Other brand and product names are trademarks and/or registered trademarks of their respective holders.

Conventions

The following conventions are used in this manual:

SCREEN MESSAGES	Denotes actual messages that appear on screen.
NOTE	Gives bits and pieces of additional information related to the current topic.
WARNING	Alerts you to any damage that might result from doing or not doing specific actions.
CAUTION	Gives precautionary measures to avoid possible hardware or software problems.
IMPORTANT	Reminds you to do specific actions relevant to the accomplishment of procedures.

Preface

Before using this information and the product it supports, please read the following general information.

- 1. This Service Guide provides you with all technical information relating to the BASIC CONFIGURATION decided for Acer's "global" product offering. To better fit local market requirements and enhance product competitiveness, your regional office MAY have decided to extend the functionality of a machine (e.g. add-on card, modem, or extra memory capability). These LOCALIZED FEATURES will NOT be covered in this generic service guide. In such cases, please contact your regional offices or the responsible personnel/channel to provide you with further technical details.
- 2. Please note WHEN ORDERING FRU PARTS, that you should check the most up-to-date information available on your regional web or channel. If, for whatever reason, a part number change is made, it will not be noted in the printed Service Guide. For ACER-AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code to those given in the FRU list of this printed Service Guide. You MUST use the list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

System Block Diagram

Your Acer Notebook tour

After knowing your computer features, let us show you around your new computer.

Front View

	Icon	Item	Description
1	100	Microphone	Internal microphone for sound recording.
2		Acer Crystal Eye webcam	Web camera for video communication (only for certain models).
3		Display screen	Also called Liquid-Crystal Display (LCD), displays computer output.
4	e	Empowering key	Launch Acer Empowering Technology.
5		Productivity keys	Three productivity keys give users one-touch access to protection and manageability features for a more secure, smarter and easier way to work.
6		Easy-launch buttons	Buttons for launching frequently used programs.

	Icon	Item	Description
7		Palmrest	Comfortable support area for your hands when you use the computer.
8		Status indicators	Light-Emitting Diodes (LEDs) that light up to show the status of the computer's functions and components.
9		Click buttons (left, center* and right)	The left and right buttons function like the left and right mouse buttons. *The center button serves as Acer BioProtect fingerprint reader supporting Acer FingerNav 4-way control function (only for certain models).
10		Touchpad	Touch-sensitive pointing device which functions like a computer mouse.
11		FineTrack buttons (left and right)	Function like the left and right mouse buttons when used together with the center-keyboard FineTrack.
12		FineTrack	Touch-sensitive pointing device which functions like a computer mouse when used together with the click buttons.
13		Keyboard	For entering data into your computer.
14	Ů	Power button	Turns the computer on and off.

Closed Front View

	Icon	Item	Description
1		Infrared port	Interfaces with infrared devices (e.g.,infrared printer and IR-aware computer).
2.1	1817	Microphone jack	Accepts inputs from external microphones.
2.2)	Headphones/	Connects to audio line-out devices
	60	speaker/line-out jack.	(e.g., speakers, headphones).
3	3G/	3G/Bluetooth	Enables/disables the 3G/Bluetooth function. Indicates
	30	communication	the status of 3G/Bluetooth communication.
	*	switch/indicator	(only for certain models)
4	\tilde{C}	Wireless	Enables/disables the wireless function.
		communication switch/indicator	Indicates the status of wireless LAN communication.
5		Speakers	Left and right speakers deliver stereo audio output.
6		Latch	Locks and releases the lid.

Left View

#	Icon	Item	Description
1	R	Kensington lock slot	Connects to a Kensington-compatible computer security lock.
2		Ventilation slots	Enable the computer to stay cool, even after prolonged use.
3		External display (VGA) port	Connects to a display device (e.g., external monitor, LCD projector).
4	• *	USB 2.0 port	Connect to USB 2.0 devices (e.g., USB mouse, USB camera).
5	۵	SmartCard slot	Accepts the TravelMate SmartCard.
6	ExpressCard / 54	ExpressCard/54	Accepts one ExpressCard/54 module.
	Expressed and 7 64	slot	Note: Push to remove/install the card.
7		PC Card slot	Accepts one Type II PC Card.
8		PC Card slot eject button	Ejects the PC Card from the slot.

Right View

	Icon	Item	Description
1		Optical drive	Internal optical drive; accepts CDs or DVDs.
2		Optical disk access indicator	Lights up when the optical drive is active.
3		Optical drive eject button	Ejects the optical disk from the drive.
4		Emergency eject hole	Ejects the optical drive tray when the computer is turned off. Note: Insert a paper clip to the emergency eject hole to eject the optical drive tray when the computer is off.
5	PRO	5-in-1 card reader	Accepts Secure Digital (SD), MultiMediaCard (MMC), Memory Stick (MS), Memory Stick Pro (MS PRO), and xD-Picture Card. Note: Push to remove/install the card. Only one card can operate at any given time.
6	●	2 USB 2.0 ports	Connect to USB 2.0 devices (e.g., USB mouse, USB camera).
7		Modem (RJ-11) port	Connects to a phone line.

Rear View

#	Icon	Item	Description
1		DC-in jack	Connects to an AC adapter.
2	용	Ethernet (RJ-45) port	Connects to an Ethernet 10/100/1000-based network.
3	DVI-D	Digital Video Interface -Digital port	Supports digital video connections.

Bottom View

	Icon	Item	Description
1	₫	Battery bay	Houses the computer's battery pack.
2		Battery lock	Locks the battery in position.
3		Battery release latch	Releases the battery to remove the battery pack.
4	·	Memory compartment	Houses the computer's main memory.
5		Acer MediaBay release latch	Lock or unlock Acer MediaBay device.
6		Hard disk bay	Houses the computer's hard disk (secured with screws)
7		Acer DASP (Disk Anti-Shock Protection)	Protects the hard disk drive from shocks and bumps (only for certain models).
8	a	ezDock II/II+ connector	Connects to Acer ezDock II/II+.
9		Ventilation slots	Enable the computer to stay cool, even after prolonged use.

Indicators

The computer has several easy-to-read status indicators. The front panel indicators are visible even when the computer cover is closed.

lcon	Function	Description
*	HDD	Indicates when the hard disk drive is active.
1	Num Lock	Lights up when Num Lock is activated.
A	Caps Lock	Lights up when Caps Lock is activated.
\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\	Power	Indicates the computer's power status.
₫	Battery	Indicates the computer's battery status.
*	Bluetooth (Manufacturing option)	Indicates the status of Bluetooth communication.
C	Wireless LAN (Manufacturing option)	Indicates the status of wireless LAN communication.

NOTE: 1. **Charging:** The light shows amber when the battery is charging. 2. **Fully charged:** The light shows green when in AC mode.

Easy-Launch Buttons

Located beside the keyboard are application buttons. These buttons are called easy-launch buttons. They are: WLAN, Internet, email, Bluetooth, Arcade and Acer Empowering Technology.

The mail and Web browser buttons are pre-set to email and Internet programs, but can be reset by users. To set the Web browser, mail and programmable buttons, run the Acer Launch Manager. You can access the Launch Manager by clicking on Start, All Programs, and then Launch Manager to start the application.

lcon	Function	Description	
e	Acer Empowering Technology	Launch Acer Empowering Technology (user-programmable)	
2	Web browser	Internet browser (user-Programmable)	
Mail Mail		Email application (user-Programmable)	
Р	Programmable key	User-programmable	

Productivity keys (only for certain models)

Three productivity keys give users one-touch access to protection and manageability features for a more secure, smarter and easier way to work.

- Lock key runs the Windows[®] lock function to lock the notebook when you step out. If the laptop is equipped with Acer Bio-Protection, you only need to swipe your finger to log into Windows[®] again.
- Presentation key minimizes open application windows and prepares the display for impressive presentations.
- Sync key instantly synchronizes your computer system to an external storage device, for convenient

and secure backup.

Icon	Productivity key	Default application
P	Lock	Launch Windows Lock function
Presentation		Minimizes your open windows and prepares your display for presenting
ti	Sync	Launch NTI Shadow

Touchpad Basics (with fingerprint reader)

The following items show you how to use the touchpad with Acer Bio-Protection fingerprint reader.

- ☐ Move your finger across the touchpad (2) to move the cursor.
- Press the left (1) and right (4) buttons located beneath the touchpad to perform selection and execution functions. These two buttons are similar to the left and right buttons on a mouse. Tapping on the touchpad is the same as clicking the left button.
- Use Acer Bio-Protection fingerprint reader (3) supporting Acer FingerNav 4-way control function (only for certain models) to scroll up or down and move left or right a page. This fingerprint reader or button mimics your cursor pressing on the right scroll bar of Windows applications.

Function	Left button (1)	Right button (4)	Main touchpad (2)	Center button (3)
Execute	Quickly click twice.		Tap twice (at the same speed as double-clicking a mouse button).	
Select	Click once.		Tap once.	
Drag	Click and hold, then use finger on the touchpad to drag the cursor.		Tap twice (at the same speed as double-clicking a mouse button); rest your finger on the touchpad on the second tap and drag the cursor.	
Access context menu		Click once.		
Scroll				Swipe up/down/left/right using Acer FingerNav 4-way control function (Manufacturing option).

Touchpad basics (with two-click buttons)

The following items show you how to use the touchpad with two-click buttons.

- ☐ Move your finger across the touchpad (1) to move the cursor.
- Press the left (2) and right (3) buttons located beneath the touchpad to perform selection and execution functions. These two buttons are similar to the left and right buttons on a mouse. Tapping on the touchpad is the same as clicking the left button.

