on page 60.
- 4. See "Removing the Power Board" on page 65.
- 5. See "Removing the Upper Case Assembly" on page 65.
- 6. Disconnect the SW DJ board cable.
- 7. Disconnect the CIR receiver cable.
- 8. Then disconnect the audio board FFC cable.

- 9. Disconnect the speaker set cable.
- 10. Then detach the speaker set from the lower case.

Removing the SW DJ Board Assembly

- 1. See "Removing the Battery" on page 56.
- 2. See "Removing the Middle Cover" on page 60.
- 3. See "Removing the Keyboard" on page 60.
- 4. See "Removing the Power Board" on page 65.
- 5. See "Removing the Upper Case Assembly" on page 65.
- 6. See "Removing the Speaker Set" on page 67.
- 7. Remove the two screws securing the SW DJ board assembly.

8. Remove the SW DJ board assembly from the lower case.

- 9. Remove the two screws securing the SW DJ board and SW DJ board bracket.
- 10. Then remove the SW DJ board.

Removing the Audio Board

- 1. See "Removing the Battery" on page 56.
- 2. See "Removing the Middle Cover" on page 60.
- 3. See "Removing the Keyboard" on page 60.
- 4. See "Removing the Power Board" on page 65.
- **5.** See "Removing the Upper Case Assembly" on page 65.
- 6. See "Removing the Speaker Set" on page 67.
- 7. See "Removing the SW DJ Board Assembly" on page 67.
- 8. Remove the screw securing the audio board.
- 9. Detach the audio board FFC.
- 10. Release the CIR receiver cable.
- 11. Then detach the audio board.

Removing the VGA Thermal Module

- 1. See "Removing the Battery" on page 56.
- 2. See "Removing the Middle Cover" on page 60.
- 3. See "Removing the Keyboard" on page 60.

Chapter 3 68

- 4. See "Removing the Power Board" on page 65.
- 5. See "Removing the Upper Case Assembly" on page 65.
- **6.** Remove the three screws securing the VGA thermal module.
- 7. Then detach the VGA thermal module.

Removing the Modem Board

- 1. See "Removing the Battery" on page 56.
- 2. See "Removing the Middle Cover" on page 60.
- 3. See "Removing the Keyboard" on page 60.
- 4. See "Removing the Power Board" on page 65.
- 5. See "Removing the Upper Case Assembly" on page 65.
- **6.** Remove the two screws securing the modem board.
- 7. Disconnect the modem board connector.
- 8. Disconnect the modem board cable then remove the board.

Removing the Main Board

- 1. See "Removing the Battery" on page 56.
- 2. See "Removing the Middle Cover" on page 60.
- 3. See "Removing the Keyboard" on page 60.
- 4. See "Removing the Power Board" on page 65.
- 5. See "Removing the Upper Case Assembly" on page 65.
- 6. See "Removing the Speaker Set" on page 67.
- 7. See "Removing the SW DJ Board Assembly" on page 67.
- 8. See "Removing the Audio Board" on page 68.
- 9. See "Removing the VGA Thermal Module" on page 68.
- 10. See "Removing the Modem Board" on page 69.
- **11.** Remove the two nut screws securing the main board.
- 12. Press the PCMCIA card button.

- 13. Remove the dummy card.
- 14. Remove the two screws securing the main board to the lower case.
- 15. Then detach the main board from the lower case carefully.

Removing the Control Board

- 1. See "Removing the Battery" on page 56.
- 2. See "Removing the Middle Cover" on page 60.
- 3. See "Removing the Keyboard" on page 60.
- 4. See "Removing the Power Board" on page 65.
- 5. See "Removing the Upper Case Assembly" on page 65.
- 6. See "Removing the Speaker Set" on page 67.
- 7. See "Removing the SW DJ Board Assembly" on page 67.
- 8. See "Removing the Audio Board" on page 68.
- 9. See "Removing the VGA Thermal Module" on page 68.
- 10. See "Removing the Modem Board" on page 69.
- 11. See "Removing the Main Board" on page 69.
- 12. Turn over the main board as shown.
- **13.** Disconnect the control board antenna.
- 14. Pop out the control board then remove it.

Chapter 3 70

Troubleshooting

Use the following procedure as a guide for computer problems.