Function	Left button (2)	Right button (3)	Main touchpad (1)
Execute	Quickly click twice.		Tap twice (at the same speed as double-clicking a mouse button).
Select	Click once.		Tap once.
Drag	Click and hold, then use finger on the touchpad to drag the cursor.		Tap twice (at the same speed as double-clicking a mouse button); rest your finger on the touchpad on the second tap and drag the cursor.
Access context menu		Click once.	

NOTE: Illustrations for reference only. The exact configuration of your PC depends on the model purchased.

NOTE: When using the touchpad, keep it — and your fingers — dry and clean. The touchpad is sensitive to finger movement; hence, the lighter the touch, the better the response. Tapping harder will not increase the touchpad's responsiveness.

NOTE: By default, vertical and horizontal scrolling is enabled on your touchpad. It can be disabled under Mouse settings in Windows Control Panel.

Using the Keyboard

The keyboard has full-sized keys and an embedded numeric keypad, separate cursor, lock, Windows, function and special keys.

Lock Keys and embedded numeric keypad

The keyboard has three lock keys which you can toggle on and off.

Lock key	Description
Caps Lock	When Caps Lock is on, all alphabetic characters typed are in uppercase.
Num Lock <fn> + <f11></f11></fn>	When Num Lock is on, the embedded keypad is in numeric mode. The keys function as a calculator (complete with the arithmetic operators +, -, *, and /). Use this mode when you need to do a lot of numeric data entry. A better solution would be to connect an external keypad.
	NOTE: <fn> + <f11> works only for certain models.</f11></fn>
Scroll Lock <fn> + <f12></f12></fn>	When Scroll Lock is on, the screen moves one line up or down when you press the up or down arrow keys respectively. Scroll Lock does not work with some applications.

The embedded numeric keypad functions like a desktop numeric keypad. It is indicated by small characters located on the upper right corner of the key caps. To simplify the keyboard legend, cursor-control key symbols are not printed on the keys.

Desired access	Num Lock on	Num Lock off
Number keys on embedded keypad	Type numbers in a normal manner.	
Cursor-control keys on embedded keypad	Hold <shift></shift> while using cursor-control keys.	Hold <fn></fn> while using cursor-control keys.
Main keyboard keys	Hold <fn></fn> while typing letters on embedded keypad.	Type the letters in a normal manner.

Windows Keys

The keyboard has two keys that perform Windows-specific functions.

Key	Description	
Windows key	Pressed alone, this key has the same effect as clicking on the Windows Start button; it launches the Start menu. It can also be used with other keys to provide a variety of functions:	
	<>>: Open or close the Start menu	
	<>> + <d>: Display the desktop</d>	
	< ₹> + <e>:</e> Open Windows Explore	
	< (▶) + <f>: Search for a file or folder</f>	
	<>> + <g>: Cycle through Sidebar gadgets</g>	
	< > + <l>: Lock your computer (if you are connected to a network domain), or switch users (if you're not connected to a network domain)</l>	
	<>> + <m>: Minimizes all windows</m>	
	<>> + <r>: Open the Run dialog box</r>	
	< ₽> + <t>:</t> Cycle through programs on the taskbar	
	<>> + <u>: Open Ease of Access Center</u>	
	<>> + <x>: Open Windows Mobility Center</x>	
	< ₽> + <break>:</break> Display the System Properties dialog box	
	< ₹ > + < SHIFT+M>: Restore minimized windows to the desktop	
	< ☞> + <tab>:</tab> Cycle through programs on the taskbar by using Windows Flip 3-D	
	< ₹ > + < SPACEBAR>: Bring all gadgets to the front and select Windows Sidebar	
	<ctrl> + <(♣)> + <f>: Search for computers (if you are on a network)</f></ctrl>	
	<ctrl> + <(**)> + <tab>: Use the arrow keys to cycle through programs on the taskbar by using Windows Flip 3-D Note: Depending on your edition of Windows Vista,</tab></ctrl>	
	some shortcuts may not function as described.	
Application key	This key has the same effect as clicking the right mouse button; it opens the application's context menu.	

Hot Keys

The computer employs hotkeys or key combinations to access most of the computer's controls like screen brightness, volume output and the BIOS utility.

To activate hot keys, press and hold the **<Fn>** key before pressing the other key in the hotkey combination.

Hotkey	Icon	Function	Description
<fn> + <f1></f1></fn>	?	Hotkey help	Displays help on hotkeys.
<fn> + <f2></f2></fn>	©	Acer eSettings	Launches Acer eSettings in Acer Empowering Technology.
<fn> + <f3></f3></fn>	♦	Acer ePower Management	Launches Acer ePower Management in Acer Empowering Technology.
<fn> + <f4></f4></fn>	Z ^z	Sleep	Puts the computer in Sleep mode.
<fn> + <f5></f5></fn>		Display toggle	Switches display output between the display screen, external monitor (if connected) and both.
<fn> + <f6></f6></fn>	*	Screen blank	Turns the display screen backlight off to save power. Press any key to return.
<fn> + <f7></f7></fn>		Touchpad toggle	Turns the internal touchpad on and off.
<fn> + <f8></f8></fn>	□ / □ >	Speaker toggle	Turns the speakers on and off.
<fn> + <>></fn>	·Ö.	Brightness up	Increases the screen brightness.
<fn> + <⊲></fn>		Brightness down	Decreases the screen brightness.
<fn> + <△></fn>	()	Volume up	Increases the sound volume (only for certain models).
<fn> + <∇></fn>	()	Volume down	Decreases the sound volume (only for certain models).

Special Key (only for certain models)

You can locate the Euro symbol and the US dollar sign at the upper-center and/or bottom-right of your keyboard.

The Euro symbol

- 1. Open a text editor or word processor.
- 2. Either press < € > at the bottom-right of the keyboard, or hold <Alt Gr> and then press the <5> key at the upper-center of the keyboard.

NOTE: Some fonts and software do not support the Euro symbol. Please refer to www.microsoft.com/typography/faq/faq12.htm for more information.

The US dollar sign

- 1. Open a text editor or word processor.
- 2. Either press < \$ > at the bottom-right of the keyboard, or hold **<Shift>** and then press the **<4>** key at the upper-center of the keyboard.

NOTE: This function varies according to the language settings.

Acer Empowering Technology

The Empowering Technology toolbar makes it easy for you to access frequently used functions and manage your new Acer system. Activated by pressing the Empowering Key, it provides access to the following utilities:

NOTE: The following content is for general reference only. Actual product specifications may vary.

- □ Acer eDataSecurity Management protects data with passwords and encryption (only for certain models).
- ☐ Acer ePower Management optimizes battery usage via customizable power plans.
- Acer eRecovery Management backs up and recovers data flexibly, reliably and completely.
- Acer eSettings Management accesses system information and adjusts settings easily.

For more information, right-click on the Empowering Technology toolbar, then select **Help**. For help with a particular utility, launch the utility and click the o icon at the bottom of the active window.

Launching Acer Empowering Technology

To launch Acer Empowering Technology:

- 1. Press the Empowering Key to display the Acer Empowering Technology toolbar on the desktop.
- 2. To hide the toolbar, press the Empowering Key again or click the hide button on the toolbar. You may also launch Acer Empowering Technology by running the program from the Acer Empowering Technology program group in the Start menu, or by double-clicking the icon if you have created a desktop shortcut.

To launch Acer Empowering Technology applications:

- 1. On the Acer Empowering Technology toolbar, click the icon that corresponds to the application you want to launch.
- 2. When you mouse over an application icon, a quick menu appears below the toolbar. The quick menu allows you to perform certain tasks simply and quickly.

3. You may also run the application by selecting it from the Acer Empowering Technology program group in the Start menu.

Empowering Technology password

You must set the Empowering Technology password to use the password protection feature of Acer eRecovery Management to protect your data.

To set the Empowering Technology password:

- 1. Launch Acer eRecovery Management.
- 2. Click the Restore tab.
- 3. Click Password settings. The Empowering Technology Password Center dialogue box pops up.
- 4. Click Create a new password.

- In the Create a New Password dialogue box, key in and confirm your password in the appropriate boxes. Your password should have a minimum of 4 and a maximum of 12 characters.
- 6. Enter a password hint that will help you remember your password.
- 7. Make sure the box Use for Acer eRecovery Management is checked.
- 8. Click **OK** to set the password.

Acer ePower Management

Acer ePower Management features a straightforward user interface for configuring your power management options. To access this utility, select **Acer ePower Management** from the Empowering Technology toolbar, run the program from the Acer Empowering Technology program group in Start menu, or right-click the Windows power icon in the system tray and select **Acer ePower Management**.

Using power plans

Acer ePower Management comes with three predefined power plans: Balanced, High performance and Power saver. You can also create customized power plans. You can create, switch between, edit, delete and restore power plans, as described below.

View and adjust settings for On Battery and Plugged In modes by clicking the appropriate tabs. For more power options, click in the Acer ePower Management utility, or right-click the Windows power icon in the system tray and select **Power Options**.

NOTE: You cannot delete the predefined power plans.

To create a new power plan:

Creating customized power plans allows you to save and quickly switch to a personalized set of power options.

1. Click the **New power plan** option or icon

- 2. Enter a name for your new power plan.
- 3. Choose a predefined power plan to base your customized plan on.
- 4. If necessary, change the display, sleep and hibernation settings you want your computer to use.
- Click **OK** to save your new power plan.

To switch between power plans:

- Mouse over the Acer ePower Management application on the Acer Empowering Technology toolbar. The quick menu appears. Select the power plan you want to switch to.
- 2. You may also switch between power plans by launching the Acer ePower Management application. Select the power plan you wish to switch to, then click **Apply**.

To edit a power plan:

Editing a power plan allows you to adjust system settings like LCD brightness and CPU speed.

- 1. Switch to the power plan you wish to edit.
- 2. Adjust settings as required.
- 3. Click Apply to save your new settings.

To delete a power plan:

You cannot delete the power plan you are currently using. If you want to delete the active power plan, switch to another one first.

- 1. Select the power plan you wish to delete.
- 2. Click the Delete Power Plan icon.

Battery status

- 1. The quick menu shows the remaining battery life based on current usage.
- 2. You can also launch the Acer ePower Management application and refer to the Battery status panel located just below the power plans.

Click the Battery tab to view remaining battery life, battery status, and remaining battery life in standby and hibernate modes.

Acer eDataSecurity Management

Acer eDataSecurity Management is an encryption utility that protects your files from being accessed by unauthorized persons. It is conveniently integrated with Windows Explorer as a shell extension for quick data encryption/decryption and also supports on-the-fly file encryption for Lotus Notes and Microsoft Outlook.

On first use, the Acer eDataSecurity Management setup wizard will prompt you to create the Master Password. You will use this password to access the Personal Secure Disk (PSD). The Master Password may also be used to encrypt/decrypt files by default.

If you set a different password to encrypt a file, but you forgot the encryption password, you can use the Master Password to decrypt the file.

NOTE: The password used to encrypt a file is the unique key that the system needs to decrypt it. If you lose the password, the Master Password is the only other key capable of decrypting the file. If you lose both

passwords, there will be no way to decrypt your encrypted file! **Be sure to safeguard all related** passwords!

Acer eRecovery Management

Acer eRecovery Management is a versatile backup utility. It allows you to create full or incremental backups, burn the factory default image to optical disc, and restore from previously created backups or reinstall applications and drivers. By default, user-created backups are stored to the D:\ drive.

Acer eRecovery Management provides you with:

- Backup:
 - ▶Back up factory default to CD/DVD
 - ▶Back up drivers and applications to CD/DVD
 - ◆Create user backup
 - ▶Manage user backups
- Restore:
 - ▶Restore system to factory default
 - ▶Reinstall applications/drivers
 - ▶Restore system from user backup
 - ▶Password settings

To use the password protection feature of Acer eRecovery Management to protect your data, you must first set the Empowering Technology password. To set the password, refer to the section "**Empowering Technology password**".

NOTE: If your computer did not come with a Recovery CD or System CD, please use Acer eRecovery Management's Backup factory default to CD/DVD feature to burn a backup image to CD or DVD. To ensure the best results when recovering your system using a CD or Acer eRecovery Management, detach all peripherals (except the external Acer ODD, if your computer has one), including your Acer ezDock.

Acer eSettings Management

Acer eSettings Management allows you to inspect hardware specifications, set BIOS passwords and modify boot options.

Acer eSettings Management also:

- Provides a simple graphical user interface for navigation.
- Prints and saves hardware specifications.
- Lets you set an asset tag for your system.

Windows Mobility Center

The Windows Mobility Center collects key mobile-related system settings in one easy-to-find place, so you can quickly configure your Acer system to fit the situation as you change locations, networks or activities. Settings include display brightness, volume, power plan, wireless networking on/off, external display settings, synchronization status and presentation settings.

Windows Mobility Center also includes Acer-specific settings like sharing folders overview/sharing service on or off, Bluetooth Add Device (if applicable), and a shortcut to the Acer user guide, drivers and utilities.

To launch Windows Mobility Center:

- ☐ Use the shortcut key <(\bigcirc) > + <X>.
- ☐ Start Windows Mobility Center from the Control panel.
- ☐ Start Windows Mobility Center from the Accessories program group in the Start menu.
- Launch Windows Mobility Center by right-clicking in the system tray and select Windows Mobility Center.

Using the System Utilities

Acer Bio-Protection (only for certain models)

Acer Bio-Protection Fingerprint Solution is a multi-purpose fingerprint software package integrated with the Microsoft Windows operating system. Utilizing the uniqueness of one's fingerprint features, Acer Bio-Protection Fingerprint Solution has incorporated protection against unauthorized access to your computer with centralized password management with Password Bank, easy music player launching with Acer MusicLaunch, secure Internet favorites via Acer MyLaunch, and fast application/website launching and login with Acer FingerLaunch, while Acer ProfileLaunch can launch up to three applications/websites from a single finger swipe.

Acer Bio-Protection Fingerprint Solution also allows you to navigate through web browsers and documents using Acer FingerNav. With Acer Bio-Protection Fingerprint Solution, you can now enjoy an extra layer of protection for your personal computer, as well as the convenience of accessing your daily tasks with a simple swipe of your finger!

For more information refer to the Acer Bio-Protection help files.

Acer GridVista (dual-display compatible)

NOTE: This feature is only available on certain models.

To enable the dual monitor feature of the notebook, first ensure that the second monitor is connected, then select **Start, Control Panel, Display** and click on **Settings**. Select the secondary monitor **(2)** icon in the display box and then click the check box **Extend my windows desktop onto this monitor**. Finally, click **Apply** to confirm the new settings and click **OK** to complete the process.

Acer GridVista is a handy utility that offers four pre-defined display settings so you can view multiple windows on the same screen. To access this function, please go to **Start>All Programs** and click on **Acer GridVista**. You may choose any one of the four display settings indicated below:

Double (vertical), Triple (primary at left), Triple (primary at right), or Quad Acer Gridvista is dual-display compatible, allowing two displays to be partitioned independently.

Acer Gridvista is dual-display compatible, allowing two displays to be partitioned independently.

AcerGridVista is simple to set up:

- 1. Run Acer GridVista and select your preferred screen configuration for each display from the task bar.
- 2. Drag and drop each window into the appropriate grid.
- 3. Enjoy the convenience of a well-organized desktop.

Chapter 1 27

NOTE: Please ensure that the resolution setting of the second monitor is set to the manufacturer's recommended value.

Chapter 1 35

System Utilities

BIOS Setup Utility

The BIOS Setup Utility is a hardware configuration program built into your computer's BIOS (Basic Input/Output System).

Your computer is already properly configured and optimized, and you do not need to run this utility. However, if you encounter configuration problems, you may need to run Setup. Please also refer to Chapter 4 Troubleshooting when problem arises.

To activate the BIOS Utility, press **F2** during POST (when "Press <F2> to enter Setup" message is prompted on the bottom of screen).

Press **F2** to enter setup. The default parameter of F12 Boot Menu is set to "disabled". If you want to change boot device without entering BIOS Setup Utility, please set the parameter to "enabled".

Press <F12> during POST to enter multi-boot menu. In this menu, user can change boot device without entering BIOS SETUP Utility.

Navigating the BIOS Utility

There are six menu options: Information, Main, Security, Boot, and $\mbox{\rm Exit.}$

Follow these instructions:

To choose a menu, use the left and right arrow keys.
To choose an item, use the up and down arrow keys.
To change the value of a parameter, press F5 or F6.
A plus sign (+) indicates the item has sub-items. Press Enter to expand this item.
Press Esc while you are in any of the menu options to go to the Exit menu.
In any menu, you can load default settings by pressing F9 . You can also press F10 to save any changes made and exit the BIOS Setup Utility.

NOTE: You can change the value of a parameter if it is enclosed in square brackets. Navigation keys for a particular menu are shown on the bottom of the screen. Help for parameters are found in the Item Specific Help part of the screen. Read this carefully when making changes to parameter values. **Please note that system information is subject to different models**.

Information

The Information screen displays a summary of your computer hardware information.

NOTE: The system information is subject to different models.

Parameter	Description
CPU Type	This field shows the CPU type and speed of the system.
CPU Speed	This field shows the speed of the CPU.
IDE0 Model Name	This field shows the model name of HDD installed on primary IDE master.
IDE0 Serial Number	This field displays the serial number of HDD installed on primary IDE master.
ATAPI Model Name	This field shows the model name of the Optical device installed in the system.
System BIOS Version	Displays system BIOS version.
VGA BIOS Version	This field displays the VGA firmware version of the system.
KBC Ver	This field shows the keyboard
Serial Number	This field displays the serial number of this unit.
Asset Tag Number	This field displays the asset tag number of the system.
Product Name	This field shows product name of the system.
Manufacturer Name	This field displays the manufacturer of this system.
UUID Number	Universally Unique Identifier (UUID) is an identifier standard used in software construction, standardized by the Open Software Foundation (OSF) as part of the Distributed Computing Environment (DCE).

Main

The Main screen allows the user to set the system time and date as well as enable and disable boot option and recovery.

NOTE: The screen above is for your reference only. Actual values may differ.