NOTE: The diagnostic tests are intended to test only Acer products. Non-Acer products, prototype cards, or modified options can give false errors and invalid system responses.

- 1. Obtain the failing symptoms in as much detail as possible.
- 2. Verify the symptoms by attempting to re-create the failure by running the diagnostic test or by repeating the same operation.
- 3. Use the following table with the verified symptom to determine which page to go to.

| Symptoms (Verified) | Go To |
|---|---|
| Power failure. (The power indicator does not go on or stay on.) | "Power System Check" on page 74. |
| POST does not complete. No beep or error codes are indicated. | "Power-On Self-Test (POST) Error Message" on page 77 "Undetermined Problems" on page 89 |
| POST detects an error and displayed messages on screen. | "Error Message List" on page 78 |
| Other symptoms (i.e. LCD display problems or others). | "Power-On Self-Test (POST) Error Message" on page 77 |
| Symptoms cannot be re-created (intermittent problems). | Use the customer-reported symptoms and go to "Power-On Self-Test (POST) Error Message" on page 77 "Intermittent Problems" on page 88 "Undetermined Problems" on page 89 |

System Check Procedures

External Diskette Drive Check

Do the following to isolate the problem to a controller, driver, or diskette. A write-enabled, diagnostic diskette is required.

NOTE: Make sure that the diskette does not have more than one label attached to it. Multiple labels can cause damage to the drive or cause the drive to fail.

Do the following to select the test device.

- Boot from the diagnostics diskette and start the diagnostics program.
- See if FDD Test is passed as the program runs to FDD Test.
- 3. Follow the instructions in the message window.

If an error occurs with the internal diskette drive, reconnect the diskette connector on the system board.

If the error still remains:

- 1. Reconnect the external diskette drive/DVD-ROM module.
- 2. Replace the external diskette drive/CD-ROM module.
- 3. Replace the main board.

External CD-ROM Drive Check

Do the following to isolate the problem to a controller, drive, or CD-ROM. Make sure that the CD-ROM does not have any label attached to it. The label can cause damage to the drive or can cause the drive to fail.

Do the following to select the test device:

- Boot from the diagnostics diskette and start the diagnostics program.
- 2. See if CD-ROM Test is passed when the program runs to CD-ROM Test.
- 3. Follow the instructions in the message window.

If an error occurs, reconnect the connector on the System board. If the error still remains:

- 1. Reconnect the external diskette drive/CD-ROM module.
- 2. Replace the external diskette drive/CD-ROM module.
- 3. Replace the main board.

Keyboard or Auxiliary Input Device Check

Remove the external keyboard if the internal keyboard is to be tested.

If the internal keyboard does not work or an unexpected character appears, make sure that the flexible cable extending from the keyboard is correctly seated in the connector on the system board.

If the keyboard cable connection is correct, run the Keyboard Test.

If the tests detect a keyboard problem, do the following one at a time to correct the problem. Do not replace a non-defective FRU:

- 1. Reconnect the keyboard cables.
- Replace the keyboard.
- 3. Replace the main board.

The following auxiliary input devices are supported by this computer:

| 30 | |
|----|---|
| | a |

External keyboard

If any of these devices do not work, reconnect the cable connector and repeat the failing operation.

Memory check

Memory errors might stop system operations, show error messages on the screen, or hang the system.

- 1. Boot from the diagnostics diskette and start the doagmpstotics program (please refer to main board.
- 2. Go to the diagnostic memory in the test items.
- 3. Press F2 in the test items.
- 4. Follow the instructions in the message window.

NOTE: Make sure that the DIMM is fully installed into the connector. A loose connection can cause an error.

Power System Check

To verify the symptom of the problem, power on the computer using each of the following power sources:

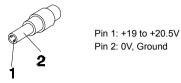

- 1. Remove the battery pack.
- 2. Connect the power adapter and check that power is supplied.
- **3.** Disconnect the power adapter and install the charged battery pack; then check that power is supplied by the battery pack.