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

Parameter	Description	Format/Option
System Time	Sets the system time. The hours are displayed with 24-hour format.	Format: HH:MM:SS (hour:minute:second) System Time
System Date	Sets the system date.	Format MM/DD/YYYY (month/day/ year) System Date
System Memory	This field reports the memory size of the system. Memory size is fixed to 640MB	
Extended Memory	This field reports the memory size of the extended memory in the system. Extended Memory size=Total memory size-1MB	
VGA Memory	Shows the VGA memory size.	
Quiet Boot	Determines if Customer Logo will be displayed or not; shows Summary Screen is disabled or enabled. Enabled: Customer Logo is displayed, and Summary Screen is disabled. Disabled: Customer Logo is not displayed, and Summary Screen is enabled.	Option: Enabled or Disabled
Network Boot	Enables, disables the system boot from LAN (remote server).	Option: Enabled or Disabled
F12 Boot Menu	Enables, disables Boot Menu during POST.	Option: Disabled or Enabled
D2D Recovery	Enables, disables D2D Recovery function. The function allows the user to create a hidden partition on hard disc drive to store operation system and restore the system to factory defaults.	Option: Enabled or Disabled
SATA Mode	Control the mode in which the SATA controller should operate.	Option: AHCI or IDE

NOTE: The sub-items under each device will not be shown if the device control is set to disable or auto. This is because the user is not allowed to control the settings in these cases.

Security

The Security screen contains parameters that help safeguard and protect your computer from unauthorized use.

NOTE: Please refer to "Remove HDD/BIOS Password" section if you need to know how to remove HDD/BIOS Password.

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

Parameter	Description	Option
Supervisor Password Is	Shows the setting of the Supervisor password	Clear or Set
User Password Is	Shows the setting of the user password.	Clear or Set
HDD Password Is	Shows the setting of the hard disk password.	Clear or Set
Set Supervisor Password	Press Enter to set the supervisor password. When set, this password protects the BIOS Setup Utility from unauthorized access. The user can not either enter the Setup menu nor change the value of parameters.	
Set User Password	Press Enter to set the user password. When user password is set, this password protects the BIOS Setup Utility from unauthorized access. The user can enter Setup menu only and does not have right to change the value of parameters.	
Set HDD Password	Enter HDD Password.	
Password on Boot	Defines whether a password is required or not while the events defined in this group happened. The following sub-options are all requires the Supervisor password for changes and should be grayed out if the user password was used to enter setup.	Disabled or Enabled

NOTE: When you are prompted to enter a password, you have three tries before the system halts. Don't forget your password. If you forget your password, you may have to return your notebook computer to your dealer to reset it.

Setting a Password

Follow these steps as you set the user or the supervisor password:

1. Use the "w" and "y" keys to highlight the Set Supervisor Password parameter and press the e key. The Set Supervisor Password box appears:

Set Supervisor Password		
Enter New Password	[]
Confirm New Password]]

2. Type a password in the "Enter New Password" field. The password length can not exceeds 8 alphanumeric characters (A-Z, a-z, 0-9, not case sensitive). Retype the password in the "Confirm New Password" field.

IMPORTANT: Be very careful when typing your password because the characters do not appear on the screen.

- 3 Press e
 - After setting the password, the computer sets the User Password parameter to "Set".
- **4.** If desired, you can opt to enable the Password on boot parameter.
- **5.** When you are done, press u to save the changes and exit the BIOS Setup Utility.

Removing a Password

Follow these steps:

1. Use the w and y keys to highlight the Set Supervisor Password parameter and press the e key. The Set Password box appears:

Set Supervisor Passwo	ord	
Enter current password	[]
Enter New Password	[]
Confirm New Password	[]

- 2. Type the current password in the Enter Current Password field and press e.
- 3. Press e twice **without** typing anything in the Enter New Password and Confirm New Password fields. The computer then sets the Supervisor Password parameter to "Clear".
- 4. When you have changed the settings, press u to save the changes and exit the BIOS Setup Utility.

Changing a Password

1. Use the w and y keys to highlight the Set Supervisor Password parameter and press the e key. The Set Password box appears:

Set Supervisor Passwo	ord	
Enter current password]]
Enter New Password	[]
Confirm New Password	[]

- 2. Type the current password in the Enter Current Password field and press e.
- 3. Type a password in the Enter New Password field. Retype the password in the Confirm New Password field.
- 4. Press e. After setting the password, the computer sets the User Password parameter to "Set".
- 5. If desired, you can enable the Password on boot parameter.
- 6. When you are done, press u to save the changes and exit the BIOS Setup Utility.

If the verification is OK, the screen will display as following.

The password setting is complete after the user presses u.

If the current password entered does not match the actual current password, the screen will show you the Setup Warning.

Setup Warning
Invalid password
Re-enter Password

[continue]

If the new password and confirm new password strings do not match, the screen will display the following message.

Setup Warning

Password do not match

Re-enter Password

Boot

This menu allows the user to decide the order of boot devices to load the operating system. Bootable devices includes the diskette drive in module bay, the onboard hard disk drive and the CD-ROM in module bay.

Exit

The Exit screen contains parameters that confirmed or discard the changes made to the parameters in the BIOS Setup Utility.

The table below describes the parameters in this screen.

Parameter	Description	
Exit Saving Changes	Exit System Setup and save your changes to CMOS.	
Exit Discarding Changes	Exit utility without saving setup data to CMOS.	
Load Setup Default	Load default values for all SETUP item.	
Discard Changes	Load previous values from CMOS for all SETUP items.	
Save Changes	Save Setup Data to CMOS.	

BIOS Flash Utility

The BIOS flash memory update is required for the following conditions:

- New versions of system programs
- New features or options
- Restore a BIOS when it becomes corrupted.

Use the Flash utility to update the system BIOS flash ROM.

NOTE: If you do not have a crisis recovery diskette at hand, then you should create a Crisis Recovery

Diskette before you use the Flash utility.

NOTE: Do not install memory-related drivers (XMS, EMS, DPMI) when you use the Flash.

NOTE: Please use the AC adaptor power supply when you run the Flash utility. If the battery pack does not contain enough power to finish BIOS flash, you may not boot the system because the BIOS is not completely loaded.

Fellow the steps below to run the Flash.

- 1. Prepare a bootable diskette.
- 2. Copy the flash utilities to the bootable diskette.
- 3. Then boot the system from the bootable diskette. The flash utility has auto-execution function.

Remove HDD/BIOS Utility

This section provide you with removing HDD/BIOS method:

Remove HDD Password:

If you key in wrong HDD password for three time, "HDD password error code" would display on the screen. See the image below.

- If you need to solve HDD password locked problem, you can run HDD_PW.EXE
- 1. Key in "hdd_pw 15494 0"
- 2. Select "2"
- 3. Choose one upper-case string

Reboot system and key in "0KJFN42" or "UVEIQ96" to HDD user password.

Remove BIOS Password:

☐ If you key in wrong Supervisor Password for three time, "System Disabled" would display on the screen. See the image below.

- ☐ If you need to solve BIOS password locked problem, you can run BIOS_PW.EXE
- 1. Key in "bios_pw 14452 0"
- 2. Choose one upper-case string

Reboot the system and key in "qjjg9vy" or "07yqmjd" to BIOS user password.

Machine Disassembly and Replacement

This chapter contains step-by-step procedures on how to disassemble the notebook computer for maintenance and troubleshooting.

Disassembly Requirements

To disassemble the computer, you need the following tools:

1 , ,	•	
Wrist grounding strap	and conductive mat for preventing	g electrostatic discharge

☐ Flat screwdriver

Philips screwdriver

Hex screwdriver

Plastic flat screwdriver

Plastic tweezers

NOTE: The screws for the different components vary in size. During the disassembly process, group the screws with the corresponding components to avoid mismatch when putting back the components.

Chapter 3 53

General Information

Pre-disassembly Instructions

Before proceeding with the disassembly procedure, make sure that you do the following:

- 1. Turn off the power to the system and all peripherals.
- 2. Unplug the AC adapter and all power and signal cables from the system.

- 3. Place the system on a flat, stable surface.
- 4. Remove the battery pack.

Disassembly Process

The disassembly process is divided into the following stages:

- External module disassembly
- Main unit disassembly
- LCD module disassembly

The flowcharts provided in the succeeding disassembly sections illustrate the entire disassembly sequence. Observe the order of the sequence to avoid damage to any of the hardware components. For example, if you want to remove the main board, you must first remove the keyboard, then disassemble the inside assembly frame in that order.

Main Screw List

Item	Screw	Color	Part No.
Α	M2 x L3	Black	86.900F80.723
В	M2 x L4	Silver	86.9A552.4R0
С	M2.5 x L6	Black	86.00E33.736
D	M2 x L3	Silver	86.00C07.220
E	M3 x L4	Silver	86.9A554.4R0
F	M2.5 x L5	Black	86.00F87.735
G	M2 X L4	Black	86.00F24.724

External Module Disassembly Process

External Modules Disassembly Flowchart

The flowchart below gives you a graphic representation on the entire disassembly sequence and instructs you on the components that need to be removed during servicing. For example, if you want to remove the main board, you must first remove the keyboard, then disassemble the inside assembly frame in that order.

EXTERNAL MODULE DISASSEMBLY

Screw List

Item	Screw	Color	Part No.
Α	M2 x L3	Black	86.900F80.723
В	M2 x L4	Silver	86.9A552.4R0
С	M2.5 x L6	Black	86.00E33.736
Е	M3 x L4	Silver	86.9A554.4R0
G	M2 X L4	Black	86.00F24.724

Chapter 3 55

Removing the Battery Pack

- 1. Turn base unit over.
- 2. Slide the battery lock/unlock latch to the unlock position.

3. Slide and hold the battery release latch to the release position.

4. Then slide out the battery from the battery bay.

5. If there is a SIM card, remove it after removing the battery pack.

Removing the SD dummy card

1. Push the SD dummy card all the way in to eject it.

2. Pull it out from the slot.

Chapter 3 57

Removing the PC and ExpressCard dummy cards

1. Press the eject button to pop out the button.

2. Press it again to pop out the PC dummy card.

3. Remove the PC dummy card from the slot.

4. Push the ExpressCard dummy card all the way in to eject it.

5. Pull it out from the slot.

Removing the Optical Drive Module

- 1. See "Removing the Battery Pack" on page 56.
- 2. Slide the Acer MediaBay release latch to the unlock position (1) and slide out the optical drive module out of the bay (2).

Chapter 3 59

3. Remove the three screws (A x 1, B x 2) securing the locker bracket and remove the locker bracket from the optical disk drive module.

Step	Size (Quantity)	Color	Torque
1	M2 x L3 (1)	Black	1.6 kgf-cm
2~3	M2 x L4 (2)	Silver	1.6 kgf-cm

Removing the Lower Cover

1. See "Removing the Battery Pack" on page 56.

2. Remove the three captive screws and four screws (C) securing the lower cover.

Step	Size (Quantity)	Color	Torque
1~4	M2.5 x L6 (4)	Black	3.0 kgf-cm

3. Use a plastic screw driver to carefully pry open the lower cover.

Chapter 3 61

4. Remove the lower cover from the lower case.

Removing the DIMM

- 1. See "Removing the Battery Pack" on page 56.
- **2.** See "Removing the Lower Cover" on page 60..
- 3. Push out the latches on both sides of the DIMM socket to release the DIMM.

4. Remove the DIMM module.

Removing the Hard Disk Drive Module

- 1. See "Removing the Battery Pack" on page 56.
- **2.** See "Removing the Lower Cover" on page 60.
- 3. Remove the two screws (A) securing the hard disk drive module.

Step	Size (Quantity)	Color	Torque
1~2	M2 x L3 (2)	Black	1.6 kgf-cm

4. Using the plastic tab, slide the hard disk drive module away from the connector.

5. Lift up the hard disk module to remove from the bay.

NOTE: To prevent damage to device, avoid pressing down on it or placing heavy objects on top of it.

6. Remove the protective rubber enclosure from the hard disk module.

7. Remove the two screws (E) securing the hard disk to the bracket and remove the hard disk from the bracket

Step	Size (Quantity)	Color	Torque
1~2	M3 x L4 (2)	Silver	3.0 kgf-cm

Removing the Expansion Slots Cover

1. See "Removing the Battery Pack" on page 56.

2. Remove the one captive screw securing the cover.

3. Carefully pry open the cover and remove it from the bottom panel.

Removing the 3G Board Module

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the Expansion Slots Cover" on page 65.

3. Disconnect the antenna cables from the 3G board.

NOTE: There are 2 antenna cables connected to the 3G board. The Green antenna cable is connected to MAIN connector and the Blue antenna cable is connected to AUX connector.

4. Remove the one screw (B) on the WLAN board to release the WLAN board.

Step	Size (Quantity)	Color	Torque
1	M2 x L4 (2)	Silver	1.6 kgf-cm

5. Detach the 3G board from the connector.

NOTE: When attaching the antenna back to the 3G board, make sure the cable are arranged properly.

Removing the WLAN Board Module

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the Expansion Slots Cover" on page 65.
- 3. Disconnect the antenna cables from the WLAN board.

NOTE: There are 3 antenna cables connected to the WLAN board. The Black antenna cable is connected to connector 1, the White antenna cable is connected to connector 2 and the Grey antenna cable is connected to connected to connector 3.

4. Remove the one screw (B) on the WLAN board to release the WLAN board.

Step	Size (Quantity)	Color	Torque
1	M2 x L4 (1)	Silver	1.6 kgf-cm

5. Detach the WLAN board from the WLAN socket.

NOTE: When attaching the antenna back to the WLAN board, make sure the cable are arranged properly.

Removing the Modem Board

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the Expansion Slots Cover" on page 65.
- 3. See "Removing the 3G Board Module" on page 66.
- 4. See "Removing the WLAN Board Module" on page 68.
- 5. Remove the one screw (G) securing the modem card.

Step	Size (Quantity)	Color	Torque
1	M2 x L4 (1)	Black	1.6 kgf-cm

6. Lift the modem board from the system.

7. Disconnect the cable from the modem board.

Main Unit Disassembly Process

Main Unit Disassembly Flowchart

MAIN UNIT DISASSEMBLY

Screw List

Item	Screw	Color	Part No.
Α	M2 x L3	Black	86.900F80.723
В	M2 x L4	Silver	86.9A552.4R0
С	M2.5 x L6	Black	86.00E33.736
F	M2.5 x L5	Black	86.00F87.735
G	M2 X L4	Black	86.00F24.724

Removing the Middle Cover

- 1. See "Removing the Battery Pack" on page 56.
- **2.** Use a plastic screw driver to pry loose the side of the middle cover.

3. Carefully pry loose the middle cover from the latches securing it and remove the middle cover from the system.

Removing the Keyboard

- 1. See "Removing the Battery Pack" on page 56.
- **2.** See "Removing the Middle Cover" on page 72.
- 3. Remove the two screws (A) securing the keyboard.

Step	Size (Quantity)	Color	Torque
1~2	M2 x L3 (2)	Black	1.6 kgf-cm

4. Carefully pry loose the keyboard and turn it over on the touchpad area.

5. Disconnect the keyboard cable from the main board to remove the keyboard.

Removing the Heatsink Fan Module

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the Lower Cover" on page 60.
- 3. Disconnect the heat sink fan connector from the main board.

4. Remove the two screws (B) securing the heatsink fan module in place.

Step	Size (Quantity)	Color	Torque
1~2	M2 x L4 (2)	Silver	1.6 kgf-cm

5. Carefully lift up the heatsink fan module.

Removing the CPU and VGA Heatsink Module

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the Lower Cover" on page 60.
- **3.** See "Removing the Heatsink Fan Module" on page 74.

4. Remove the four screws securing the CPU heatsink module and the two screw securing the VGA board heatsink module (Discrete Model only).

5. Carefully remove the heatsink module from the system.

Removing the CPU

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the Lower Cover" on page 60.
- **3.** See "Removing the Heatsink Fan Module" on page 74.
- 4. See "Removing the CPU and VGA Heatsink Module" on page 75.

5. Using a flat screwdriver, turn the CPU socket latch counter-clockwise to release the CPU.

6. Lift up carefully to remove the CPU.

NOTE: When installing the CPU, make sure to install the CPU with PIN 1 at the corner as shown.

Removing the VGA Board (Discrete Model only)

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the Lower Cover" on page 60.

- 3. See "Removing the Heatsink Fan Module" on page 74.
- **4.** See "Removing the CPU and VGA Heatsink Module" on page 75.
- **5.** Remove the two screws (A) securing the VGA board to the main board.

Step	Size (Quantity)	Color	Torque
1~2	M2 x L3 (2)	Black	1.6 kgf-cm

6. Remove the VGA board from the main board.

Removing the LCD Module

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the Expansion Slots Cover" on page 65.
- 3. See "Removing the 3G Board Module" on page 66.
- 4. See "Removing the WLAN Board Module" on page 68.
- 5. See "Removing the Middle Cover" on page 72.

6. Turn over the system and remove the two screws (C) from the bottom of the left and right hinges.

Step	Size (Quantity)	Color	Torque
1~2	M2.5 x L6 (2)	Black	3.0 kgf-cm

7. Remove the tape holding the antenna cables in place.

8. Carefully pull out the wireless antenna cables from the hole and release the cables from the latches.

9. Disconnect the LCD cable connector from the main board.

10. Remove the two screws (C) from the left and right hinge of the LCD module.

Step	Size (Quantity)	Color	Torque
1~2	M2.5 x L6 (2)	Black	3.0 kgf-cm

11. Carefully remove the LCD module from the base unit.

NOTE: When connecting the cable back to the unit, please note that the cable should be routed well.

Separating the Upper Case from the Lower Case

- 1. See "Removing the Battery Pack" on page 56.
- See "Removing the SD dummy card" on page 57.
- 3. See "Removing the PC and ExpressCard dummy cards" on page 58.
- 4. See "Removing the Lower Cover" on page 60.
- 5. See "Removing the DIMM" on page 62.
- 6. See "Removing the Hard Disk Drive Module" on page 63.
- 7. See "Removing the Expansion Slots Cover" on page 65.
- 8. See "Removing the 3G Board Module" on page 66.
- 9. See "Removing the WLAN Board Module" on page 68.
- 10. See "Removing the Modem Board" on page 69.
- **11.** See "Removing the Middle Cover" on page 72.
- 12. See "Removing the Keyboard" on page 73.
- 13. See "Removing the Optical Drive Module" on page 59.
- 14. See "Removing the Heatsink Fan Module" on page 74.
- 15. See "Removing the CPU and VGA Heatsink Module" on page 75.
- 16. See "Removing the CPU" on page 76.
- 17. See "Removing the VGA Board (Discrete Model only)" on page 77.
- 18. See "Removing the LCD Module" on page 78.
- 19. Disconnect the touchpad cable from the TPAD1 connector on the main board.