If you suspect a power problem, see the appropriate power supply check in the following list:

- "Check the Power Adapter" on page 75
- □ "Check the Battery Pack" on page 76

Check the Power Adapter

Unplug the power adapter cable from the computer and measure the output voltage at the plug of the power adapter cable. See the following figure

- 1. If the voltage is not correct, replace the power adapter.
- 2. If the voltage is within the range, do the following:
 - Replace the System board.
 - ☐ If the problem is not corrected, see "Undetermined Problems" on page 89.
 - ☐ If the voltage is not correct, go to the next step.

NOTE: An audible noise from the power adapter does not always indicate a defect.

- **3.** If the power-on indicator does not light up, check the power cord of the power adapter for correct continuity and installation.
- 4. If the operational charge does not work, see "Check the Battery Pack" on page 76.

Check the Battery Pack

To check the battery pack, do the following:

From Software:

- Check out the Power Management in control Panel
- In Power Meter, confirm that if the parameters shown in the screen for Current Power Source and Total Battery Power Remaining are correct.
- 3. Repeat the steps 1 and 2, for both battery and adapter.
- 4. This helps you identify first the problem is on recharging or discharging.

From Hardware:

- 1. Power off the computer.
- 2. Remove the battery pack and measure the voltage between battery terminals 1(+) and 6(ground).
- 3. If the voltage is still less than 7.5 Vdc after recharging, replace the battery.

To check the battery charge operation, use a discharged battery pack or a battery pack that has less than 50% of the total power remaining when installed in the computer.

If the battery status indicator does not light up, remove the battery pack and let it return to room temperature. Re-install the battery pack.

If the charge indicator still does not light up, replace the battery pack. If the charge indicator still does not light up, replace the DC/DC charger board.

Touchpad Check

If the touchpad doesn't work, do the following actions one at a time to correct the problem. Do not replace a non-defective FRU:

- 1. Reconnect the touchpad cables.
- 2. Replace the touchpad.
- 3. Replace the system board.

After you use the touchpad, the pointer drifts on the screen for a short time. This self-acting pointer movement can occur when a slight, steady pressure is applied to the touchpad pointer. This symptom is not a hardware problem. No service actions are necessary if the pointer movement stops in a short period of time.

Power-On Self-Test (POST) Error Message

The POST error message index lists the error message and their possible causes. The most likely cause is listed first.

NOTE: Perform the FRU replacement or actions in the sequence shown in FRU/Action column, if the FRU replacement does not solve the problem, put the original part back in the computer. Do not replace a non-defective FRU.

This index can also help you determine the next possible FRU to be replaced when servicing a computer.

If the symptom is not listed, see "Undetermined Problems" on page 89.

The following lists the error messages that the BIOS displays on the screen and the error symptoms classified by function.

NOTE: Most of the error messages occur during POST. Some of them display information about a hardware device, e.g., the amount of memory installed. Others may indicate a problem with a device, such as the way it has been configured.

NOTE: If the system fails after you make changes in the BIOS Setup Utility menus, reset the computer, enter Setup and install Setup defaults or correct the error.

Index of Error Messages

Error Code List

| Error Codes | Error Messages |
|----------------------------|--|
| 006 | Equipment Configuration Error |
| | Causes: |
| | CPU BIOS Update Code Mismatch |
| | 2. IDE Primary Channel Master Drive Error |
| | (THe causes will be shown before "Equipment Configuration Error") |
| 010 | Memory Error at xxxx:xxxx:xxxxh (R:xxxxh, W:xxxxh) |
| 070 | Real Time Clock Error |
| 071 | CMOS Battery Bad |
| 072 | CMOS Checksum Error |
| 110 | System disabled. |
| | Incorrect password is specified. |
| <no code="" error=""></no> | Battery critical LOW |
| | In this situation BIOS will issue 4 short beeps then shut down system, no message will show. |
| <no code="" error=""></no> | Thermal critical High |
| | In this situation BIOS will shut down system, not show message. |

Error Message List

| Error Messages | FRU/Action in Sequence |
|--|--|
| Failure Fixed Disk | Reconnect hard disk drive connector. |
| | "Load Default Settings" in BIOS Setup Utility. |
| | Hard disk drive |
| | System board |
| Stuck Key | see "Keyboard or Auxiliary Input Device Check" on page 73. |
| Keyboard error | see "Keyboard or Auxiliary Input Device Check" on page 73. |
| Keyboard Controller Failed | see "Keyboard or Auxiliary Input Device Check" on page 73. |
| Keyboard locked - Unlock key switch | Unlock external keyboard |
| Monitor type does not match CMOS - Run Setup | Run "Load Default Settings" in BIOS Setup Utility. |
| Shadow RAM Failed at offset: nnnn | BIOS ROM |
| | System board |
| System RAM Failed at offset: nnnn | DIMM |
| | System board |
| Extended RAM Failed at offset: nnnn | DIMM |
| | System board |
| System battery is dead - Replace and run Setup | Replace RTC battery and Run BIOS Setup Utility to reconfigure system time, then reboot system. |
| System CMOS checksum bad - Default | RTC battery |
| configuration used | Run BIOS Setup Utility to reconfigure system time, then reboot system. |
| System timer error | RTC battery |
| | Run BIOS Setup Utility to reconfigure system time, then reboot system. |
| | System board |

Error Message List

| Error Messages | FRU/Action in Sequence |
|--|---|
| Real time clock error | RTC battery |
| | Run BIOS Setup Utility to reconfigure system time, then reboot |
| | system. |
| | System board |
| Previous boot incomplete - Default configuration | Run "Load Default Settings" in BIOS Setup Utility. |
| used | RTC battery |
| | System board |
| Memory size found by POST differed from | Run "Load Default Settings" in BIOS Setup Utility. |
| CMOS | DIMM |
| | System board |
| Diskette drive A error | Check the drive is defined with the proper diskette type in BIOS |
| | Setup Utility |
| | See "External Diskette Drive Check" on page 73. |
| Incorrect Drive A type - run SETUP | Check the drive is defined with the proper diskette type in BIOS |
| Outhors and a sure Outhor disable d | Setup Utility |
| System cache error - Cache disabled | System board |
| CPU ID: | System board |
| DMA Test Failed | DIMM |
| | System board |
| Software NMI Failed | DIMM |
| | System board |
| Fail-Safe Timer NMI Failed | DIMM |
| | System board |
| Device Address Conflict | Run "Load Default Settings" in BIOS Setup Utility. |
| | RTC battery |
| | System board |
| Allocation Error for device | Run "Load Default Settings" in BIOS Setup Utility. |
| | RTC battery |
| | System board |
| Failing Bits: nnnn | DIMM |
| | BIOS ROM |
| | System board |
| Fixed Disk n | None |
| Invalid System Configuration Data | BIOS ROM |
| | System board |
| I/O device IRQ conflict | Run "Load Default Settings" in BIOS Setup Utility. |
| | RTC battery |
| | System board |
| Operating system not found | Enter Setup and see if fixed disk and drive A: are properly identified. |
| | Diskette drive |
| | Hard disk drive |
| | System board |

Error Message List

| No beep Error Messages | FRU/Action in Sequence |
|---|---|
| No beep, power-on indicator turns off and LCD is blank. | Power source (battery pack and power adapter). See "Power System Check" on page 74. |
| | Ensure every connector is connected tightly and correctly. |
| | Reconnect the DIMM. |
| | LED board. |
| | System board. |
| No beep, power-on indicator turns on and LCD is blank. | Power source (battery pack and power adapter). See "Power System Check" on page 74. |
| | Reconnect the LCD connector |
| | Hard disk drive |
| | LCD inverter ID |
| | LCD cable |
| | LCD Inverter |
| | LCD |
| | System board |
| No beep, power-on indicator turns on and LCD is | Reconnect the LCD connectors. |
| blank. But you can see POST on an external | LCD inverter ID |
| CRT. | LCD cable |
| | LCD inverter |
| | LCD |
| | System board |
| No beep, power-on indicator turns on and a | Ensure every connector is connected tightly and correctly. |
| blinking cursor shown on LCD during POST. | System board |
| No beep during POST but system runs correctly. | Speaker |
| | System board |