20. Disconnect the fingerprint cable from the FPCN1 connector on the main board.

21. Disconnect the launch board cable from the LAUNCN1 connector on the main board.

22. Disconnect the LED cable from the LED_CN1 connector on the main board.

23. Remove the nine screws (C) from the bottom panel.

Step	Size (Quantity)	Color	Torque
1~9	M2.5 x L6 (9)	Black	3.0 kgf-cm

24. Turn the unit over and gently remove the upper case from the lower case.

Removing the Launch Board

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the SD dummy card" on page 57.
- 3. See "Removing the PC and ExpressCard dummy cards" on page 58.
- 4. See "Removing the Lower Cover" on page 60.
- 5. See "Removing the DIMM" on page 62.
- 6. See "Removing the Hard Disk Drive Module" on page 63.
- 7. See "Removing the Expansion Slots Cover" on page 65.
- 8. See "Removing the 3G Board Module" on page 66.
- 9. See "Removing the WLAN Board Module" on page 68.
- 10. See "Removing the Modem Board" on page 69.
- **11.** See "Removing the Middle Cover" on page 72.
- 12. See "Removing the Keyboard" on page 73.
- 13. See "Removing the Optical Drive Module" on page 59.

- 14. See "Removing the Heatsink Fan Module" on page 74.
- **15.** See "Removing the CPU and VGA Heatsink Module" on page 75.
- **16.** See "Removing the CPU" on page 76.
- 17. See "Removing the VGA Board (Discrete Model only)" on page 77.
- 18. See "Removing the LCD Module" on page 78.
- 19. See "Separating the Upper Case from the Lower Case" on page 81.
- 20. Disconnect the cable from the launch board module.

21. Remove the one screw (A) and release the launch board module from the latches.

Step	Size (Quantity)	Color	Torque
1	M2 x L3 (1)	Silver	1.6 kgf-cm

22. Remove the launch board module from the upper case.

Removing the Fingerprint and Touchpad Module

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the SD dummy card" on page 57.
- 3. See "Removing the PC and ExpressCard dummy cards" on page 58.
- 4. See "Removing the Lower Cover" on page 60.
- 5. See "Removing the DIMM" on page 62.
- 6. See "Removing the Hard Disk Drive Module" on page 63.
- 7. See "Removing the Expansion Slots Cover" on page 65.
- 8. See "Removing the 3G Board Module" on page 66.
- 9. See "Removing the WLAN Board Module" on page 68.
- 10. See "Removing the Modem Board" on page 69.
- **11.** See "Removing the Middle Cover" on page 72.
- 12. See "Removing the Keyboard" on page 73.
- 13. See "Removing the Optical Drive Module" on page 59.

- 14. See "Removing the Heatsink Fan Module" on page 74.
- **15.** See "Removing the CPU and VGA Heatsink Module" on page 75.
- **16.** See "Removing the CPU" on page 76.
- 17. See "Removing the VGA Board (Discrete Model only)" on page 77.
- 18. See "Removing the LCD Module" on page 78.
- 19. See "Separating the Upper Case from the Lower Case" on page 81.
- 20. Disconnect the touchpad cable from the touchpad board.

21. Disconnect the fingerprint cable from the fingerprint board.

22. Remove the cables that is taped to the bracket.

23. Remove the two screws (B) securing the bracket to the upper case.

Step	Size (Quantity)	Color	Torque
1~2	M2 x L4 (2)	Silver	1.6 kgf-cm

24. Remove the touchpad bracket.

25. Remove the fingerprint board module.

26. Carefully pry loose and remove the touch pad board.

WARNING: The touchpad board is glued to the upper case, only remove the touchpad board if it is defective.

Removing the Main Board

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the SD dummy card" on page 57.
- 3. See "Removing the PC and ExpressCard dummy cards" on page 58.
- 4. See "Removing the Lower Cover" on page 60.
- 5. See "Removing the DIMM" on page 62.
- **6.** See "Removing the Hard Disk Drive Module" on page 63.
- 7. See "Removing the Expansion Slots Cover" on page 65.
- 8. See "Removing the 3G Board Module" on page 66.
- 9. See "Removing the WLAN Board Module" on page 68.
- 10. See "Removing the Modem Board" on page 69.
- 11. See "Removing the Middle Cover" on page 72.
- 12. See "Removing the Keyboard" on page 73.

- 13. See "Removing the Optical Drive Module" on page 59.
- 14. See "Removing the Heatsink Fan Module" on page 74.
- **15.** See "Removing the CPU and VGA Heatsink Module" on page 75.
- 16. See "Removing the CPU" on page 76.
- 17. See "Removing the VGA Board (Discrete Model only)" on page 77.
- 18. See "Removing the LCD Module" on page 78.
- 19. See "Separating the Upper Case from the Lower Case" on page 81.
- 20. Disconnect the speaker cable from SPKR1 on the main board.

21. Disconnect the Bluetooth cable from BT1 on the main board.

22. Disconnect the DC cable from the DCIN1 connector on the main board.

23. Disconnect the USB cable from the main board.

24. Disconnect the daughter board cable from the DB_CN2 on the main board.

25. Remove the one screw (A) securing the main board in place.

Step	Size (Quantity)	Color	Torque
1	M2 x L3 (1)	Black	1.6 kgf-cm

26. Carefully remove the main board.

Removing the Daughter Board Module

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the SD dummy card" on page 57.
- 3. See "Removing the PC and ExpressCard dummy cards" on page 58.
- 4. See "Removing the Lower Cover" on page 60.
- 5. See "Removing the DIMM" on page 62.
- 6. See "Removing the Hard Disk Drive Module" on page 63.
- 7. See "Removing the Expansion Slots Cover" on page 65.
- 8. See "Removing the 3G Board Module" on page 66.
- 9. See "Removing the WLAN Board Module" on page 68.
- 10. See "Removing the Modem Board" on page 69.
- 11. See "Removing the Middle Cover" on page 72.
- 12. See "Removing the Keyboard" on page 73.
- 13. See "Removing the Optical Drive Module" on page 59.
- 14. See "Removing the Heatsink Fan Module" on page 74.
- **15.** See "Removing the CPU and VGA Heatsink Module" on page 75.
- 16. See "Removing the CPU" on page 76.
- 17. See "Removing the VGA Board (Discrete Model only)" on page 77.
- 18. See "Removing the LCD Module" on page 78.
- 19. See "Separating the Upper Case from the Lower Case" on page 81.
- 20. See "Removing the Main Board" on page 90.

21. Remove the one screw (A) securing the daughter board to the lower case.

Step	Size (Quantity)	Color	Torque
1	M2 x L3 (1)	Black	1.6 kgf-cm

22. Carefully lift the daughter board and remove it from the lower case.

Removing the Speaker Module

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the SD dummy card" on page 57.
- 3. See "Removing the PC and ExpressCard dummy cards" on page 58.
- **4.** See "Removing the Lower Cover" on page 60.
- 5. See "Removing the DIMM" on page 62.
- 6. See "Removing the Hard Disk Drive Module" on page 63.
- 7. See "Removing the Expansion Slots Cover" on page 65.
- 8. See "Removing the 3G Board Module" on page 66.
- 9. See "Removing the WLAN Board Module" on page 68.
- 10. See "Removing the Modem Board" on page 69.
- 11. See "Removing the Middle Cover" on page 72.
- 12. See "Removing the Keyboard" on page 73.
- 13. See "Removing the Optical Drive Module" on page 59.

- 14. See "Removing the Heatsink Fan Module" on page 74.
- **15.** See "Removing the CPU and VGA Heatsink Module" on page 75.
- **16.** See "Removing the CPU" on page 76.
- 17. See "Removing the VGA Board (Discrete Model only)" on page 77.
- 18. See "Removing the LCD Module" on page 78.
- 19. See "Separating the Upper Case from the Lower Case" on page 81.
- 20. Remove the two screws (A) securing the left and right speaker modules.

Step	Size (Quantity)	Color	Torque
1~2	M2 x L3 (2)	Black	1.6 kgf-cm

21. Remove the left and right speaker modules from the upper case.

LCD Module Disassembly Process

LCD Module Disassembly Flowchart

LCD MODULE DISASSEMBLY

Screw List

Item	Screw	Color	Part No.
С	M2.5 x L6	Black	86.00E33.736
D	M2 x L3	Silver	86.00C07.220
F	M2.5 x L5	Black	86.00F87.735

Removing the LCD Bezel

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the Expansion Slots Cover" on page 65.
- 3. See "Removing the 3G Board Module" on page 66.
- 4. See "Removing the WLAN Board Module" on page 68.
- 5. See "Removing the Middle Cover" on page 72.
- **6.** See "Removing the LCD Module" on page 78.
- 7. Remove the four rubber screw covers from the LCD bezel.

8. Remove the four screws (C) on the LCD module as shown.

Step	Size (Quantity)	Color	Torque
1~4	M2.5 x L6 (4)	Black	3.0 kgf-cm

9. Carefully pry open the LCD bezel and place the bezel on top of the LCD panel.

10. Disconnect the microphone cable and remove the bezel from the LCD panel.

Chapter 3 99

Removing the LCD Panel with the Brackets

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the Expansion Slots Cover" on page 65.
- 3. See "Removing the 3G Board Module" on page 66.
- 4. See "Removing the WLAN Board Module" on page 68.
- **5.** See "Removing the Middle Cover" on page 72.
- 6. See "Removing the LCD Module" on page 78.
- 7. See "Removing the LCD Bezel" on page 98.
- 8. Disconnect the cable from the web camera.