Phoenix BIOS Beep Codes

| Code | Beeps | POST Routine Description |
|------|----------|--|
| 02h | | Verify Real Mode |
| 03h | | Disable Non-Maskable Interrupt (NMI) |
| 04h | | Get CPU type |
| 06h | | Initialize system hardware |
| 08h | | Initialize chipset with initial POST values |
| 09h | | Set IN POST flag |
| 0Ah | | Initialize CPU registers |
| 0Bh | | Enable CPU cache |
| 0Ch | | Initialize caches to initial POST values |
| 0Eh | | Initialize I/O component |
| 0Fh | | Initialize the local bus IDE |
| 10h | | Initialize Power Management |
| 11h | | Load alternate registers with initial POST |
| 1111 | | values |
| 12h | | Restore CPU control word during warm boot |
| 13h | | Initialize PCI Bus Mastering devices |
| 14h | | Initialize keyboard controller |
| 16h | 1-2-2-3 | BIOS ROM checksum |
| 17h | | Initialize cache before memory autosize |
| 18h | | 8254 timer initialization |
| 1Ah | | 8237 DMA controller initialization |
| 1Ch | | Reset Programmable Interrupt Controller |
| 20h | 1-3-1-1 | Test DRAM refresh |
| 22h | 1-3-1-3 | Test 8742 Keyboard Controller |
| 24h | | Set ES segment register to 4 GB |
| 26h | | Enable A20 line |
| 28h | | Autosize DRAM |
| 29h | | Initialize POST Memory Manager |
| 2Ah | | Clear 215 KB base RAM |
| 2Ch | 1-3-4-1 | RAM failure on address line xxxx |
| 2Eh | 1-3-4-3 | RAM failure on data bits xxxx of low byte of memory bus |
| 2Fh | | Enable cache before system BIOS shadow |
| 30h | 1-4-1-1 | RAM failure on data bits xxxx of high byte of memory bus |
| 32h | | Test CPU bus-clock frequency |
| 33h | | Initialize Phoenix Dispatch Manager |
| 36h | | Warm start shut down |
| 38h | | Shadow system BIOS ROM |
| 3Ah | | Autosize cache |
| 3Ch | | Advanced configuration of chipset registers |
| 3Dh | | Load alternate registers with CMOS values |
| 42h | | Initialize interrupt vectors |
| 45h | | POST device initialization |
| 46h | 2-1-2-3 | Check ROM copyright notice |
| | <u>l</u> | .,, . |

Index of Symptom-to-FRU Error Message

LCD-Related Symptoms

| Symptom / Error | Action in Sequence |
|--|---|
| LCD backlight doesn't work | Enter BIOS Utility to execute "Load Setup Default Settings", then |
| LCD is too dark | reboot system. |
| LCD brightness cannot be adjusted | Reconnect the LCD connectors. |
| LCD contrast cannot be adjusted | Keyboard (if contrast and brightness function key doesn't work). |
| | LCD inverter ID |
| | LCD cable |
| | LCD inverter |
| | LCD |
| | System board |
| Unreadable LCD screen | Reconnect the LCD connector |
| Missing pels in characters | LCD inverter ID |
| Abnormal screen | LCD cable |
| Wrong color displayed | LCD inverter |
| | LCD |
| | System board |
| LCD has extra horizontal or vertical lines | LCD inverter ID |
| displayed. | LCD inverter |
| | LCD cable |
| | LCD |
| | System board |

Indicator-Related Symptoms

| Symptom / Error | Action in Sequence |
|---|------------------------------|
| Indicator incorrectly remains off or on, but system | Reconnect the inverter board |
| runs correctly | Inverter board |
| | System board |

Power-Related Symptoms

| Symptom / Error | Action in Sequence |
|-----------------------------------|---|
| Power shuts down during operation | Power source (battery pack and power adapter). See "Power System Check" on page 74. |
| | Battery pack |
| | Power adapter |
| | Hard drive & battery connection board |
| | System board |
| The system doesn't power-on. | Power source (battery pack and power adapter). See "Power System Check" on page 74. |
| | Battery pack |
| | Power adapter |
| | Hard drive & battery connection board |
| | System board |
| The system doesn't power-off. | Power source (battery pack and power adapter). See "Power System Check" on page 74. |
| | Hold and press the power switch for more than 4 seconds. |
| | System board |
| Battery can't be charged | See "Check the Battery Pack" on page 76. |
| | Battery pack |
| | System board |

PCMCIA-Related Symptoms

| Symptom / Error | Action in Sequence | | |
|---|----------------------|--|--|
| System cannot detect the PC Card (PCMCIA) | PCMCIA slot assembly | | |
| | System board | | |
| PCMCIA slot pin is damaged. | PCMCIA slot assembly | | |

Memory-Related Symptoms

| Symptom / Error | Action in Sequence |
|--|--|
| Memory count (size) appears different from | Enter BIOS Setup Utility to execute "Load Default Settings, then |
| actual size. | reboot system. |
| | DIMM |
| | System board |

Speaker-Related Symptoms

| Symptom / Error | Action in Sequence |
|--|--------------------|
| In Windows, multimedia programs, no sound | Audio driver |
| comes from the computer. | Speaker |
| | System board |
| Internal speakers make noise or emit no sound. | Speaker |
| | System board |

Power Management-Related Symptoms

| Symptom / Error | Action in Sequence | | | |
|---|--|--|--|--|
| The system will not enter hibernation | Keyboard (if control is from the keyboard) | | | |
| | Hard disk drive | | | |
| | System board | | | |
| The system doesn't enter hibernation mode and | See "S4 Sleeping State" on page 36. | | | |
| four short beeps every minute. | Press Fn+F4 and see if the computer enters hibernation mode. | | | |
| | Touchpad | | | |
| | Keyboard | | | |
| | Hard disk connection board | | | |
| | Hard disk drive | | | |
| | System board | | | |
| The system doesn't enter standby mode after | See "S4 Sleeping State" on page 36. | | | |
| closing the LCD | LCD cover switch | | | |
| | System board | | | |
| The system doesn't resume from hibernation | See "S4 Sleeping State" on page 36. | | | |
| mode. | Hard disk connection board | | | |
| | Hard disk drive | | | |

Power Management-Related Symptoms

| Symptom / Error | Action in Sequence | | |
|------------------------------|------------------------------------|--|--|
| System hangs intermittently. | Reconnect hard disk/CD-ROM drives. | | |
| | Hard disk connection board | | |
| | System board | | |

Peripheral-Related Symptoms

| Symptom / Error | Action in Sequence | | | | |
|--|--|--|--|--|--|
| System configuration does not match the installed devices. | Enter BIOS Setup Utility to execute "Load Default Settings", then reboot system. | | | | |
| | Reconnect hard disk/CD-ROM/diskette drives. | | | | |
| External display does not work correctly. | Press Fn+F5, LCD/CRT/Both display switching | | | | |
| | System board | | | | |
| USB does not work correctly | System board | | | | |
| Print problems. | Ensure the "Parallel Port" in the "Onboard Devices Configuration" of BIOS Setup Utility is set to Enabled. | | | | |
| | Onboard Devices Configuration | | | | |
| | Run printer self-test. | | | | |
| | Printer driver | | | | |
| | Printer cable | | | | |
| | Printer | | | | |
| | System Board | | | | |
| Serial or parallel port device problems. | Ensure the "Serial Port" in the Devices Configuration" of BIOS Setup Utility is set to Enabled. | | | | |
| | Device driver | | | | |
| | Device cable | | | | |
| | Device | | | | |
| | System board | | | | |

Keyboard/Touchpad-Related Symptoms

| Symptom / Error | Action in Sequence | | |
|--|-------------------------------|--|--|
| Keyboard (one or more keys) does not work. | Reconnect the keyboard cable. | | |
| | Keyboard | | |
| | System board | | |
| Touchpad does not work. | Reconnect touchpad cable. | | |
| | Touchpad board | | |
| | System board | | |

Modem-Related Symptoms

| Symptom / Error | Action in Sequence | | |
|---|--------------------|--|--|
| Internal modem does not work correctly. | Modem phone port | | |
| | modem combo board | | |
| | System board | | |

NOTE: If you cannot find a symptom or an error in this list and the problem remains, see "Undetermined Problems" on page 89.

Intermittent Problems

Intermittent system hang problems can be caused by a variety of reasons that have nothing to do with a hardware defect, such as: cosmic radiation, electrostatic discharge, or software errors. FRU replacement should be considered only when a recurring problem exists.

When analyzing an intermittent problem, do the following:

- 1. Run the advanced diagnostic test for the system board in loop mode at least 10 times.
- 2. If no error is detected, do not replace any FRU.
- 3. If any error is detected, replace the FRU. Rerun the test to verify that there are no more errors.