9. Remove the three screws (F) securing the LCD panel.

Step	Size (Quantity)	Color	Torque
1~3	M2.5 x L5 (3)	Black	2.5 kgf-cm

10. Remove the LCD panel with the brackets from the back cover.

Removing the Inverter Board and FPC Cable

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the Expansion Slots Cover" on page 65.
- 3. See "Removing the 3G Board Module" on page 66.
- 4. See "Removing the WLAN Board Module" on page 68.
- 5. See "Removing the Middle Cover" on page 72.
- 6. See "Removing the LCD Module" on page 78.
- 7. See "Removing the LCD Bezel" on page 98.
- **8.** See "Removing the LCD Panel with the Brackets" on page 100.

Chapter 3 101

9. Disconnect the cables from the inverter board.

10. Detach any adhesive tapes and any cable that is glued to the LCD panel.

11. Disconnect the FPC cable from the LCD panel.

Removing the Hinges

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the Expansion Slots Cover" on page 65.
- 3. See "Removing the 3G Board Module" on page 66.

Chapter 3 103

- **4.** See "Removing the WLAN Board Module" on page 68.
- **5.** See "Removing the Middle Cover" on page 72.
- **6.** See "Removing the LCD Module" on page 78.
- 7. See "Removing the LCD Bezel" on page 98.
- 8. See "Removing the LCD Panel with the Brackets" on page 100.
- 9. Remove the two screws (F) securing the left and right hinges.

Step	Size (Quantity)	Color	Torque
1~2	M2.5 x L5 (2)	Black	2.5 kgf-cm

10. Remove the left and right hinges from the back cover.

Removing the LCD Brackets

- 1. See "Removing the Battery Pack" on page 56.
- 2. See "Removing the Expansion Slots Cover" on page 65.
- 3. See "Removing the 3G Board Module" on page 66.
- 4. See "Removing the WLAN Board Module" on page 68.
- 5. See "Removing the Middle Cover" on page 72.
- **6.** See "Removing the LCD Module" on page 78.
- 7. See "Removing the LCD Panel with the Brackets" on page 100.
- 8. See "Removing the Inverter Board and FPC Cable" on page 101.
- 9. Remove the four screws (D) securing the left and right LCD brackets to remove the brackets.

Step	Size (Quantity)	Color	Torque
1~4	M2 x L3 (4)	Silver	1.6 kgf-cm

Chapter 3 105

Troubleshooting

Use the following procedure as a guide for computer problems.

NOTE: The diagnostic tests are intended to test only Acer products. Non-Acer products, prototype cards, or modified options can give false errors and invalid system responses.

- 1. Obtain the failing symptoms in as much detail as possible.
- 2. Verify the symptoms by attempting to re-create the failure by running the diagnostic test or by repeating the same operation.
- 3. Use the following table with the verified symptom to determine which page to go to.

Symptoms (Verified)	Go To
Power failure. (The power indicator does not go on or stay on.)	"Power System Check" on page 109.
POST does not complete. No beep or error codes are indicated.	"Power-On Self-Test (POST) Error Message" on page 112 "Undetermined Problems" on page 126
POST detects an error and displayed messages on screen.	"Error Message List" on page 113
Other symptoms (i.e. LCD display problems or others).	"Power-On Self-Test (POST) Error Message" on page 112
Symptoms cannot be re-created (intermittent problems).	Use the customer-reported symptoms and go to "Power-On Self-Test (POST) Error Message" on page 112 "Intermittent Problems" on page 125 "Undetermined Problems" on page 126

System Check Procedures

External Diskette Drive Check

Do the following to isolate the problem to a controller, driver, or diskette. A write-enabled, diagnostic diskette is required.

NOTE: Make sure that the diskette does not have more than one label attached to it. Multiple labels can cause damage to the drive or cause the drive to fail.

Do the following to select the test device.

- Boot from the diagnostics diskette and start the diagnostics program.
- 2. See if FDD Test is passed as the program runs to FDD Test.
- 3. Follow the instructions in the message window.

If an error occurs with the internal diskette drive, reconnect the diskette connector on the system board.

If the error still remains:

- Reconnect the external diskette drive/DVD-ROM module.
- 2. Replace the external diskette drive/CD-ROM module.
- 3. Replace the main board.

External CD-ROM Drive Check

Do the following to isolate the problem to a controller, drive, or CD-ROM. Make sure that the CD-ROM does not have any label attached to it. The label can cause damage to the drive or can cause the drive to fail.

Do the following to select the test device:

- 1. Boot from the diagnostics diskette and start the diagnostics program.
- See if CD-ROM Test is passed when the program runs to CD-ROM Test.
- 3. Follow the instructions in the message window.

If an error occurs, reconnect the connector on the System board. If the error still remains:

- 1. Reconnect the external diskette drive/CD-ROM module.
- 2. Replace the external diskette drive/CD-ROM module.
- 3. Replace the main board.

Keyboard or Auxiliary Input Device Check

Remove the external keyboard if the internal keyboard is to be tested.

If the internal keyboard does not work or an unexpected character appears, make sure that the flexible cable extending from the keyboard is correctly seated in the connector on the system board.

If the keyboard cable connection is correct, run the Keyboard Test.

If the tests detect a keyboard problem, do the following one at a time to correct the problem. Do not replace a non-defective FRU:

- Reconnect the keyboard cables.
- Replace the keyboard.
- Replace the main board.

The following auxiliary input devices are supported by this computer:

Numeric keypad

External keyboard

If any of these devices do not work, reconnect the cable connector and repeat the failing operation.

Memory check

Memory errors might stop system operations, show error messages on the screen, or hang the system.

- 1. Boot from the diagnostics diskette and start the diagnostic program (please refer to main board.
- 2. Go to the diagnostic memory in the test items.
- 3. Press F2 in the test items.
- 4. Follow the instructions in the message window.

NOTE: Make sure that the DIMM is fully installed into the connector. A loose connection can cause an error.

Power System Check

To verify the symptom of the problem, power on the computer using each of the following power sources:

- 1. Remove the battery pack.
- 2. Connect the power adapter and check that power is supplied.
- 3. Disconnect the power adapter and install the charged battery pack; then check that power is supplied by the battery pack.

If you suspect a power problem, see the appropriate power supply check in the following list:

- □ "Check the Power Adapter" on page 110
- ☐ "Check the Battery Pack" on page 111

Check the Power Adapter

Unplug the power adapter cable from the computer and measure the output voltage at the plug of the power adapter cable. See the following figure

Pin 1: +19 to +20.5V Pin 2: 0V, Ground

- 1. If the voltage is not correct, replace the power adapter.
- 2. If the voltage is within the range, do the following:
 - Replace the System board.
 - ☐ If the problem is not corrected, see "Undetermined Problems" on page 126.
 - ☐ If the voltage is not correct, go to the next step.

NOTE: An audible noise from the power adapter does not always indicate a defect.

- **3.** If the power-on indicator does not light up, check the power cord of the power adapter for correct continuity and installation.
- **4.** If the operational charge does not work, see "Check the Battery Pack" on page 111.

Check the Battery Pack

To check the battery pack, do the following:

From Software:

- 1. Check out the Power Management in control Panel
- 2. In Power Meter, confirm that if the parameters shown in the screen for Current Power Source and Total Battery Power Remaining are correct.
- 3. Repeat the steps 1 and 2, for both battery and adapter.
- 4. This helps you identify first the problem is on recharging or discharging.

From Hardware:

- 1. Power off the computer.
- 2. Remove the battery pack and measure the voltage between battery terminals 1(+) and 6(ground).
- If the voltage is still less than 7.5 Vdc after recharging, replace the battery.

To check the battery charge operation, use a discharged battery pack or a battery pack that has less than 50% of the total power remaining when installed in the computer.

If the battery status indicator does not light up, remove the battery pack and let it return to room temperature. Re-install the battery pack.

If the charge indicator still does not light up, replace the battery pack. If the charge indicator still does not light up, replace the DC/DC charger board.

Touchpad Check

If the touchpad doesn't work, do the following actions one at a time to correct the problem. Do not replace a non-defective FRU:

- 1. Reconnect the touchpad cables.
- 2. Replace the touchpad.
- 3. Replace the system board.

After you use the touchpad, the pointer drifts on the screen for a short time. This self-acting pointer movement can occur when a slight, steady pressure is applied to the touchpad pointer. This symptom is not a hardware problem. No service actions are necessary if the pointer movement stops in a short period of time.

Power-On Self-Test (POST) Error Message

The POST error message index lists the error message and their possible causes. The most likely cause is listed first.

NOTE: Perform the FRU replacement or actions in the sequence shown in FRU/Action column, if the FRU replacement does not solve the problem, put the original part back in the computer. Do not replace a non-defective FRU.

This index can also help you determine the next possible FRU to be replaced when servicing a computer.

If the symptom is not listed, see "Undetermined Problems" on page 126.

The following lists the error messages that the BIOS displays on the screen and the error symptoms classified by function.

NOTE: Most of the error messages occur during POST. Some of them display information about a hardware device, e.g., the amount of memory installed. Others may indicate a problem with a device, such as the way it has been configured.

NOTE: If the system fails after you make changes in the BIOS Setup Utility menus, reset the computer, enter Setup and install Setup defaults or correct the error.

Index of Error Messages

Error Code List

Error Codes	Error Messages
006	Equipment Configuration Error
	Causes:
	CPU BIOS Update Code Mismatch
	IDE Primary Channel Master Drive Error
	(THe causes will be shown before "Equipment Configuration Error")
010	Memory Error at xxxx:xxxx:xxxxh (R:xxxxh, W:xxxxh)
070	Real Time Clock Error
071	CMOS Battery Bad
072	CMOS Checksum Error
110	System disabled.
	Incorrect password is specified.
<no code="" error=""></no>	Battery critical LOW
	In this situation BIOS will issue 4 short beeps then shut down system, no message will show.
<no code="" error=""></no>	Thermal critical High
	In this situation BIOS will shut down system, not show
	message.