Undetermined Problems

The diagnostic problems does not identify which adapter or device failed, which installed devices are incorrect, whether a short circuit is suspected, or whether the system is inoperative.

Follow these procedures to isolate the failing FRU (do not isolate non-defective FRU).

NOTE: Verify that all attached devices are supported by the computer.

NOTE: Verify that the power supply being used at the time of the failure is operating correctly. (See "Power System Check" on page 74):

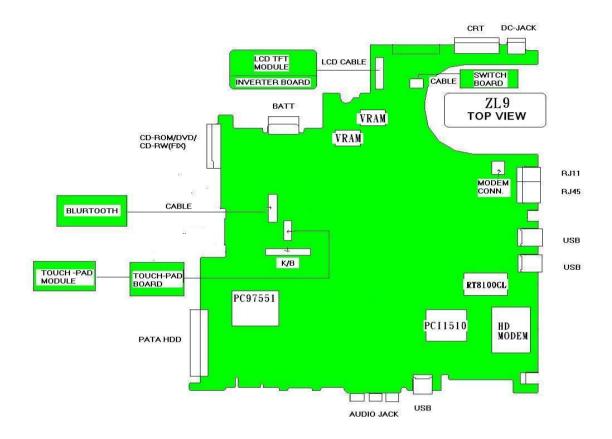

- 1. Power-off the computer.
- 2. Visually check them for damage. If any problems are found, replace the FRU.
- 3. Remove or disconnect all of the following devices:

| Non-Acer devices |
|--|
| Printer, mouse, and other external devices |
| Battery pack |
| Hard disk drive |
| DIMM |
| CD-ROM/Diskette drive Module |
| PC Cards |

- 4. Power-on the computer.
- 5. Determine if the problem has changed.
- 6. If the problem does not recur, reconnect the removed devices one at a time until you find the failing FRU.
- 7. If the problem remains, replace the following FRU one at a time. Do not replace a non-defective FRU:
 - System board
 - □ LCD assembly

Chapter 5 92

FRU (Field Replaceable Unit) List

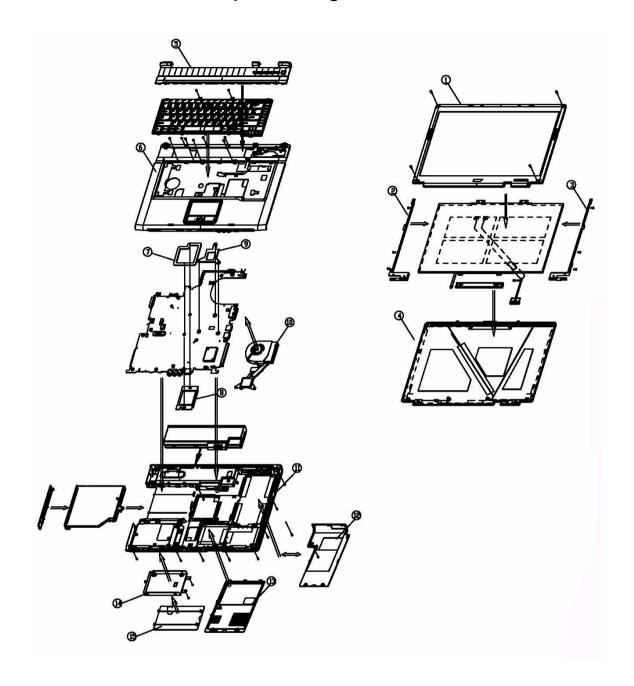

This chapter gives you the FRU (Field Replaceable Unit) listing in global configurations of TravelMate 4070/4080. Refer to this chapter whenever ordering for parts to repair or for RMA (Return Merchandise Authorization).

Please note that WHEN ORDERING FRU PARTS, you should check the most up-to-date information available on your regional web or channel. For whatever reasons a part number change is made, it will not be noted on the printed Service Guide. For ACER AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code from those given in the FRU list of this printed Service Guide. You MUST use the local FRU list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

NOTE: To scrap or to return the defective parts, you should follow the local government ordinance or regulations on how to dispose it properly, or follow the rules set by your regional Acer office on how to return it.