Error Message List

Error Messages	FRU/Action in Sequence
Failure Fixed Disk	Reconnect hard disk drive connector.
	"Load Default Settings" in BIOS Setup Utility.
	Hard disk drive
	System board
Stuck Key	see "Keyboard or Auxiliary Input Device Check" on page 108.
Keyboard error	see "Keyboard or Auxiliary Input Device Check" on page 108.
Keyboard Controller Failed	see "Keyboard or Auxiliary Input Device Check" on page 108.
Keyboard locked - Unlock key switch	Unlock external keyboard
Monitor type does not match CMOS - Run	Run "Load Default Settings" in BIOS Setup Utility.
Setup	
Shadow RAM Failed at offset: nnnn	BIOS ROM
	System board
System RAM Failed at offset: nnnn	DIMM
	System board
Extended RAM Failed at offset: nnnn	DIMM
	System board
System battery is dead - Replace and run	Replace RTC battery and Run BIOS Setup Utility to
Setup	reconfigure system time, then reboot system.
System CMOS checksum bad - Default	RTC battery
configuration used	Run BIOS Setup Utility to reconfigure system time, then
	reboot system.

Error Message List

Error Messages	FRU/Action in Sequence
System timer error	RTC battery
	Run BIOS Setup Utility to reconfigure system time, then
	reboot system.
	System board
Real time clock error	RTC battery
	Run BIOS Setup Utility to reconfigure system time, then
	reboot system.
Davison hasting and to Default	System board
Previous boot incomplete - Default configuration used	Run "Load Default Settings" in BIOS Setup Utility.
comgaration used	RTC battery System board
	-
Memory size found by POST differed from CMOS	Run "Load Default Settings" in BIOS Setup Utility.
- Civico	DIMM System board
B: 1 " 1: A	System board
Diskette drive A error	Check the drive is defined with the proper diskette type in BIOS Setup Utility
	See "External Diskette Drive Check" on page 108.
Incorrect Drive A type - run SETUP	Check the drive is defined with the proper diskette type in
Incorrect Drive A type - run 3E rop	BIOS Setup Utility
System cache error - Cache disabled	System board
CPU ID:	System board
DMA Test Failed	DIMM
	System board
Software NMI Failed	DIMM
	System board
Fail-Safe Timer NMI Failed	DIMM
	System board
Device Address Conflict	Run "Load Default Settings" in BIOS Setup Utility.

	Touchpad board
	System board

Modem-Related Symptoms

Symptom / Error	Action in Sequence	
Internal modem does not work correctly.	Modem phone port	
	modem combo board	
	System board	

NOTE: If you cannot find a symptom or an error in this list and the problem remains, see "Undetermined Problems" on page 126.

Intermittent Problems

Intermittent system hang problems can be caused by a variety of reasons that have nothing to do with a hardware defect, such as: cosmic radiation, electrostatic discharge, or software errors. FRU replacement should be considered only when a recurring problem exists.

When analyzing an intermittent problem, do the following:

- 1. Run the advanced diagnostic test for the system board in loop mode at least 10 times.
- 2. If no error is detected, do not replace any FRU.
- 3. If any error is detected, replace the FRU. Rerun the test to verify that there are no more errors.

Undetermined Problems

The diagnostic problems does not identify which adapter or device failed, which installed devices are incorrect, whether a short circuit is suspected, or whether the system is inoperative.

Follow these procedures to isolate the failing FRU (do not isolate non-defective FRU).

NOTE: Verify that all attached devices are supported by the computer.

NOTE: Verify that the power supply being used at the time of the failure is operating correctly. (See "Power System Check" on page 109.):

- 1. Power-off the computer.
- 2. Visually check them for damage. If any problems are found, replace the FRU.
- 3. Remove or disconnect all of the following devices:

Non-Acer devices
Printer, mouse, and other external devices
Battery pack
Hard disk drive
DIMM
CD-ROM/Diskette drive Module
PC Cards

- 4. Power-on the computer.
- 5. Determine if the problem has changed.
- 6. If the problem does not recur, reconnect the removed devices one at a time until you find the failing FRU.
- 7. If the problem remains, replace the following FRU one at a time. Do not replace a non-defective FRU:

System board

LCD assembly

Jumper and Connector Locations

Top and Bottom View

Chapter 5 127

Clearing Password Check and BIOS Recovery

This section provide you the standard operating procedures of clearing password and BIOS recovery for TravelMate 6593 Series. TravelMate 6593 Series provide one Hardware Open Gap on main board for clearing password check, and one Hotkey for enabling BIOS Recovery.

Clearing Password Check

Hardware Open Gap Description

Hardware	Default Setting	Operation Description
Gap	Open (Normal)	Short (Clearing Password Check)

HW Gap position on M/B space:

Gap name in TravelMate 6593 Series is TBA

Steps for Clearing BIOS Password Check

If users set BIOS Password (Supervisor Password and/or User Password) for a security reason, BIOS will ask the password during systems POST or when systems enter to BIOS Setup menu. However, once it is necessary to bypass the password check, users need to short the HW Gap to clear the password by the following steps:

- Power Off a system, and remove HDD, AC and Battery from the machine.
- Open the back cover of the machine, and find out the HW Gap on M/B as picture.
- Use an electric conductivity tool to short the two points of the HW Gap.
- Plug in AC, keep the short condition on the HW Gap, and press Power Button to power on the system till BIOS POST finish. Then remove the tool from the HW Gap.
- Restart system. Press F2 key to enter BIOS Setup menu.
- If there is no Password request, BIOS Password is cleared. Otherwise, please follow the steps and try again.

NOTE: The steps are only for clearing BIOS Password (Supervisor Password and User Password).

BIOS Recovery by Crisis Disk

BIOS Recovery Boot Block:

BIOS Recovery Boot Block is a special block of BIOS. It is used to boot up the system with minimum BIOS initialization. Users can enable this feature to restore the BIOS firmware to a successful one once the previous BIOS flashing process failed.

BIOS Recovery Hotkey:

The system provides a function hotkey: **Fn+Esc**, for enable BIOS Recovery process when system is powered on during BIOS POST. To use this function, it is strongly recommended to have the AC adapter and Battery present. If this function is enabled, the system will force the BIOS to enter a special BIOS block, called Boot Block.

Steps for BIOS Recovery by Crisis Disk:

Before doing this, one Crisis Disk should be prepared ready in hand. The Crisis Disk could be made by executing the Crisis Disk program in another system with Windows XP OS.

Follow the steps below:

- 1. Power Off system.
- 2. Insert the Crisis Disk to a USB floppy drive which is attached to the BIOS flash failed machine.
- 3. In the power-off state, press **Fn+Esc** and hold them and then press Power Button. The system should be powered on with Crisis BIOS Recovery process.
- BIOS Boot Block starts to restore the BIOS code from the Crisis floppy disk to BIOS ROM on the failed machine.
- **5.** If the Crisis flashing process is finished, the system will restart.

If the Crisis Recovery process is finished, the system should be powered on with successful and workable BIOS. Then a person can update the latest version BIOS for this machine by regular BIOS flashing process.

Chapter 5 129

FRU (Field Replaceable Unit) List

This chapter gives you the FRU (Field Replaceable Unit) listing in global configurations of 5930/5930Z/6593Z Series. Refer to this chapter whenever ordering for parts to repair or for RMA (Return Merchandise Authorization).

Please note that WHEN ORDERING FRU PARTS, you should check the most up-to-date information available on your regional web or channel. For whatever reasons a part number change is made, it will not be noted on the printed Service Guide. For ACER AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code from those given in the FRU list of this printed Service Guide. You MUST use the local FRU list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

NOTE: To scrap or to return the defective parts, you should follow the local government ordinance or regulations on how to dispose it properly, or follow the rules set by your regional Acer office on how to return it.

Test Compatible Components

This computer's compatibility is tested and verified by Acer's internal testing department. All of its system functions are tested under Windows® XP Home, Windows® XP Pro environment.

Refer to the following lists for components, adapter cards, and peripherals which have passed these tests. Regarding configuration, combination and test procedures, please refer to the TravelMate 6593 series Compatibility Test Report released by the Acer Mobile System Testing Department.

Microsoft® Windows® Vista Environment Test

Online Support Information

This section describes online technical support services available to help you repair your Acer Systems.

If you are a distributor, dealer, ASP or TPM, please refer your technical queries to your local Acer branch office. Acer Branch Offices and Regional Business Units may access our website. However some information sources will require a user i.d. and password. These can be obtained directly from Acer CSD Taiwan.

Acer's Website offers you convenient and valuable support resources whenever you need them.

In the Technical Information section you can download information on all of Acer's Notebook, Desktop and Server models including:

		Service guides for all models
		User's manuals
		Training materials
		Bios updates
		Software utilities
		Spare parts lists
		TABs (Technical Announcement Bulletin)
		ourposes, we have included an Acrobat File to facilitate the problem-free downloading of our naterial.
Also	conta	ined on this website are:
		Detailed information on Acer's International Traveller's Warranty (ITW)
		Returned material authorization procedures
		An overview of all the support services we offer, accompanied by a list of telephone, fax and emai contacts for all your technical queries.

We are always looking for ways to optimize and improve our services, so if you have any suggestions or comments, please do not hesitate to communicate these to us.
